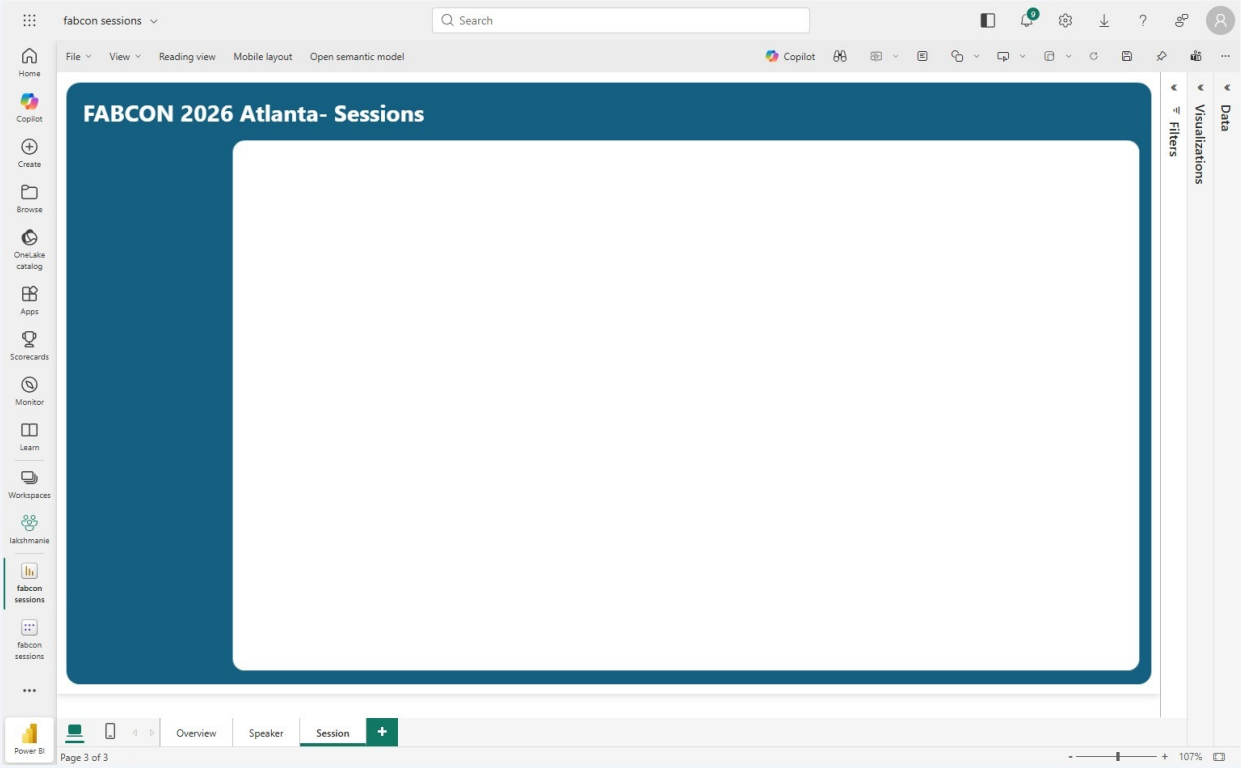
5e. Page 3: Sessions

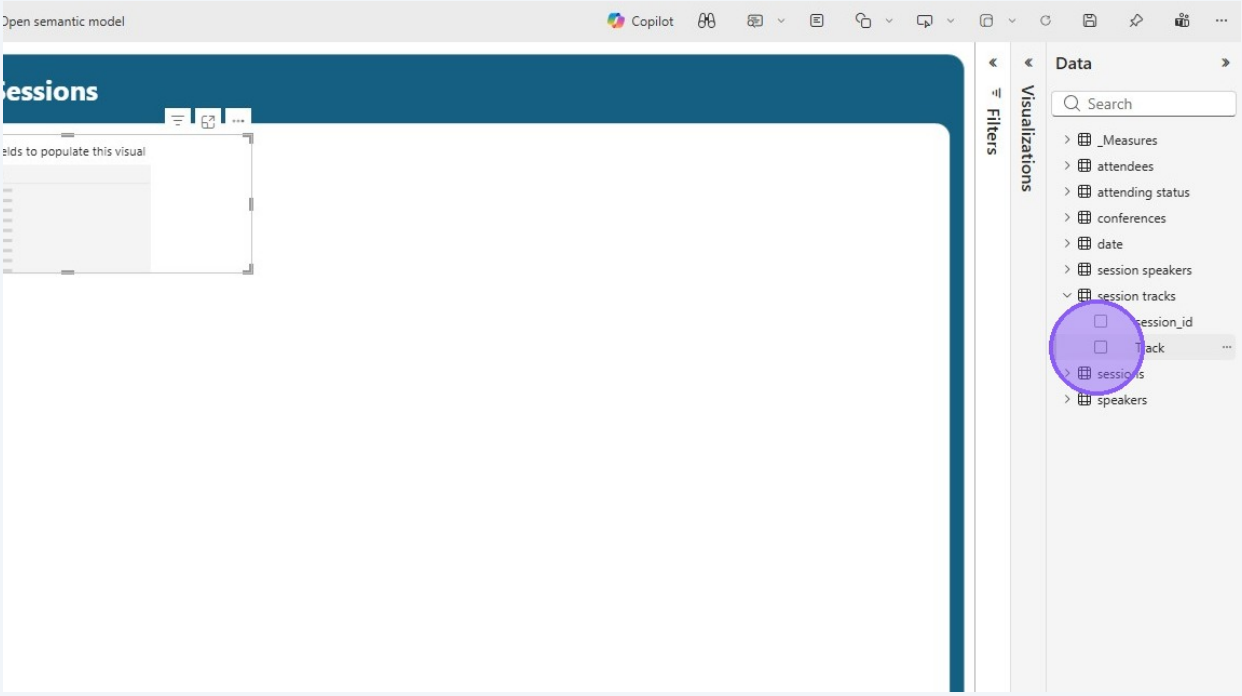
1 Create a new page and rename it as "Sessions". Follow previous steps to apply background and add the title "FABCON 2026 Atlanta- Sessions"



