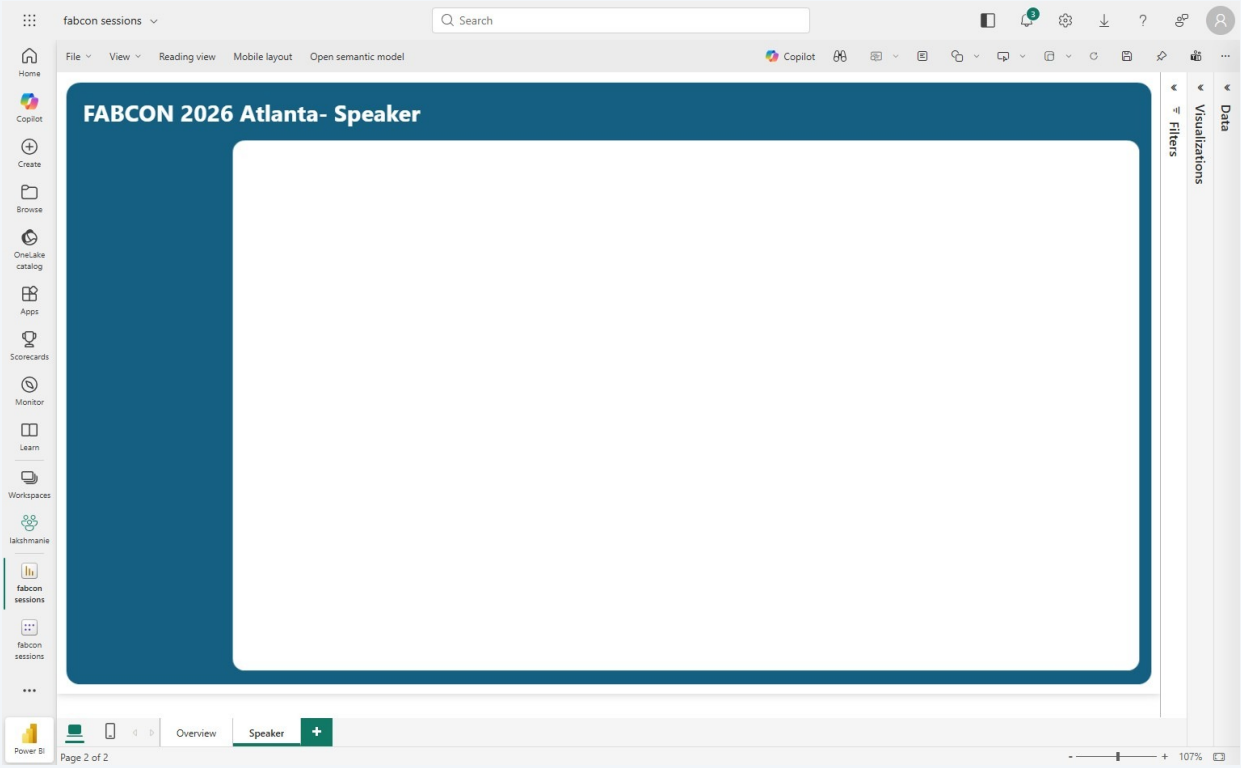
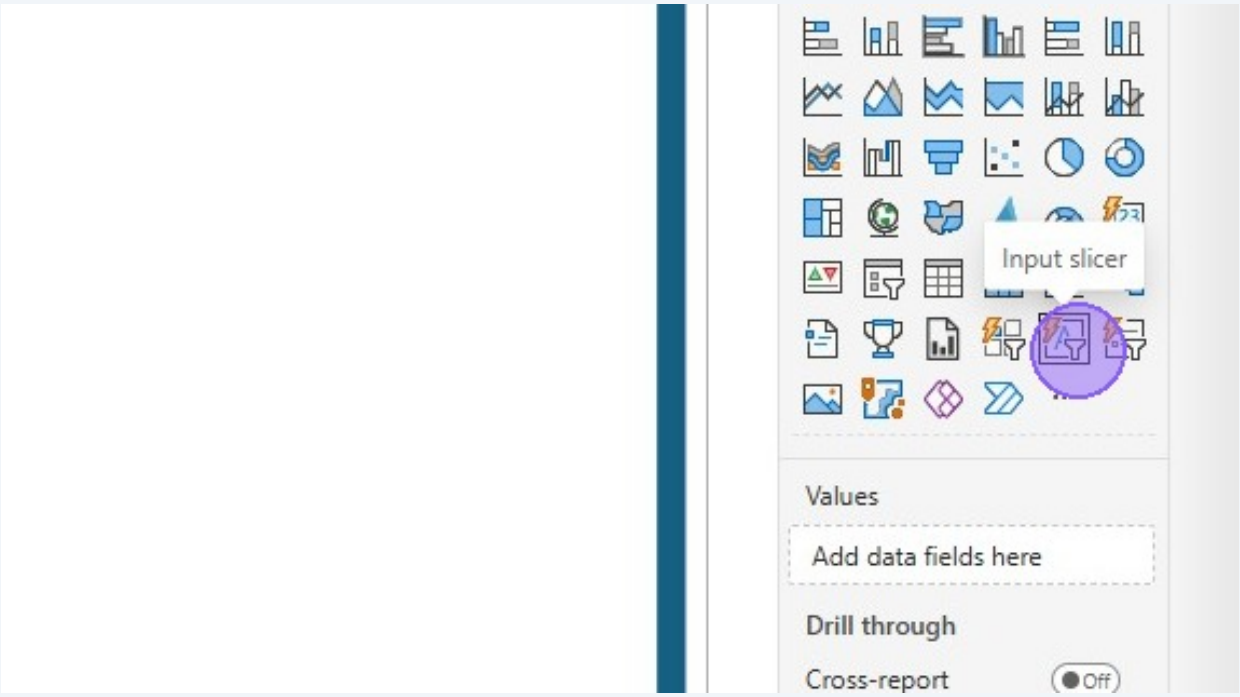
5d. Page 2: Speaker

