

5c. Page 1: Overview

KPI Block using Card Visual

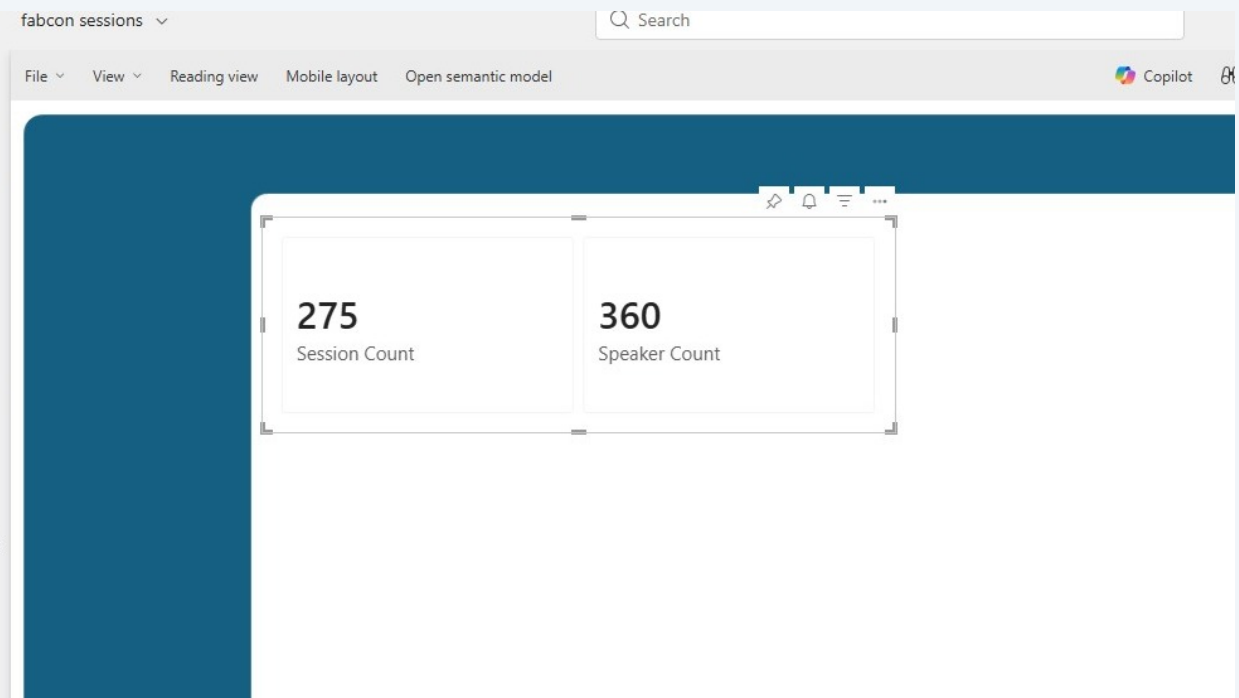

- 1 Select the **Card Visual** from the visualizations pane

2 Select **Session Count** and **Speaker Count** from the _Measures Table