Track Dropdown Slicer

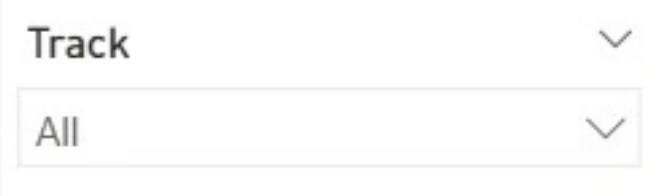
2 Select the Slicer Visual

3 From the session tracks table, choose track.

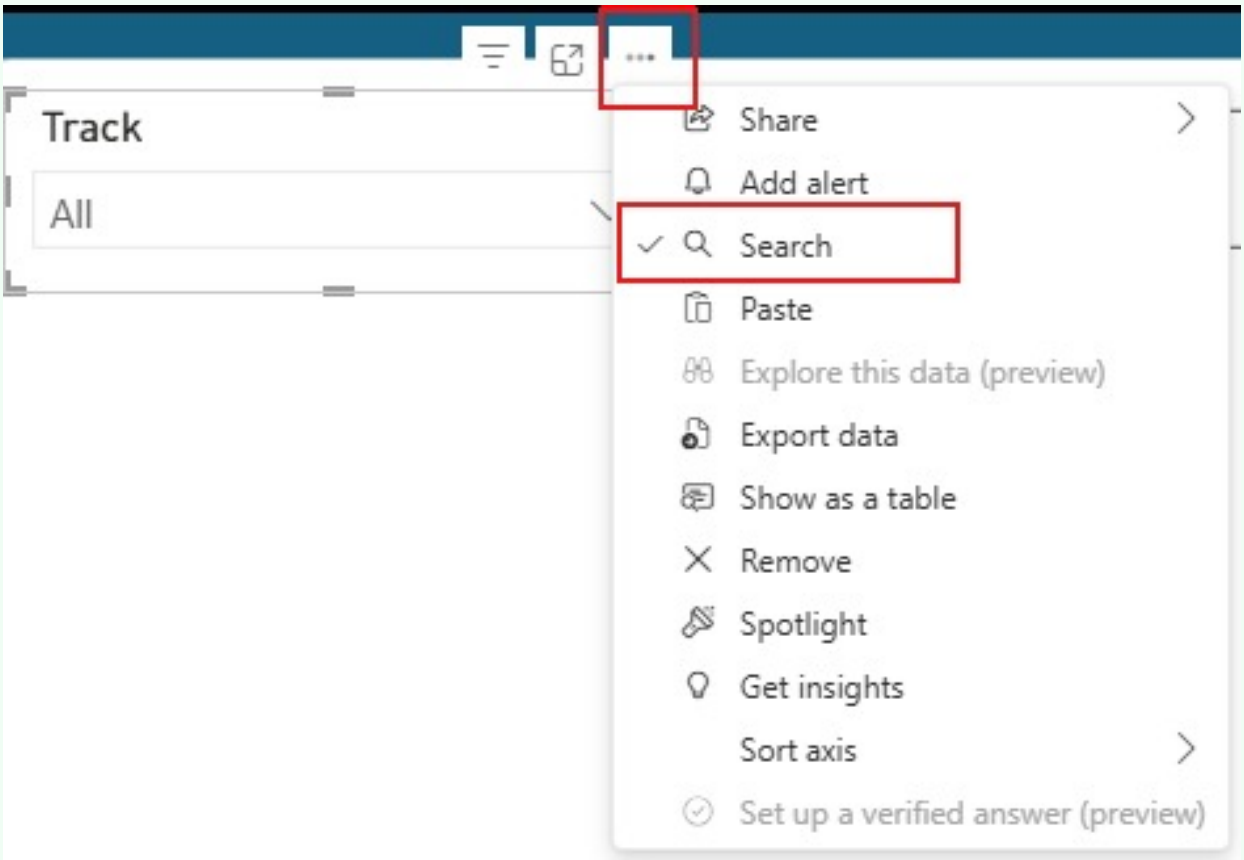


4 By default, the slicer has a Vertical List style. Let's convert it into a Dropdown from the Slicer Settings.

5 Your Track Dropdown Slicer is ready!

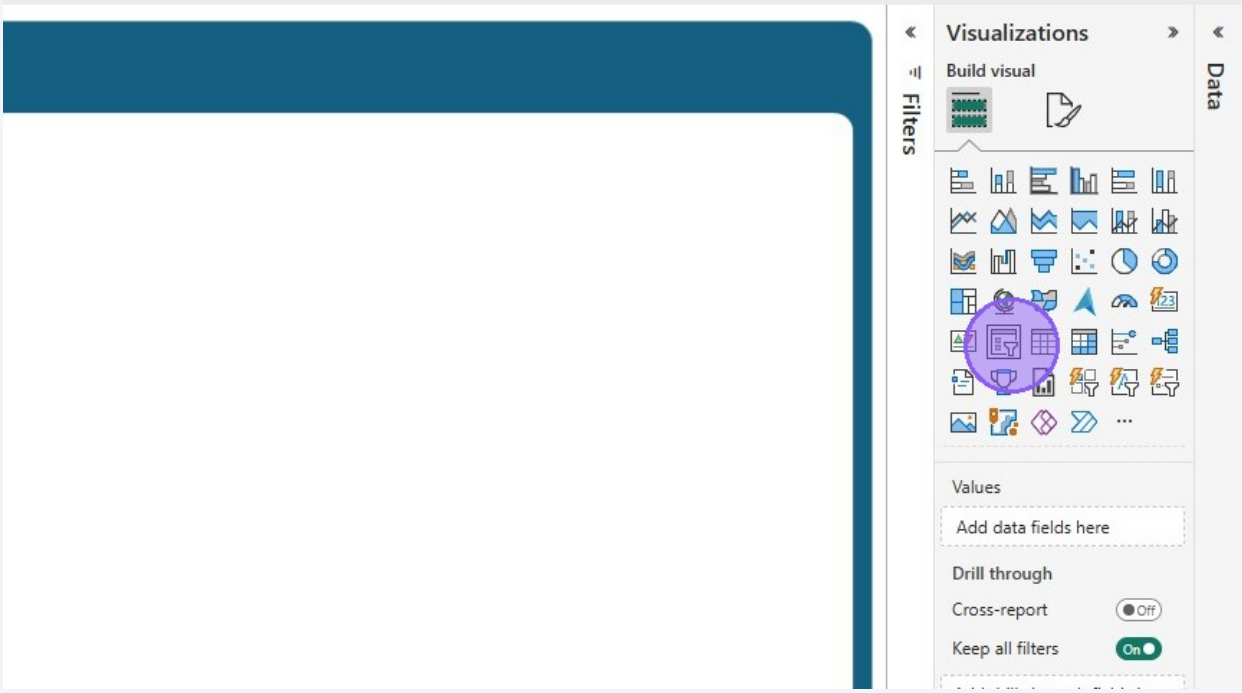


If you want to enable the search bar inside the Dropdown slicer, simply click on the three dots (...) on the top right corner of the visual. And then select Search