1 Add a new Page and Rename it to "Speaker.
Add your background and title. (Refer to previous instructions)

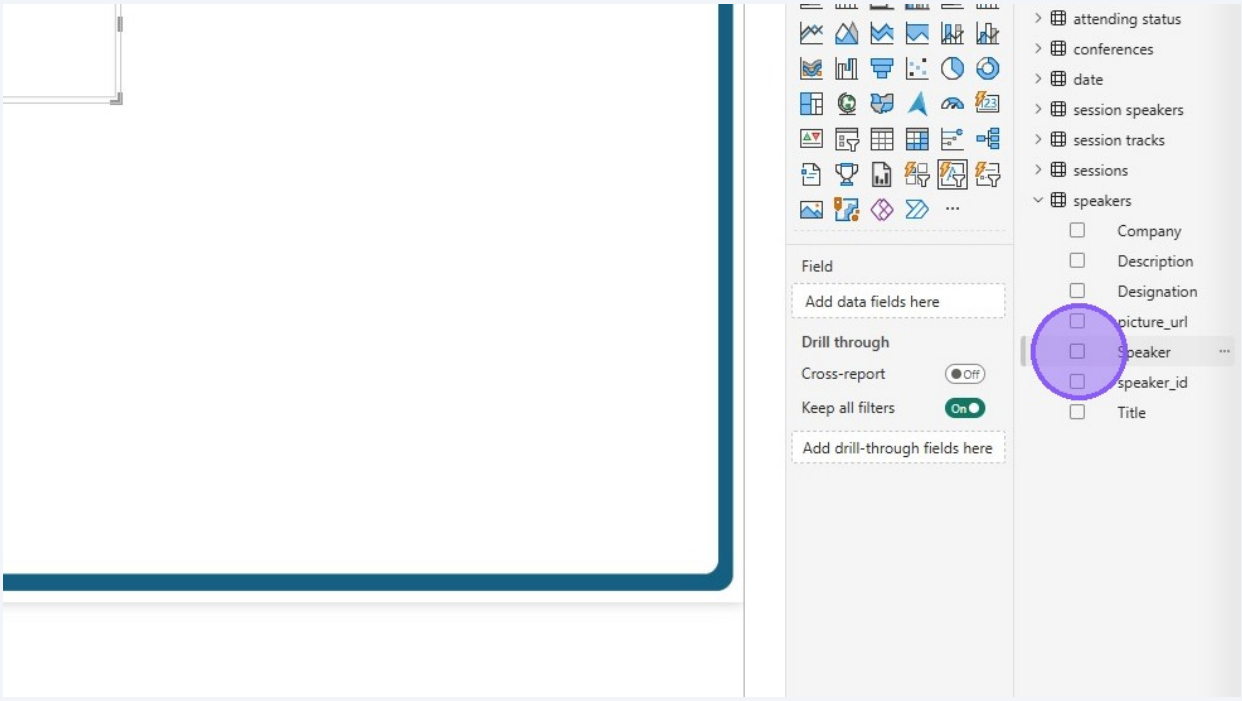


Speaker Name Text/Input Slicer

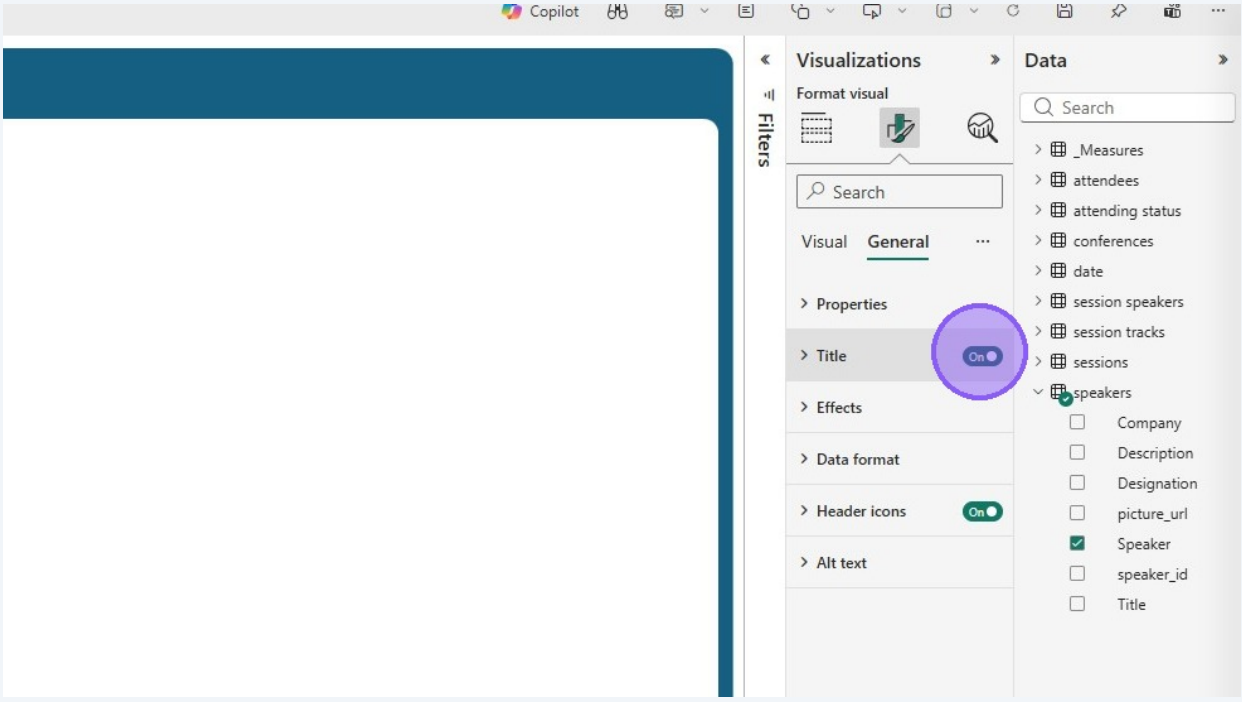
2 Select the Input Slicer



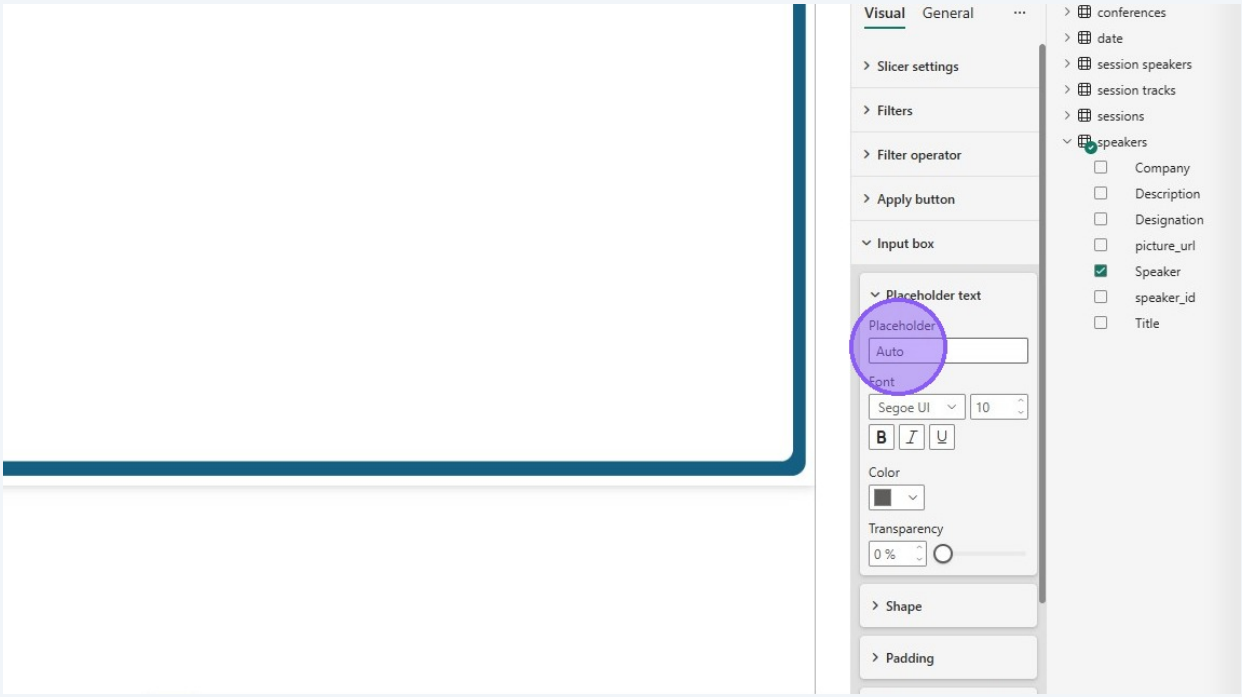
3 Drag and Drop "Speaker" from the speakers table into the Field bucket.



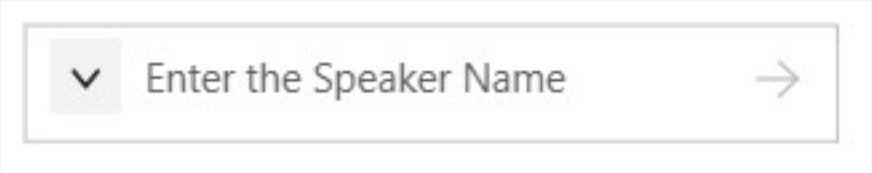
4 In the Visualization Pane, Turn OFF the Title under the General Tab



5 In the Visual Tab, Under Input Box section, you will find Placeholder Text. Under Placeholder, type in "Enter the Speaker Name"