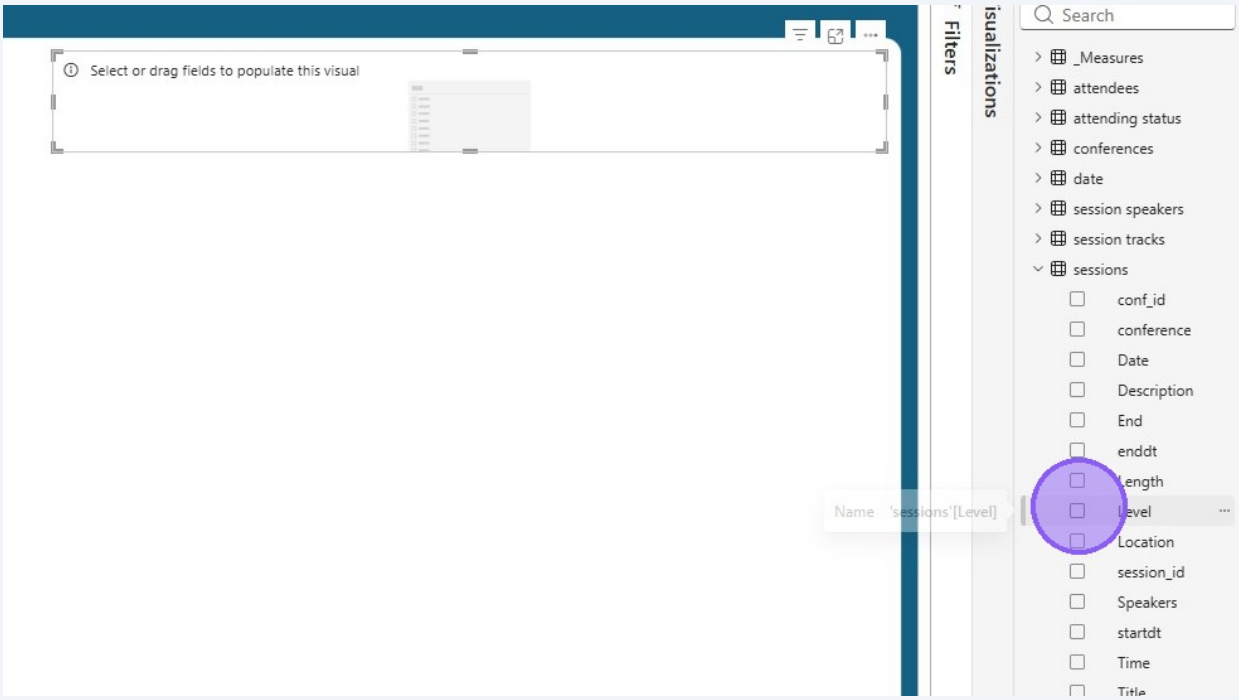


Track Level Slicer

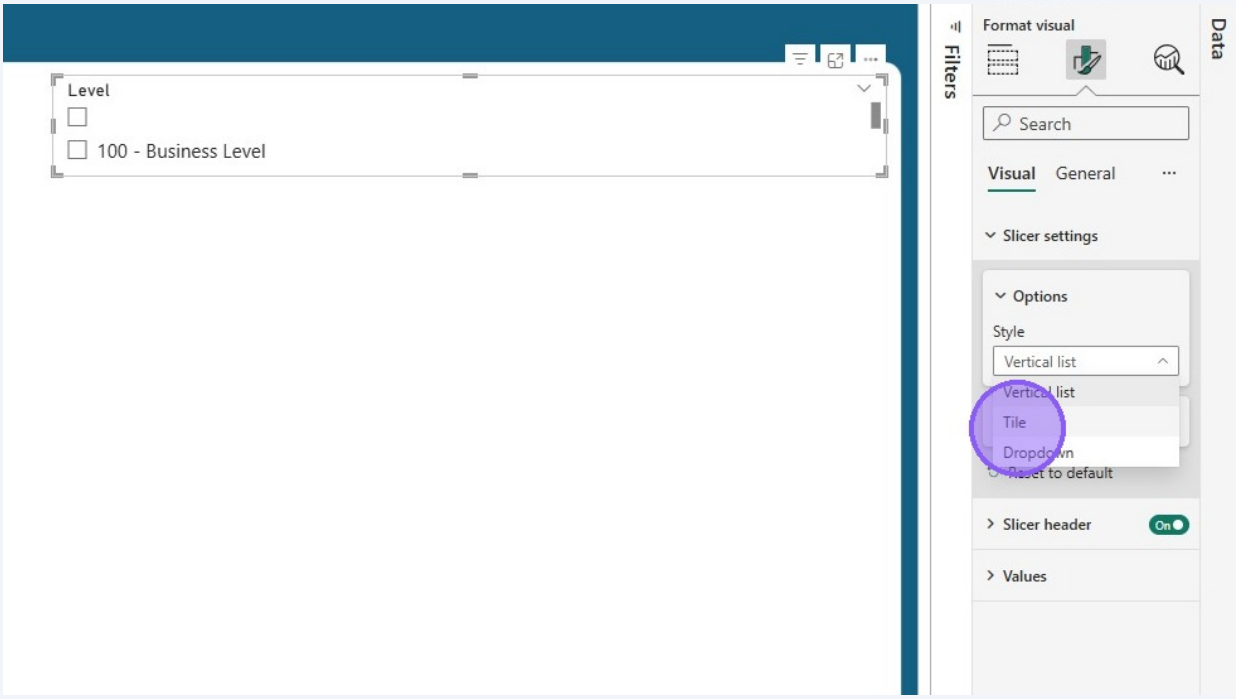
6 Add the slicer visual



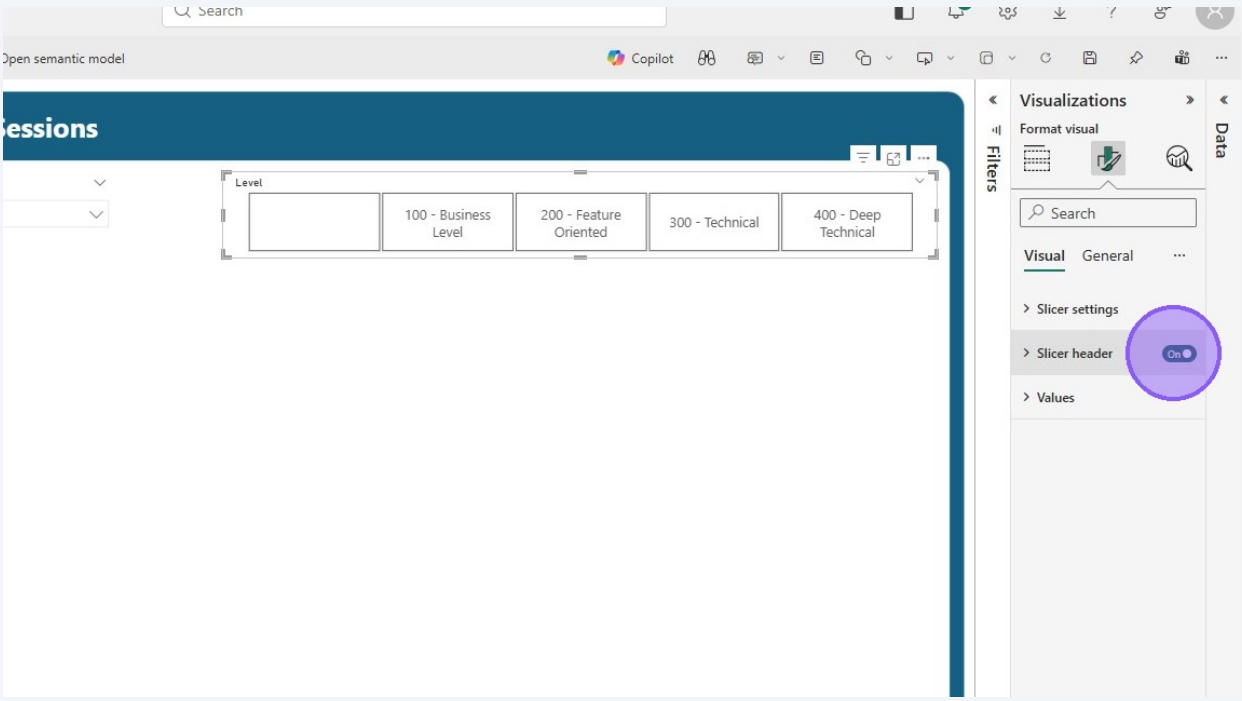
7 Under sessions table, select Level



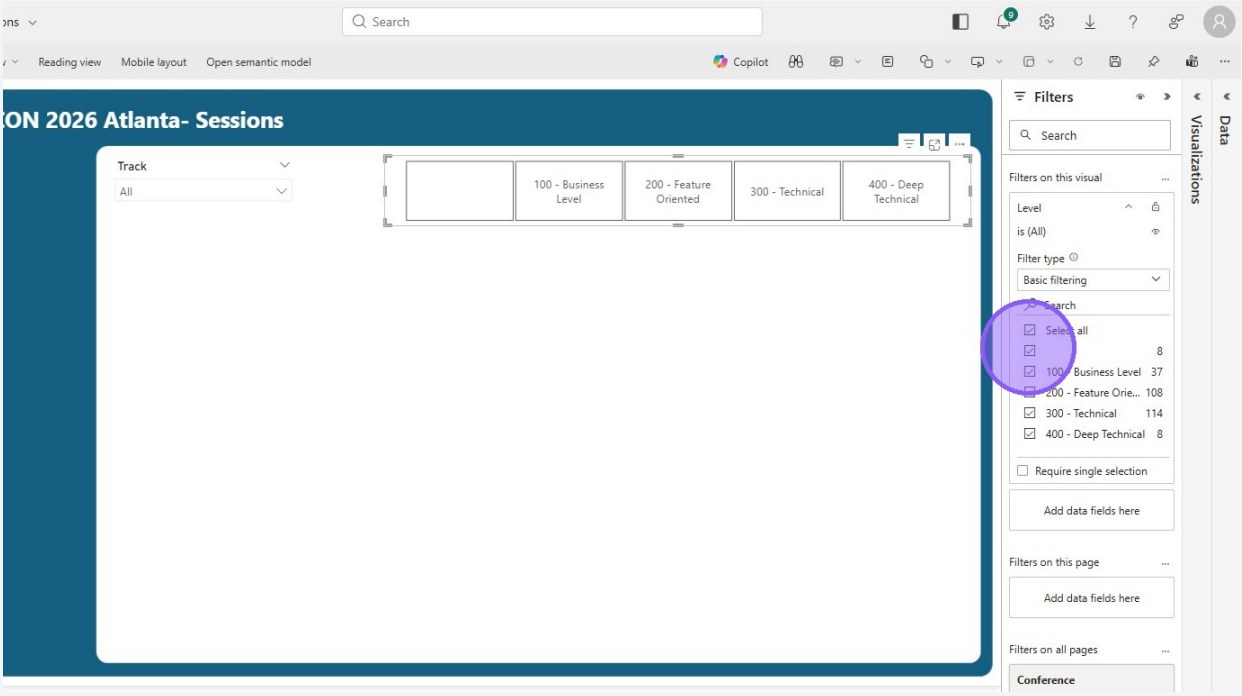
8 Convert it into a Tile type.