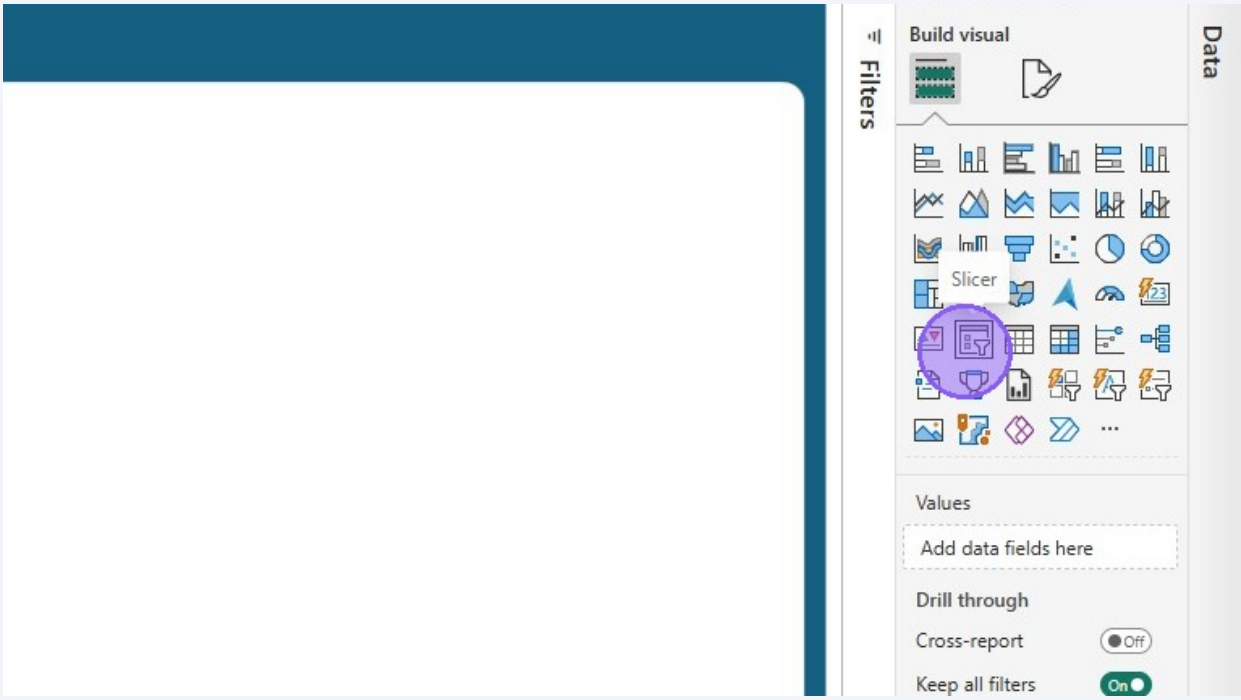


6 This is how the slicer looks like now.

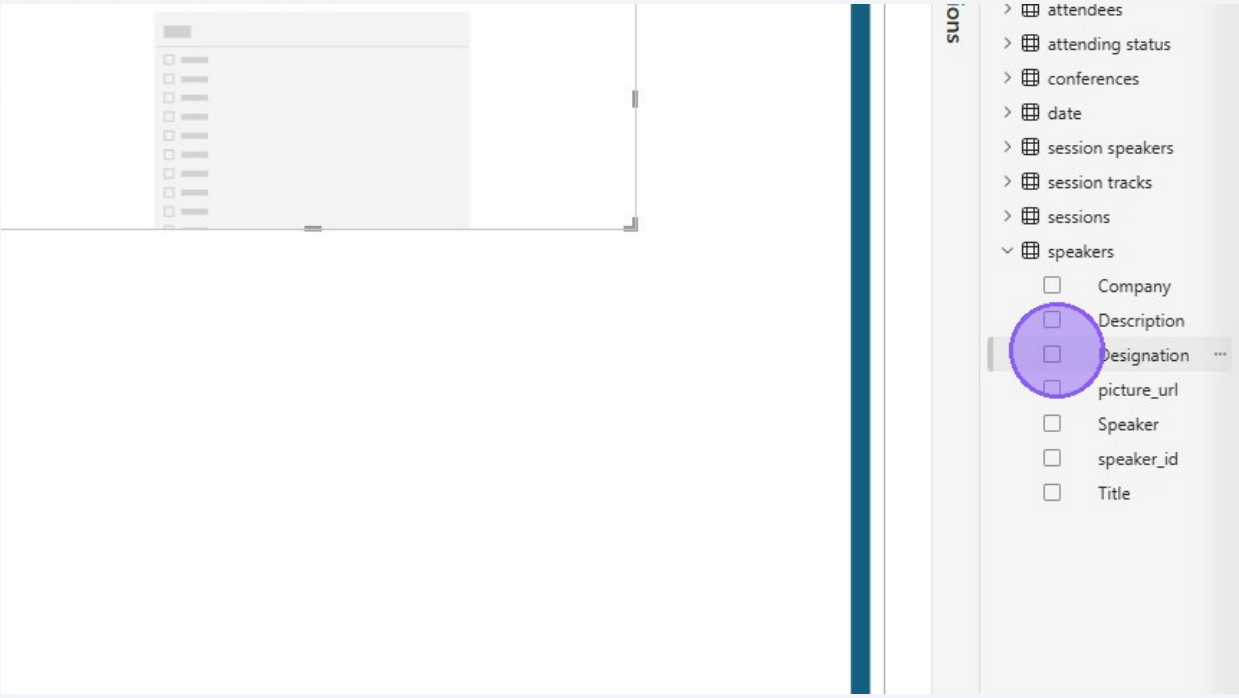


Designation Slicer

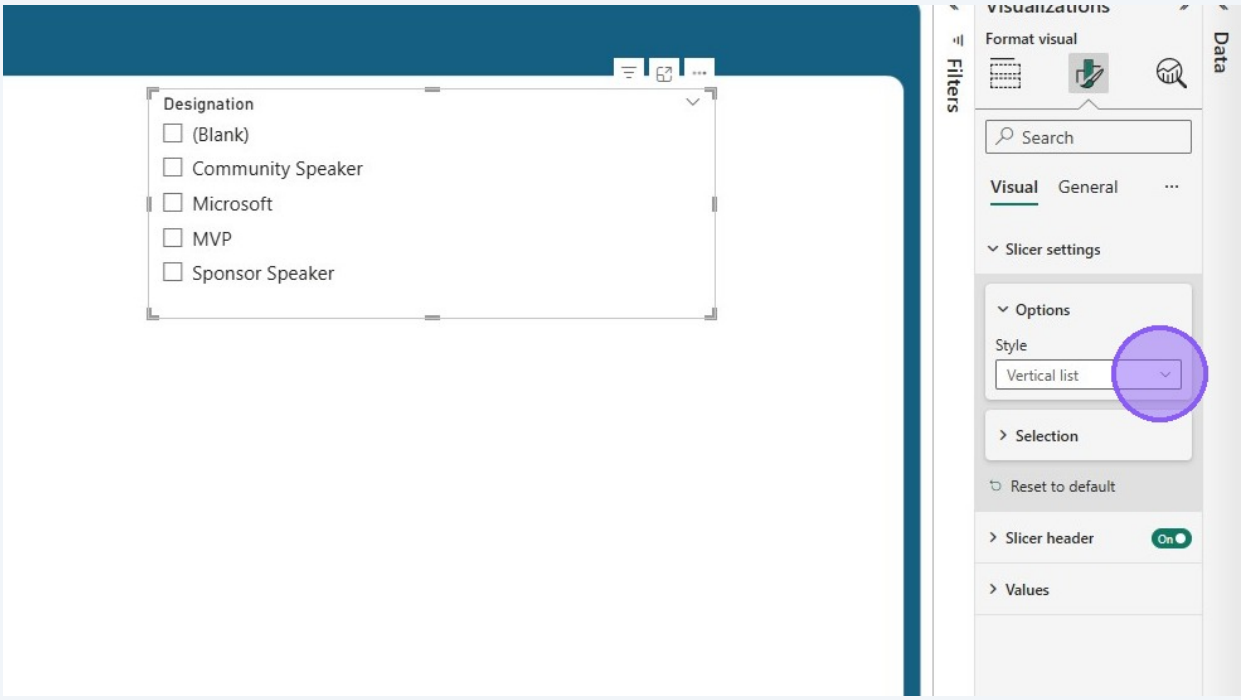
7 Add a slicer



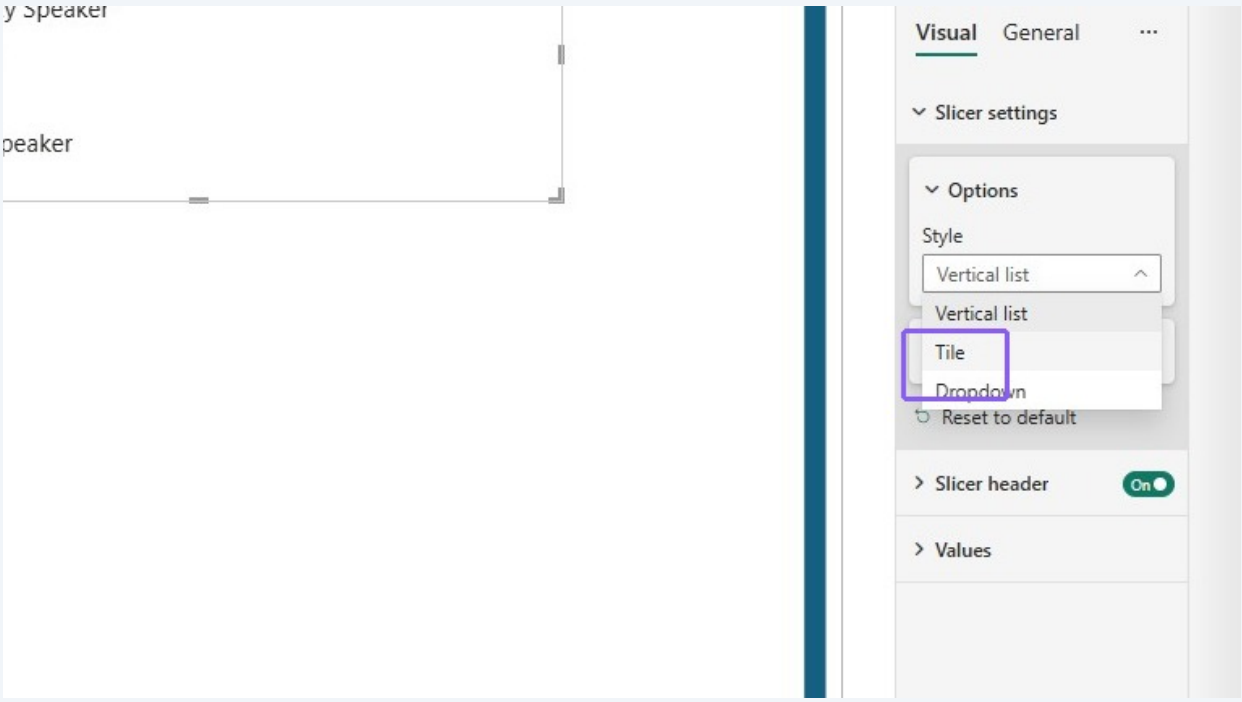
8 Choose "Designation" from the speakers table