9 Switch OFF the slicer header

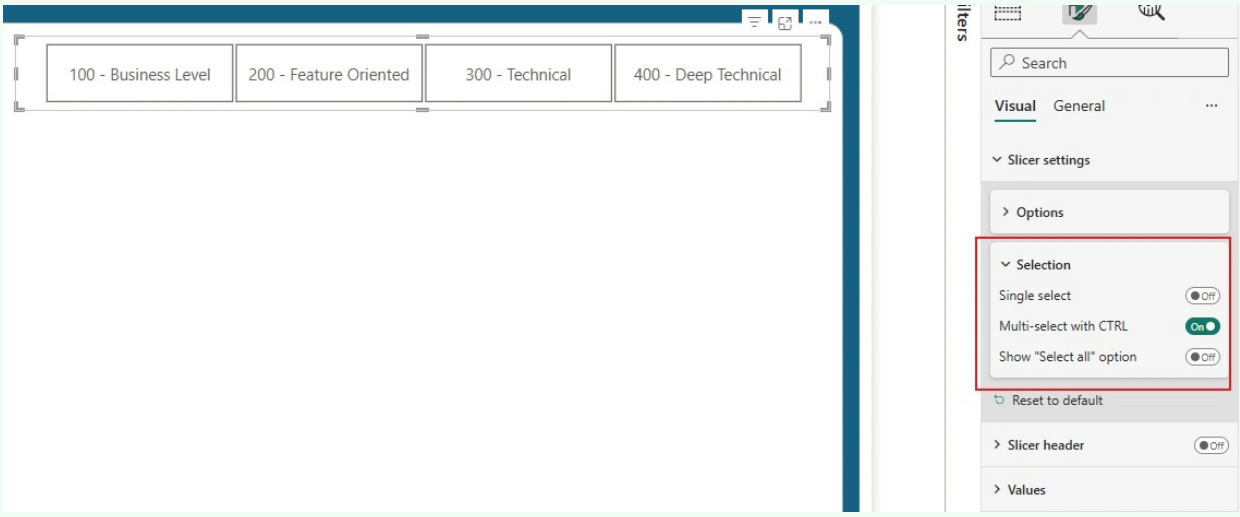


10 Remove blanks using the Visual Level Filter



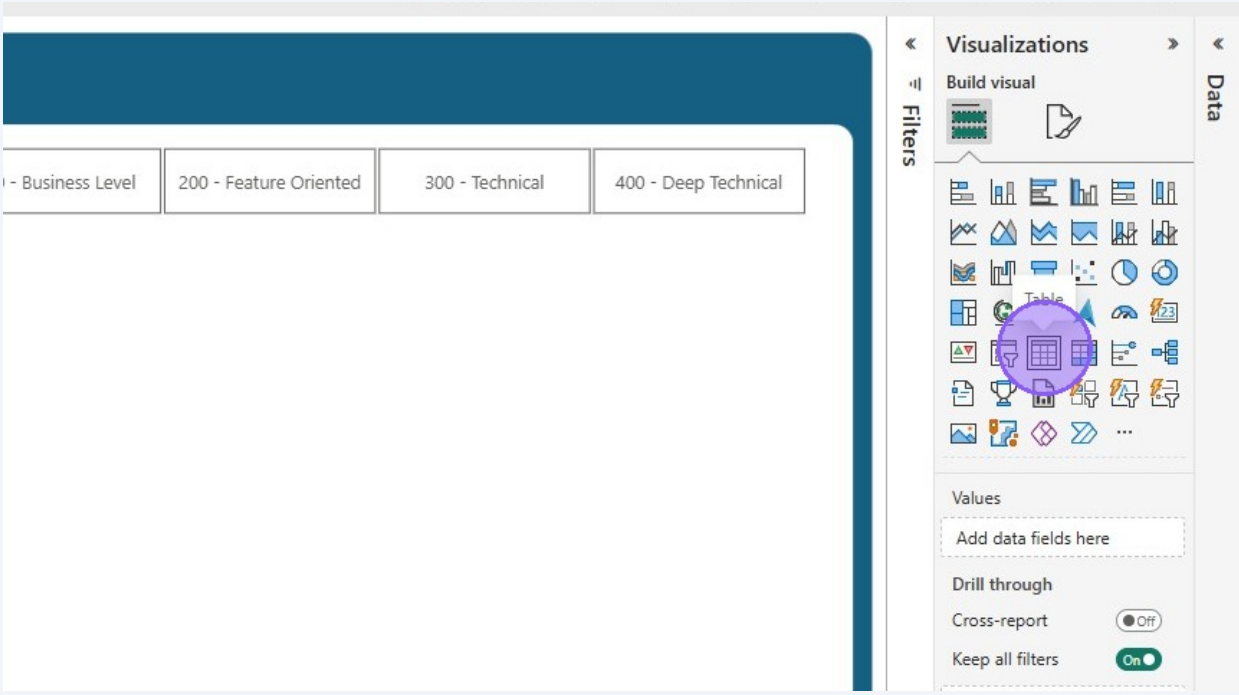
11 Your Level slicer is ready.

Play with the Selection settings of the slicer to enable Single select or Multi Select or to add a Select All option.