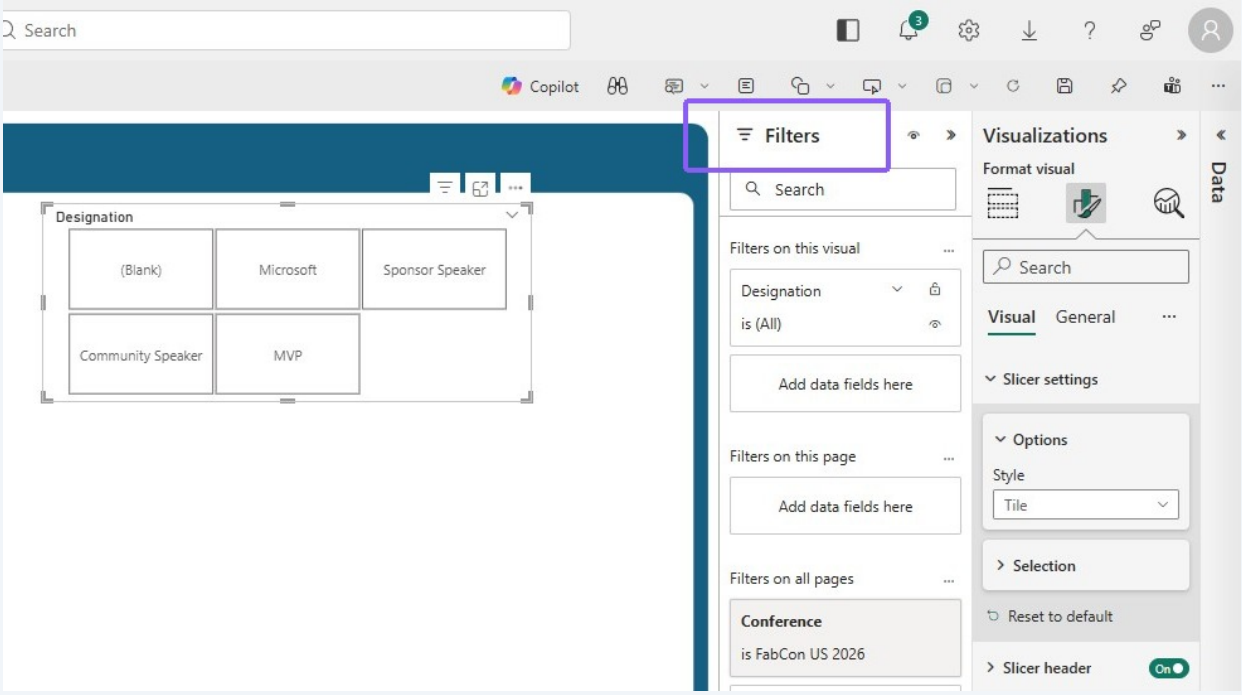
9 Under the Visual tab, find slicer settings. Navigate to Style under the Slicer options.



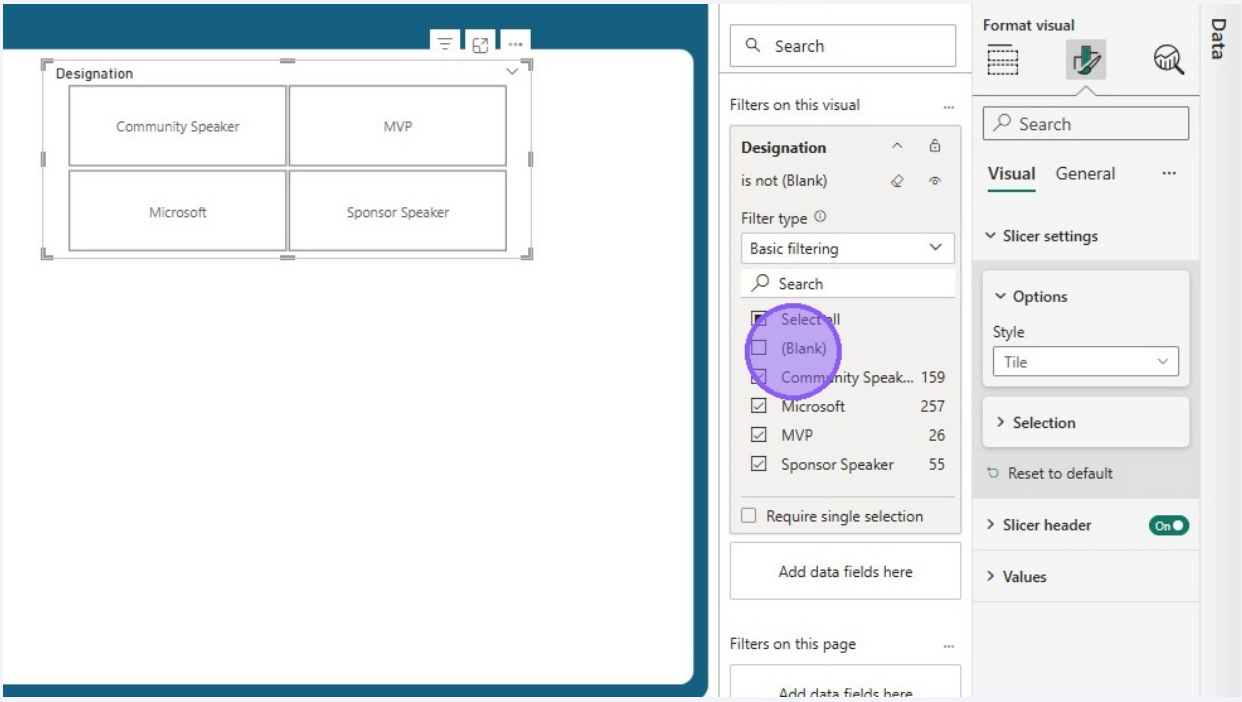
10 Choose "Tile"



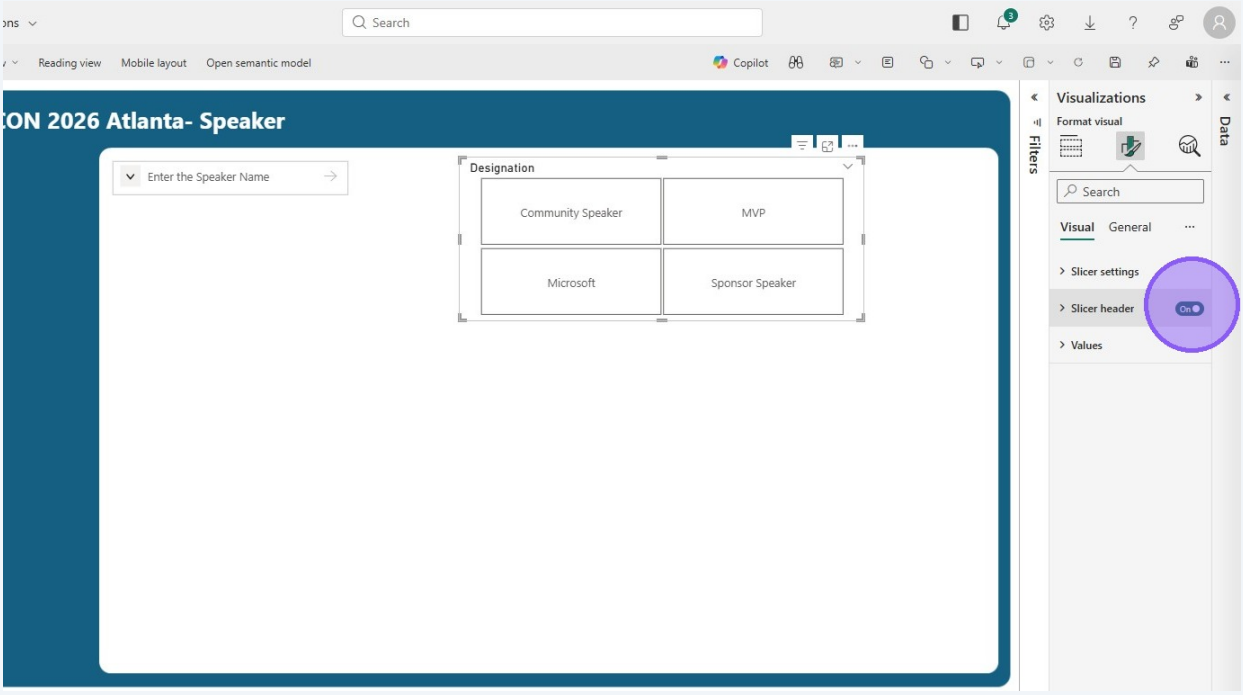
11 Note: Do you see that the slicer has (blank) ? Let's get rid of them. Simply go to the Filter pane



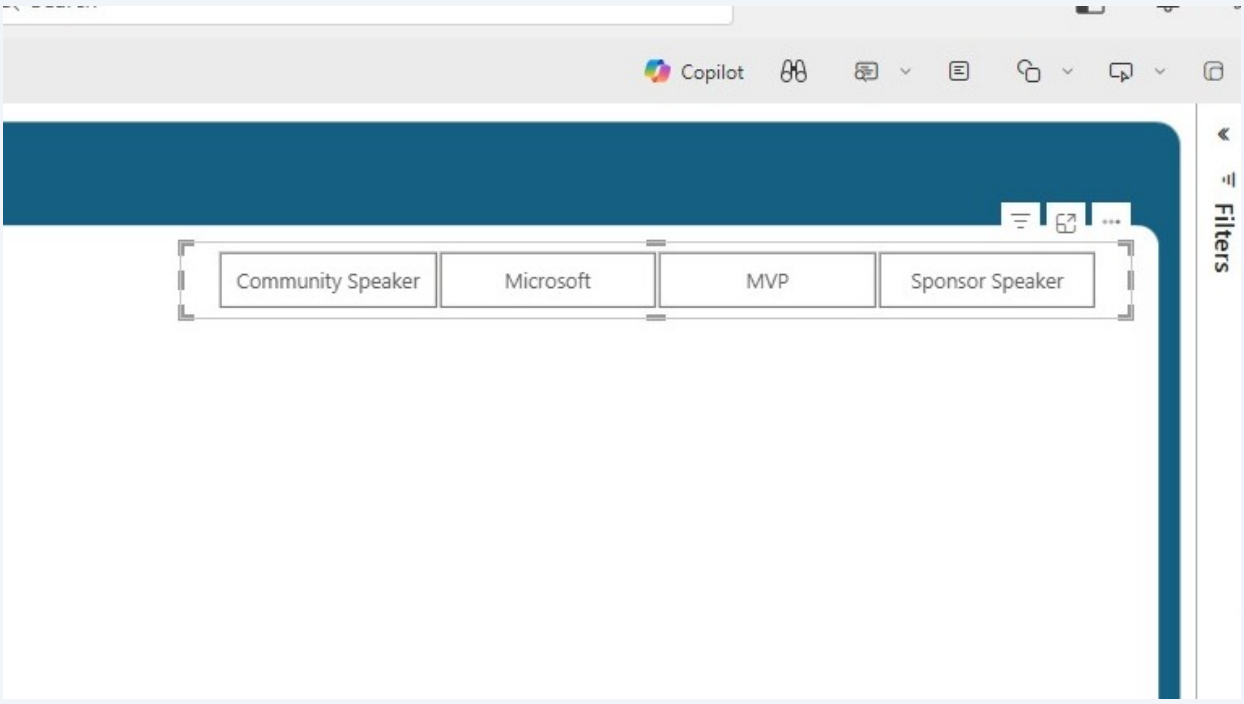
12 Select all and then unselect "(Blank)"



13 Turn off the Slicer Header

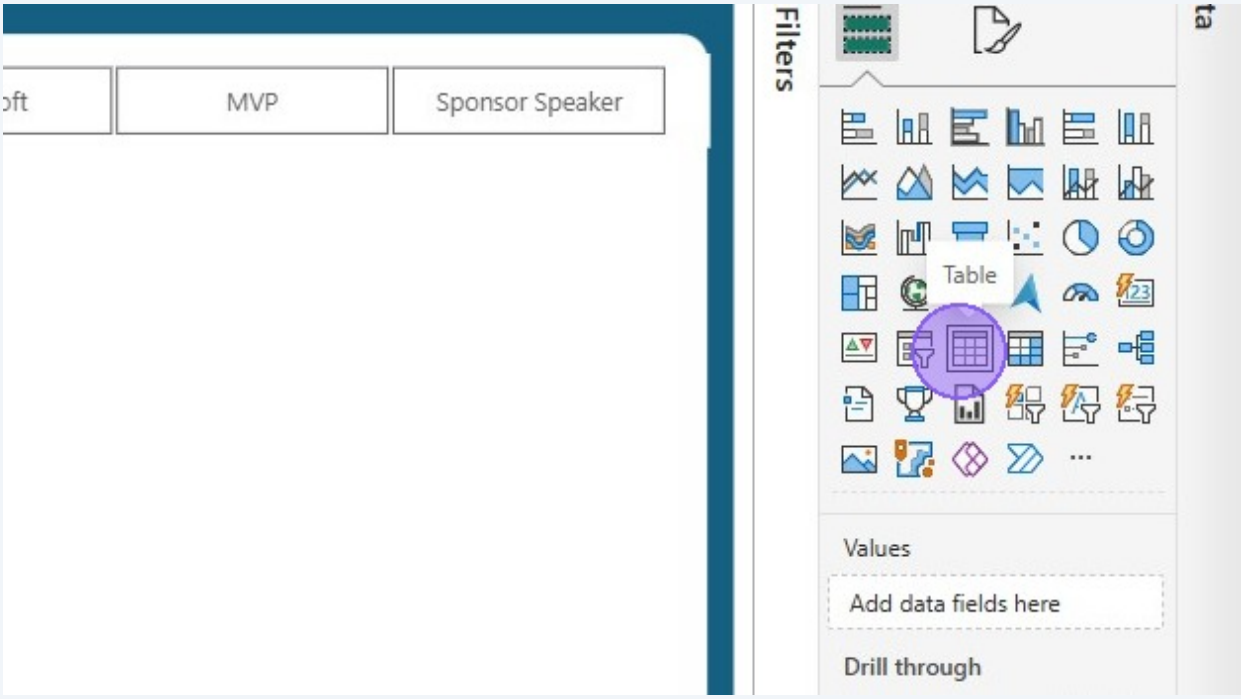


14 Adjust and place as below

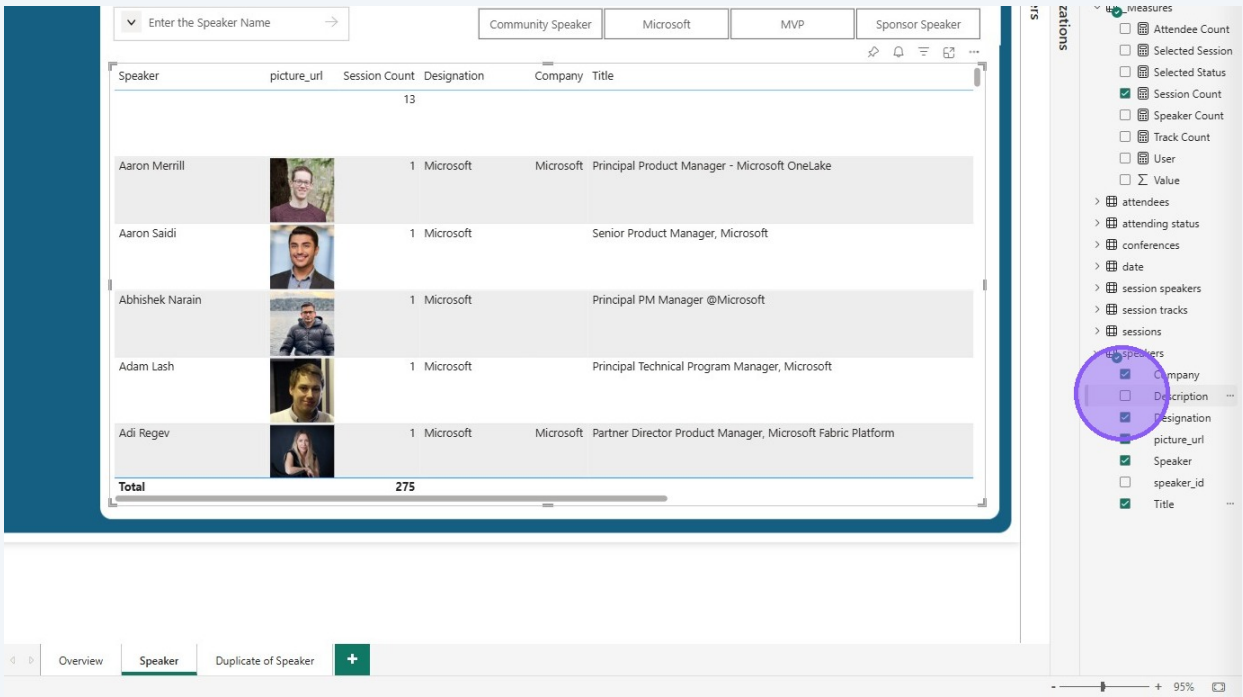


Speaker Table

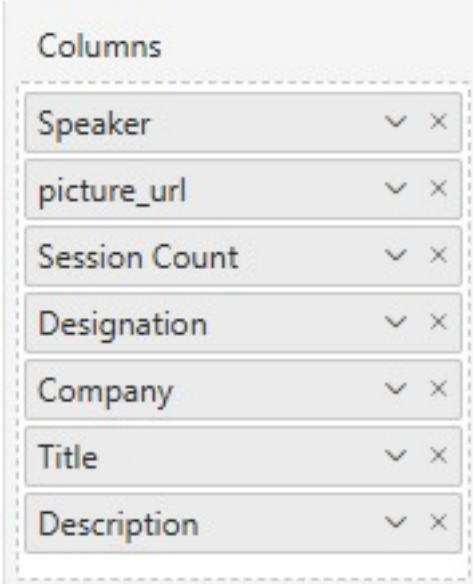
15 Add a table visual



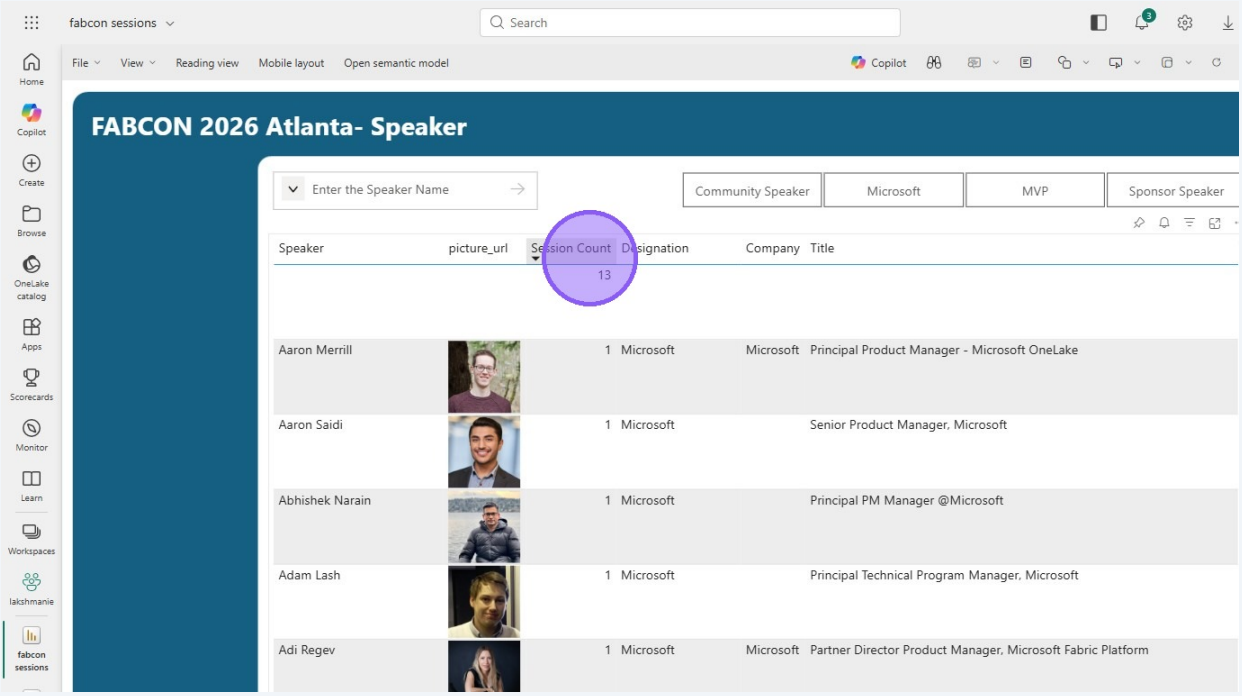
16 Select the required fields to add to the table.