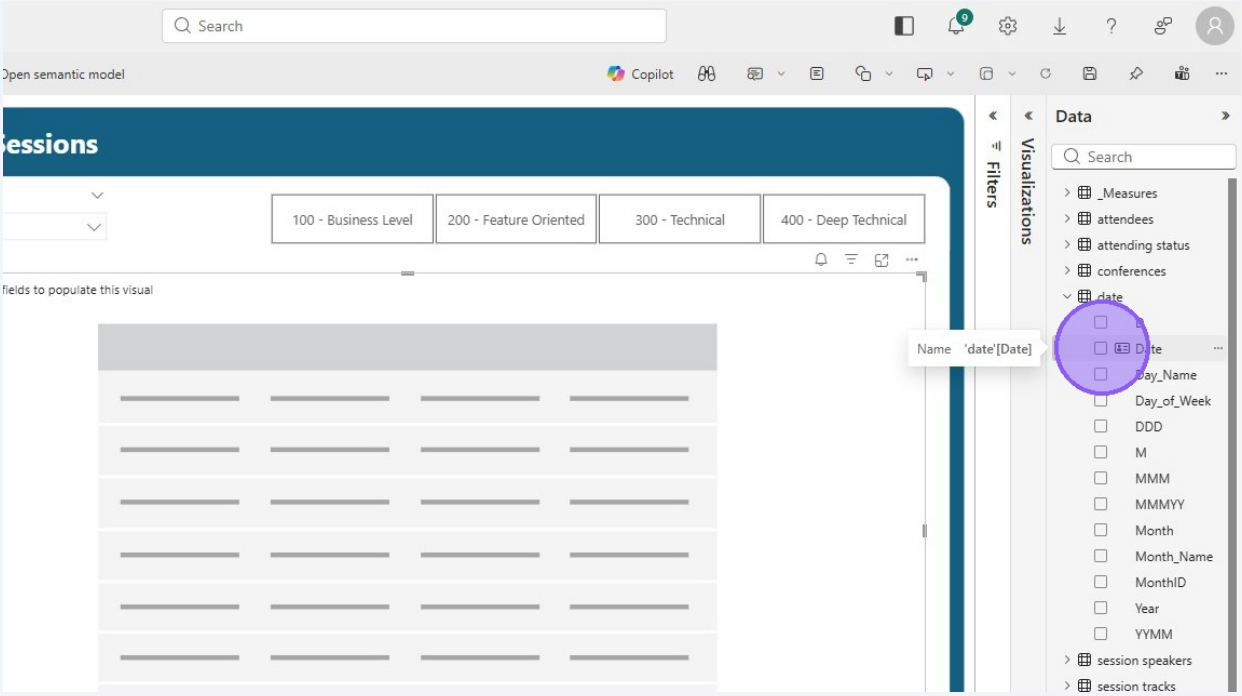


Sessions Table

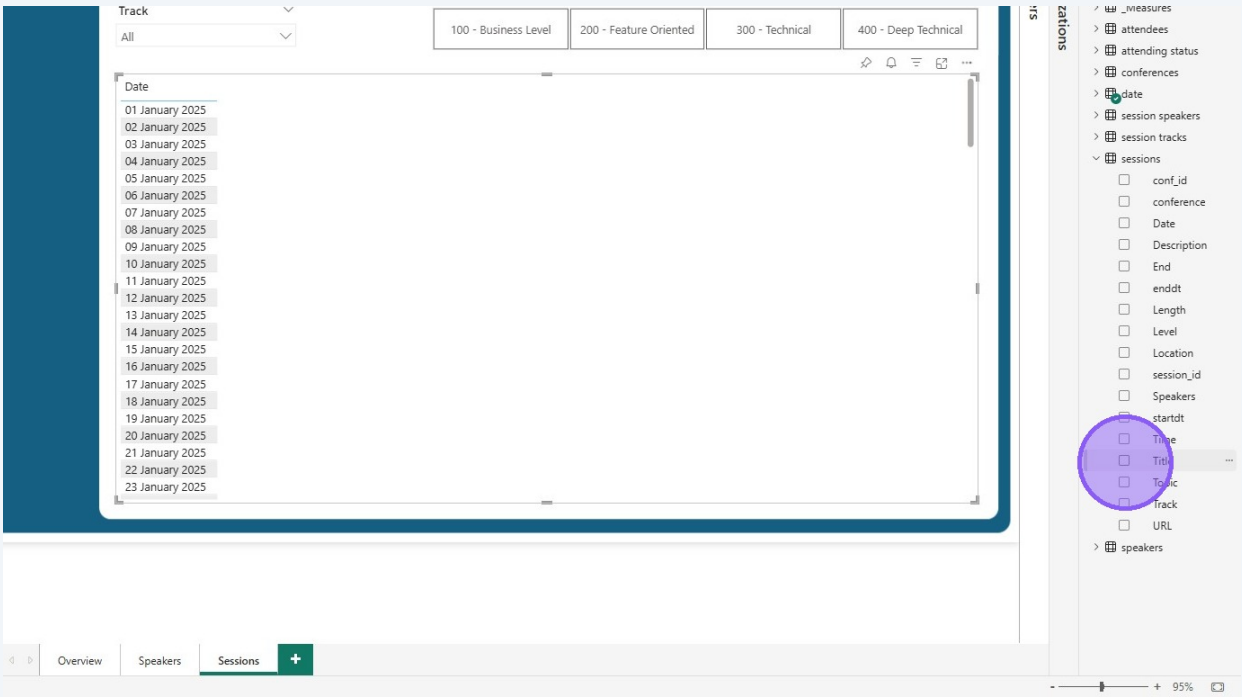
12 Select the Table Visual



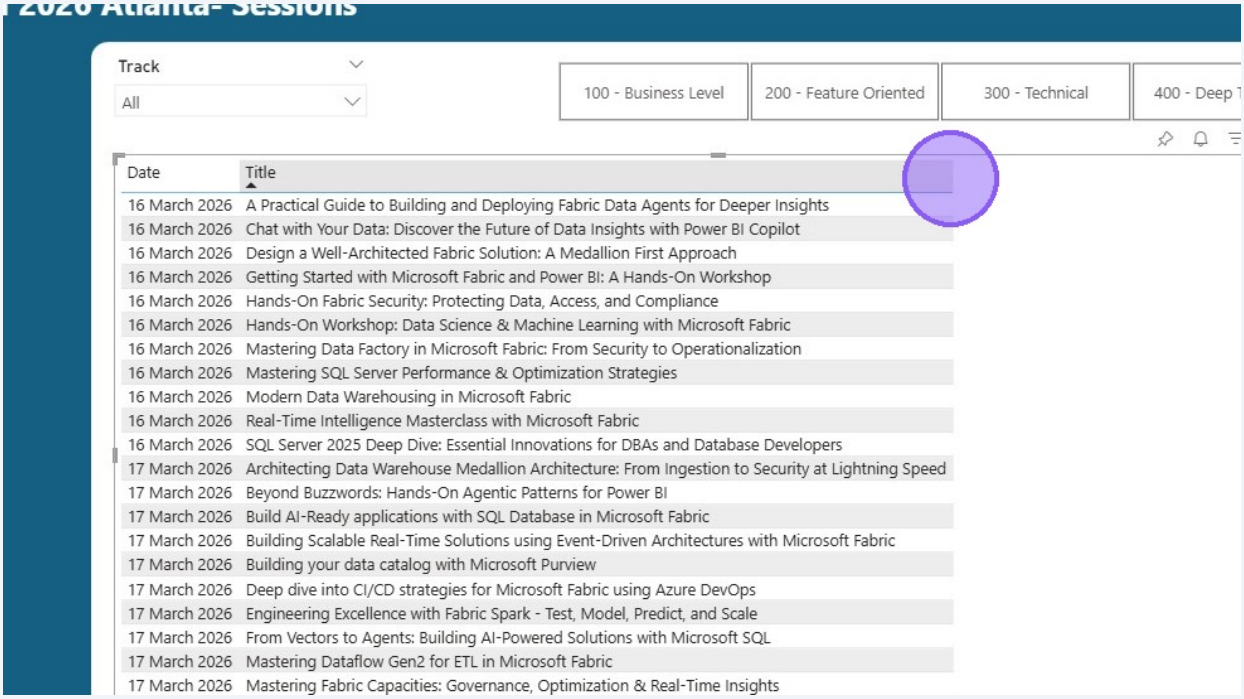
13 From the Date table, add in the Date field



14 From the sessions table, add Title.