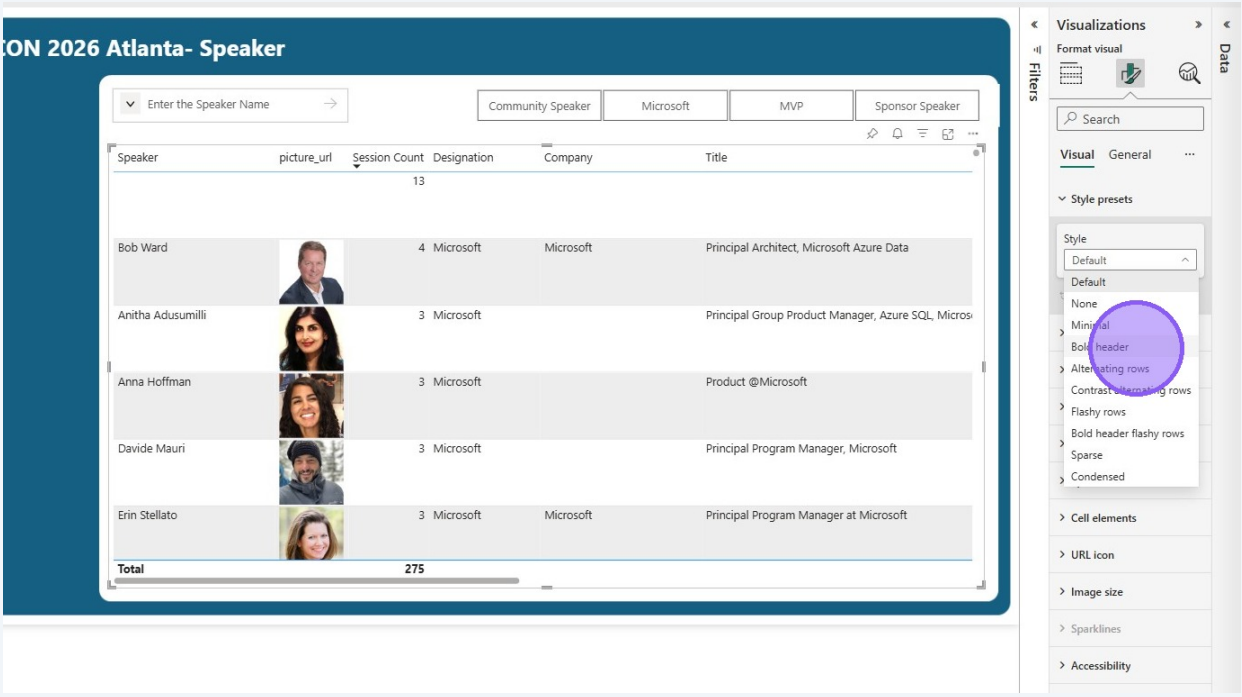
17 Follow this order to select your fields and measures.



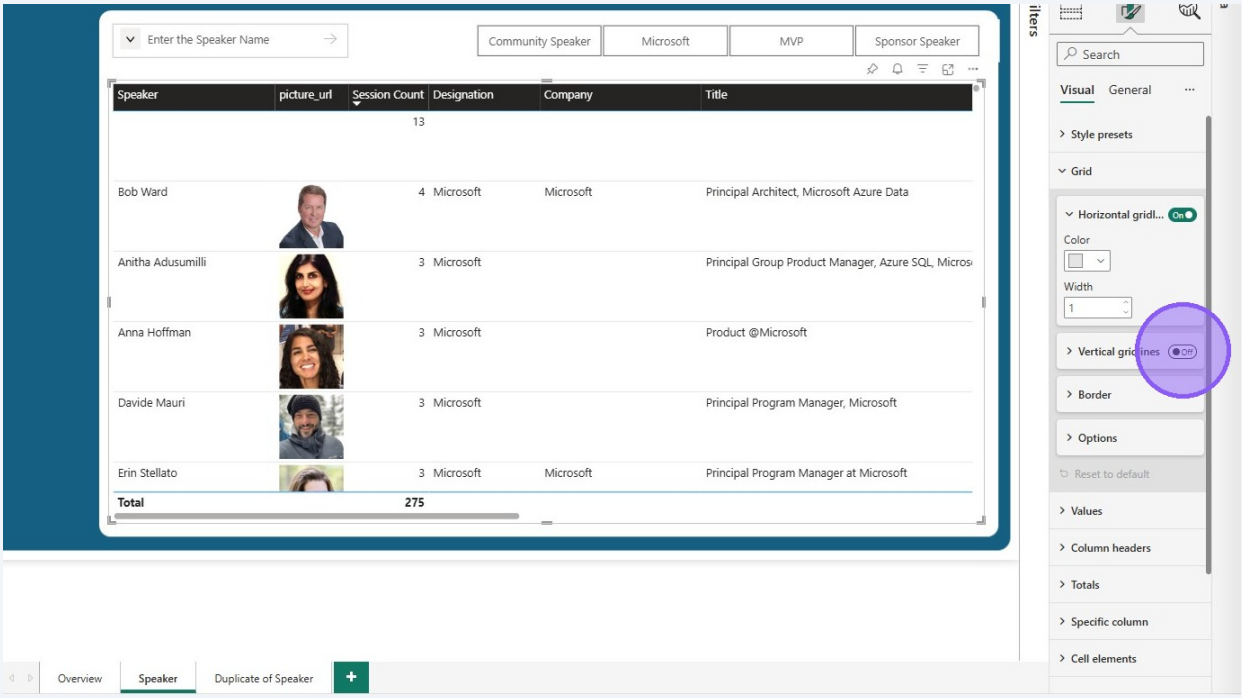
18 Click "Session Count" to sort and order by session count



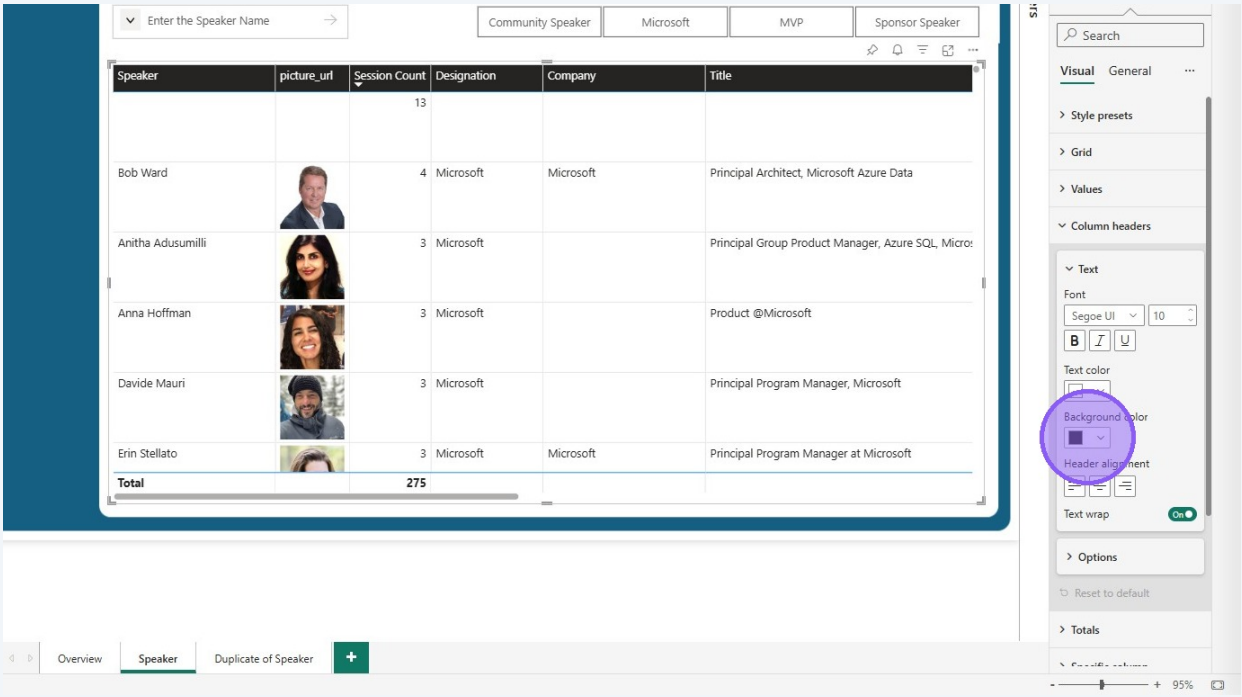
19 Under Style Presets, Click "Bold header". You can choose any that you like.



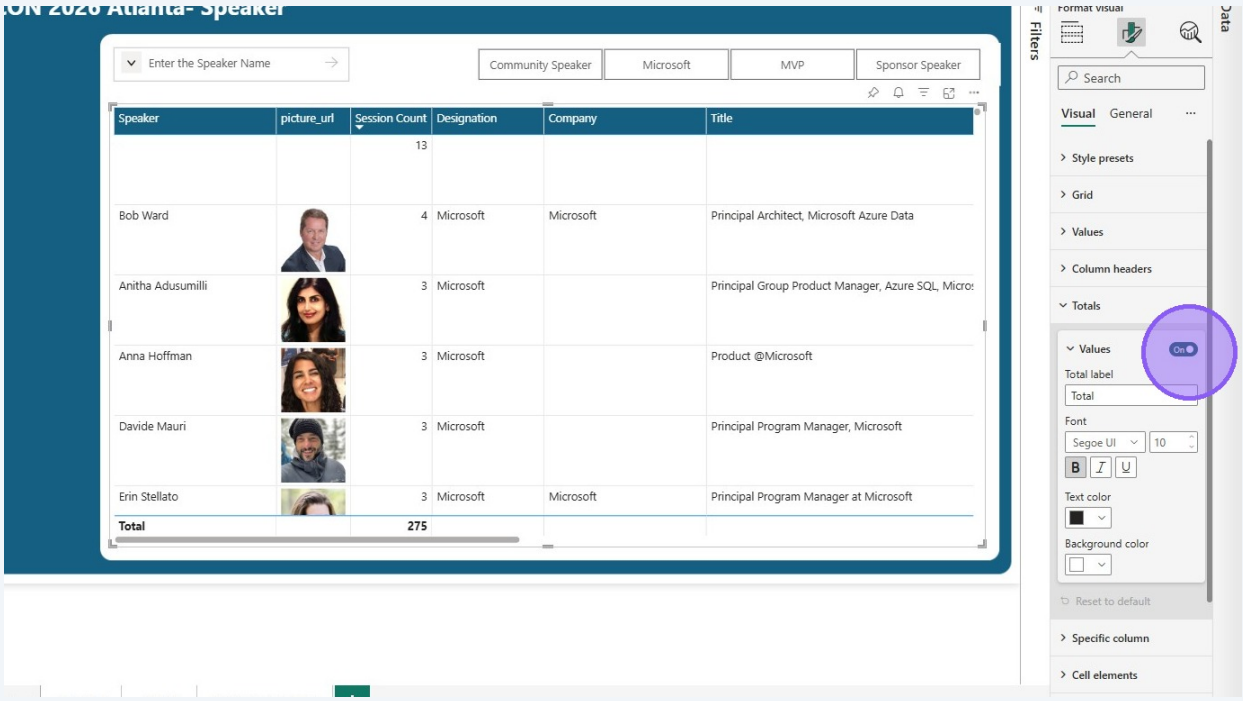
20 Switch ON the vertical gridlines under Grid



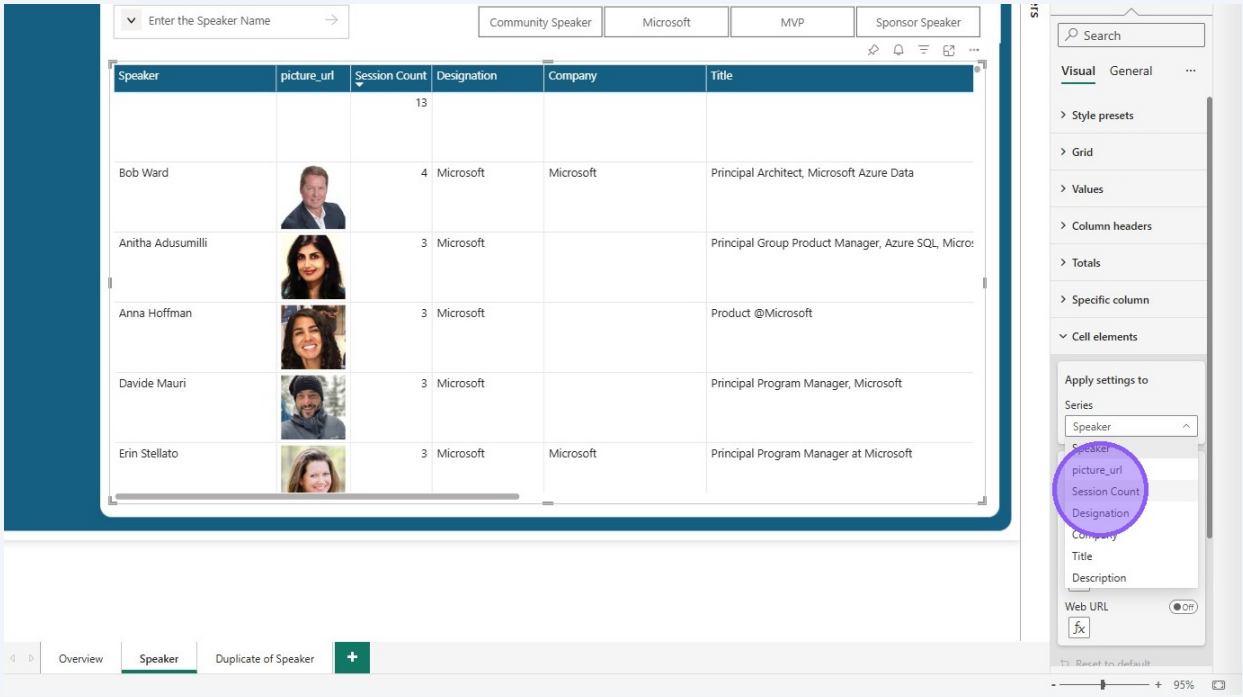
21 Under Column Headers, change background color to "#156082" to match the theme