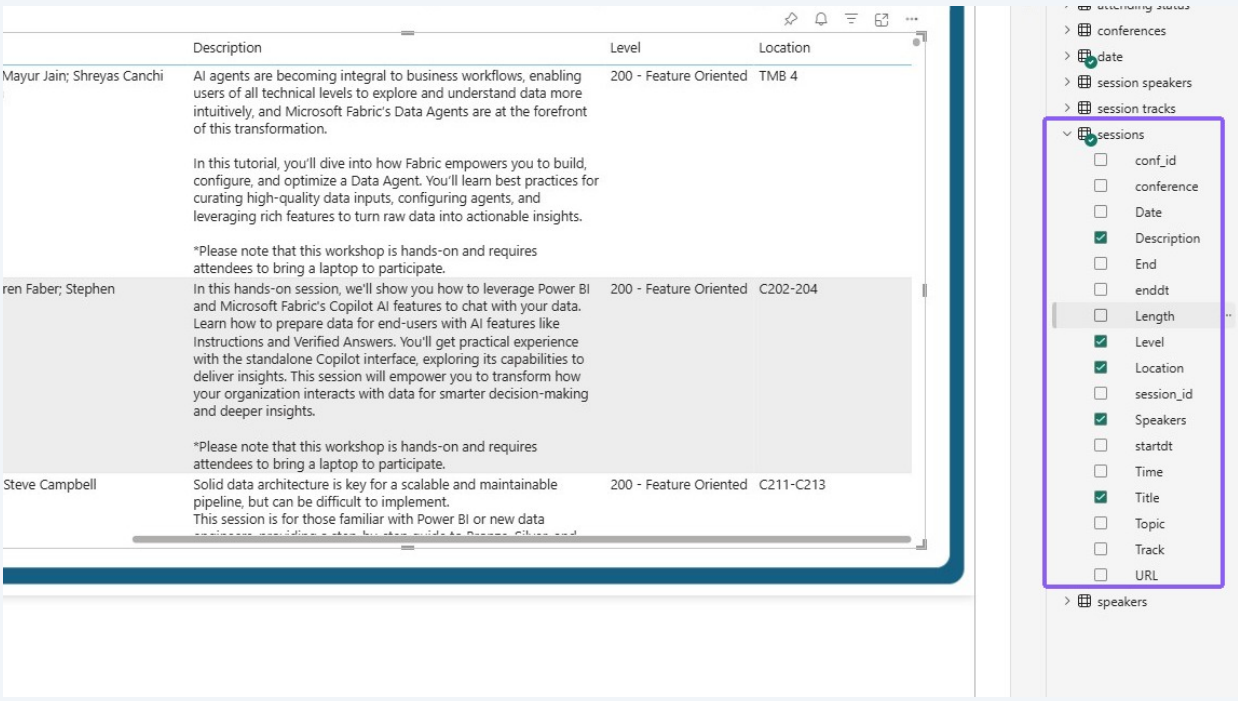


15 Resize the column width by dragging the end of the column



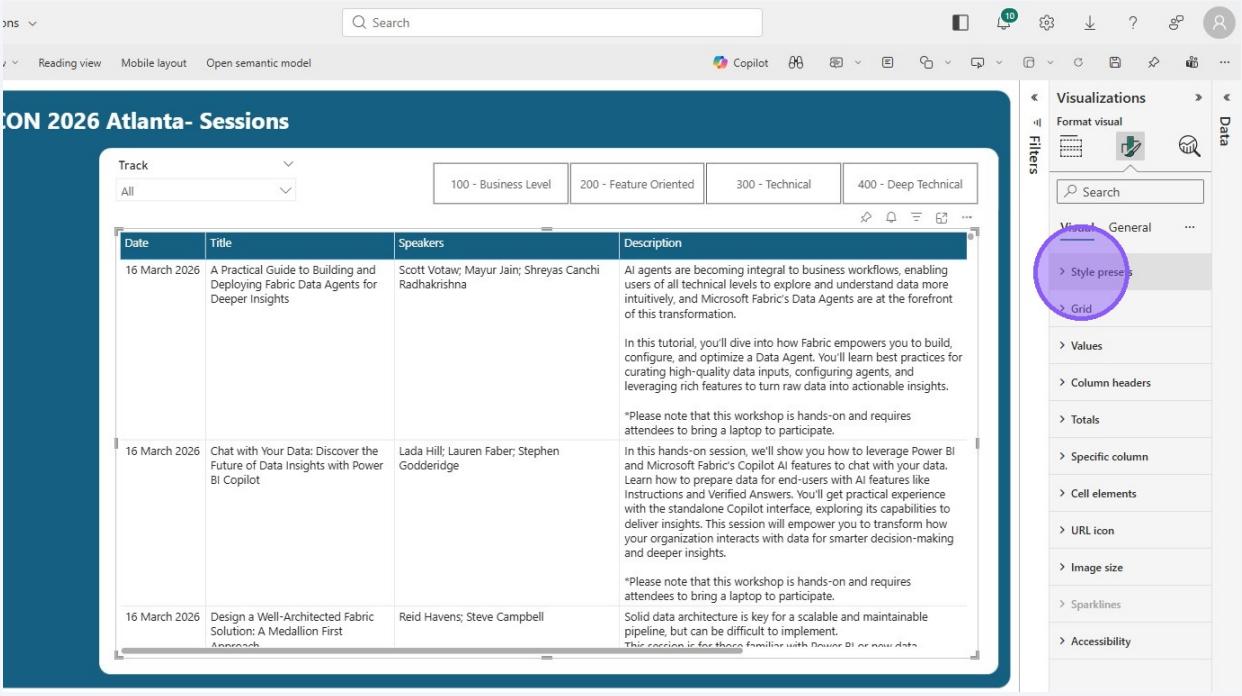
16 Similarly select all the required columns and adjust the column widths.