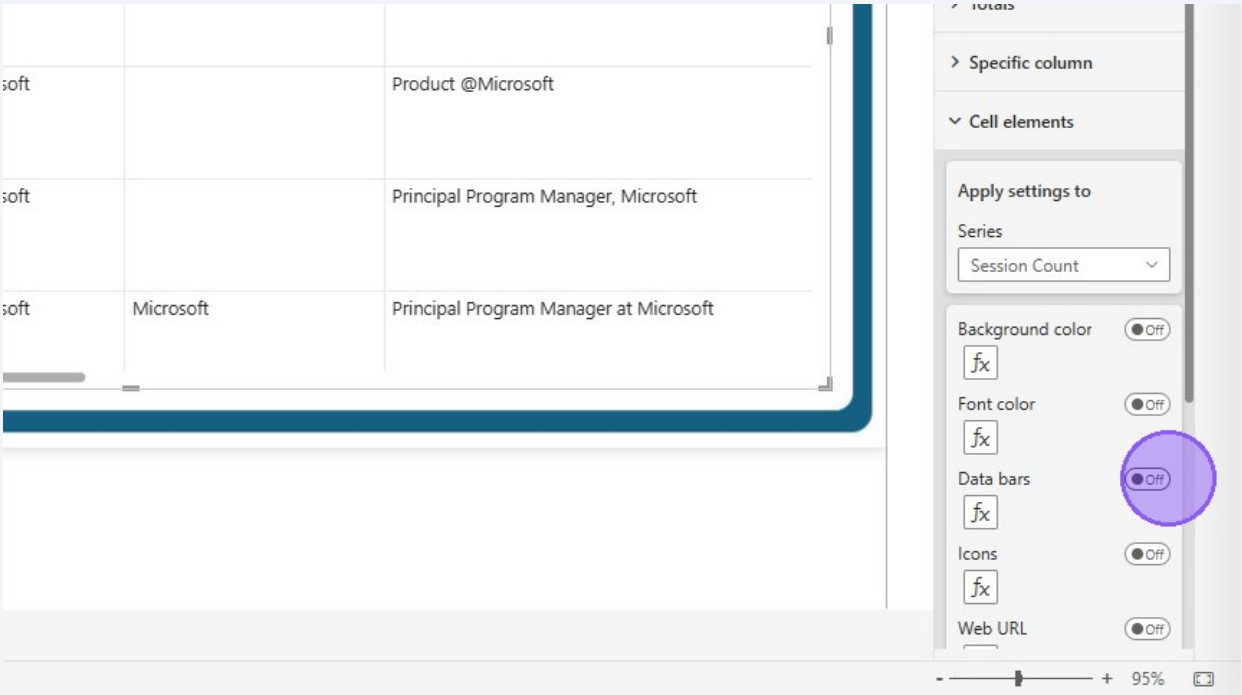
22 Switch OFF the totals



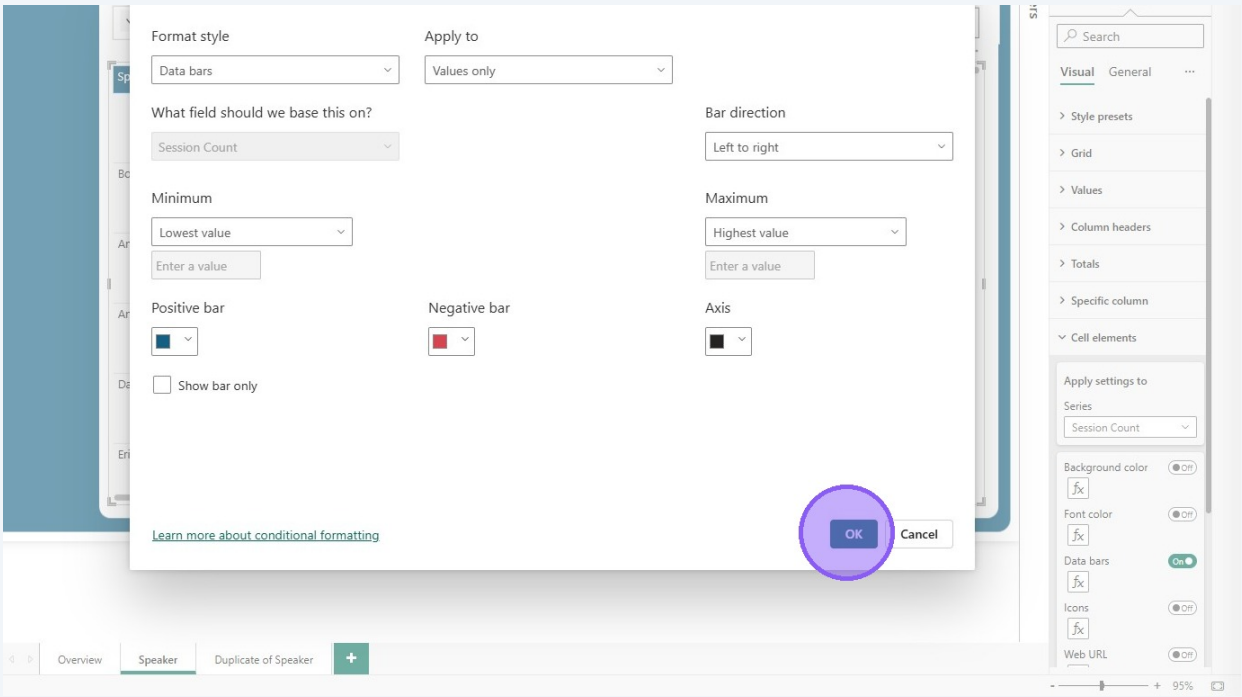
23 Under Cell Elements, Choose Session_Count



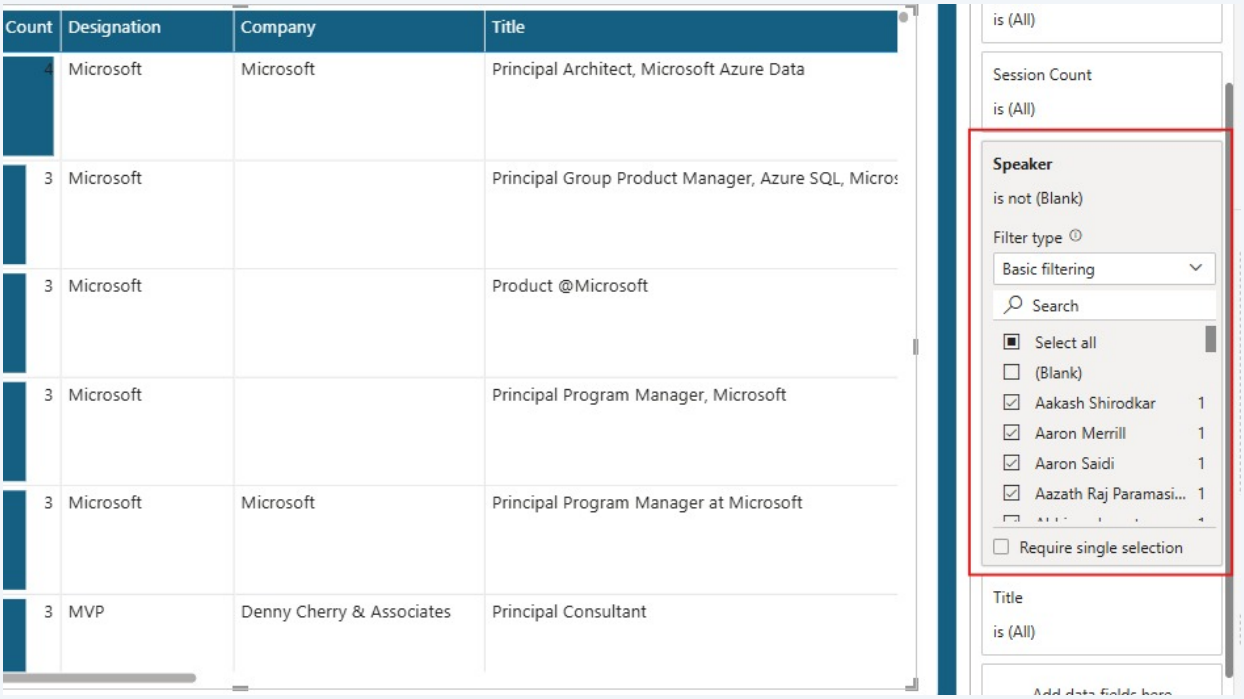
24 Enable the Data Bars



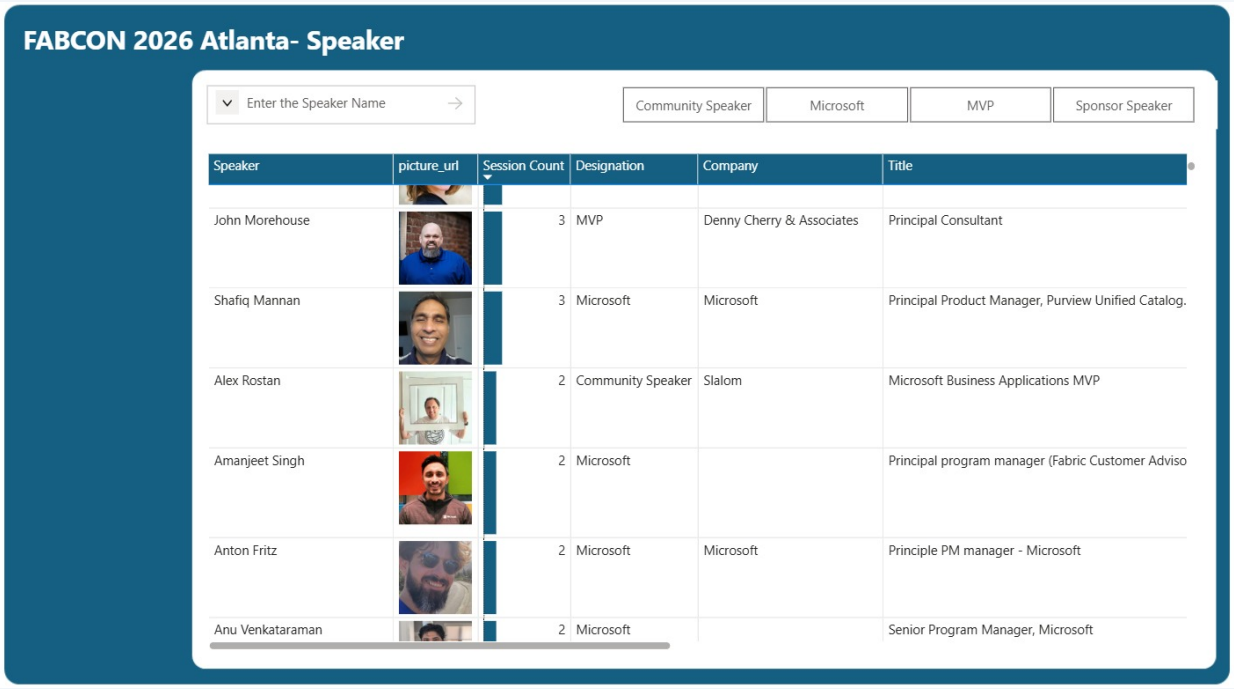
25 Make these changes in fx

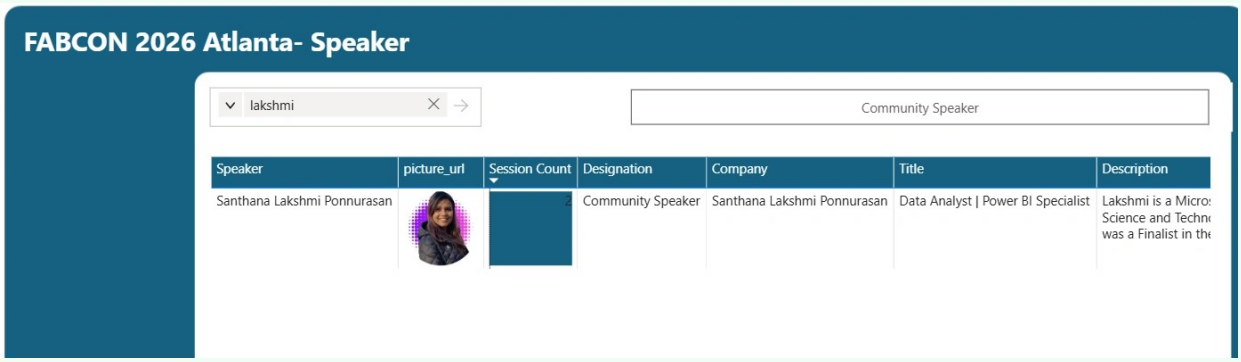


26 If you see blanks in the speaker column, hide it using visual level filters



27 This is the final Page 2





Play around with the slicers to note interactivity. Here is an example.