Columns needed from the sessions table:
Title, Speakers, Description, Level, Location, Length

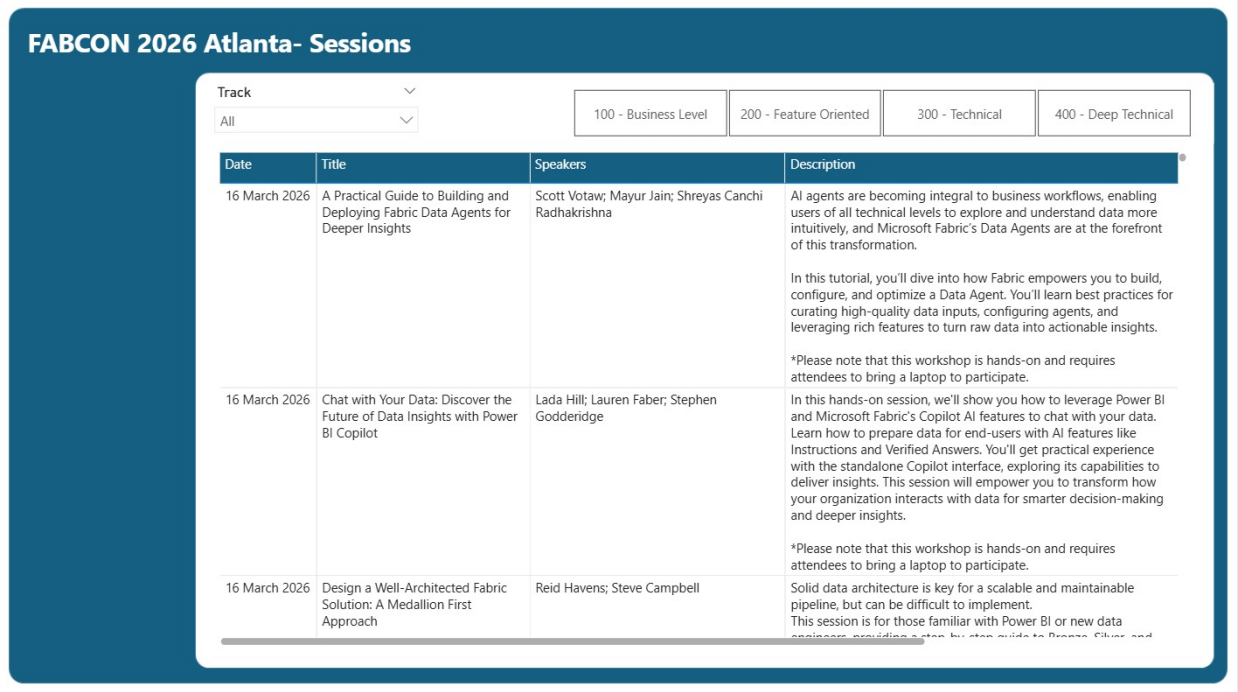


17 Time to format! Use the same formatting techniques from the Speakers page or format it according to you.

Basic set-up:
Style presets -> Bold Header
Grid -> ON Vertical Grid
Column Header -: Change color to #156082
Totals -> Switch OFF



18 All visuals on Page 3 is ready.



Date	Title	Speakers	Description
16 March 2026	A Practical Guide to Building and Deploying Fabric Data Agents for Deeper Insights	Scott Votaw; Mayur Jain; Shreyas Canchi Radhakrishna	AI agents are becoming integral to business workflows, enabling users of all technical levels to explore and understand data more intuitively, and Microsoft Fabric's Data Agents are at the forefront of this transformation. In this tutorial, you'll dive into how Fabric empowers you to build, configure, and optimize a Data Agent. You'll learn best practices for curating high-quality data inputs, configuring agents, and leveraging rich features to turn raw data into actionable insights. *Please note that this workshop is hands-on and requires attendees to bring a laptop to participate.
16 March 2026	Chat with Your Data: Discover the Future of Data Insights with Power BI Copilot	Lada Hill; Lauren Faber; Stephen Godderidge	In this hands-on session, we'll show you how to leverage Power BI and Microsoft Fabric's Copilot AI features to chat with your data. Learn how to prepare data for end-users with AI features like Instructions and Verified Answers. You'll get practical experience with the standalone Copilot interface, exploring its capabilities to deliver insights. This session will empower you to transform how your organization interacts with data for smarter decision-making and deeper insights. *Please note that this workshop is hands-on and requires attendees to bring a laptop to participate.
16 March 2026	Design a Well-Architected Fabric Solution: A Medallion First Approach	Reid Havens; Steve Campbell	Solid data architecture is key for a scalable and maintainable pipeline, but can be difficult to implement. This session is for those familiar with Power BI or new data