3 Click this button.

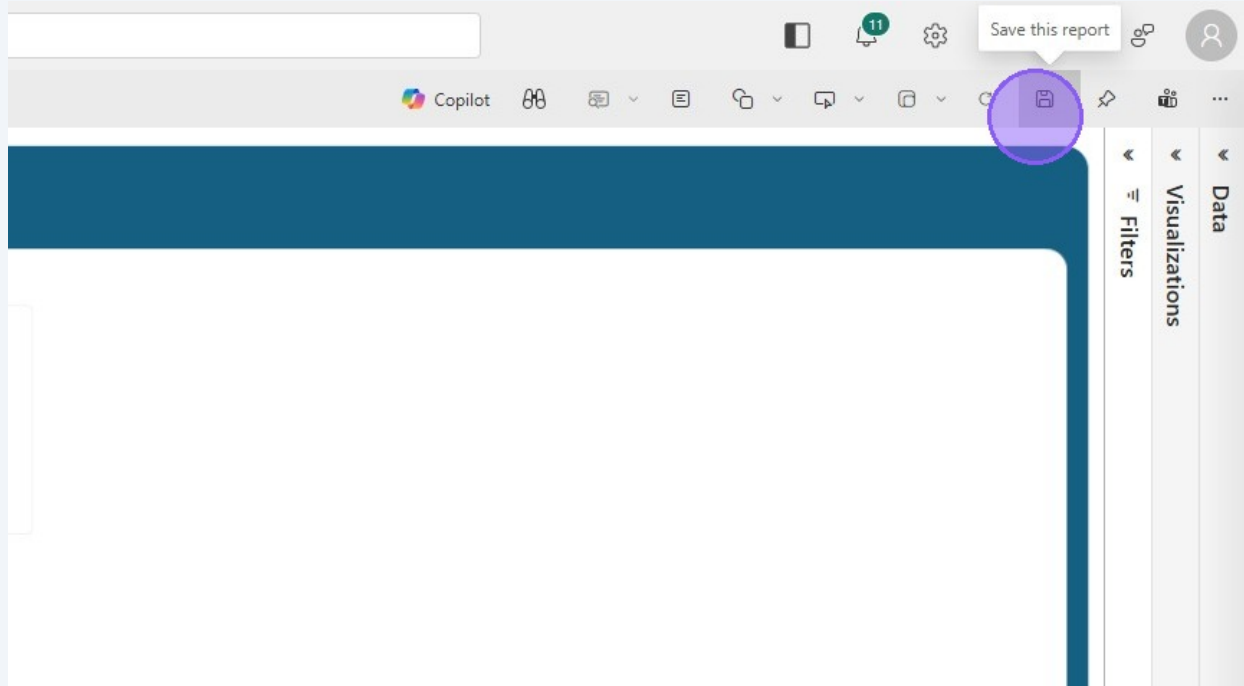

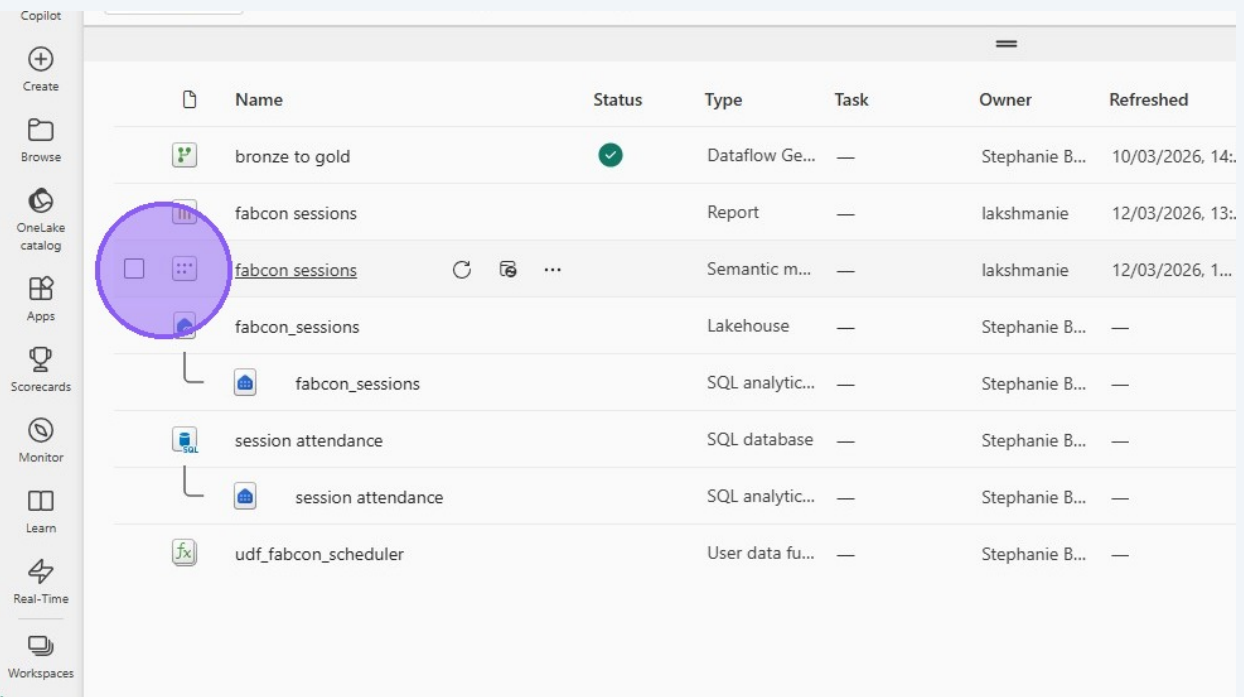

Suddenly realized that we need one more measure "Track Count". Let's learn how to add measures into your semantic model now.

4

Save the report

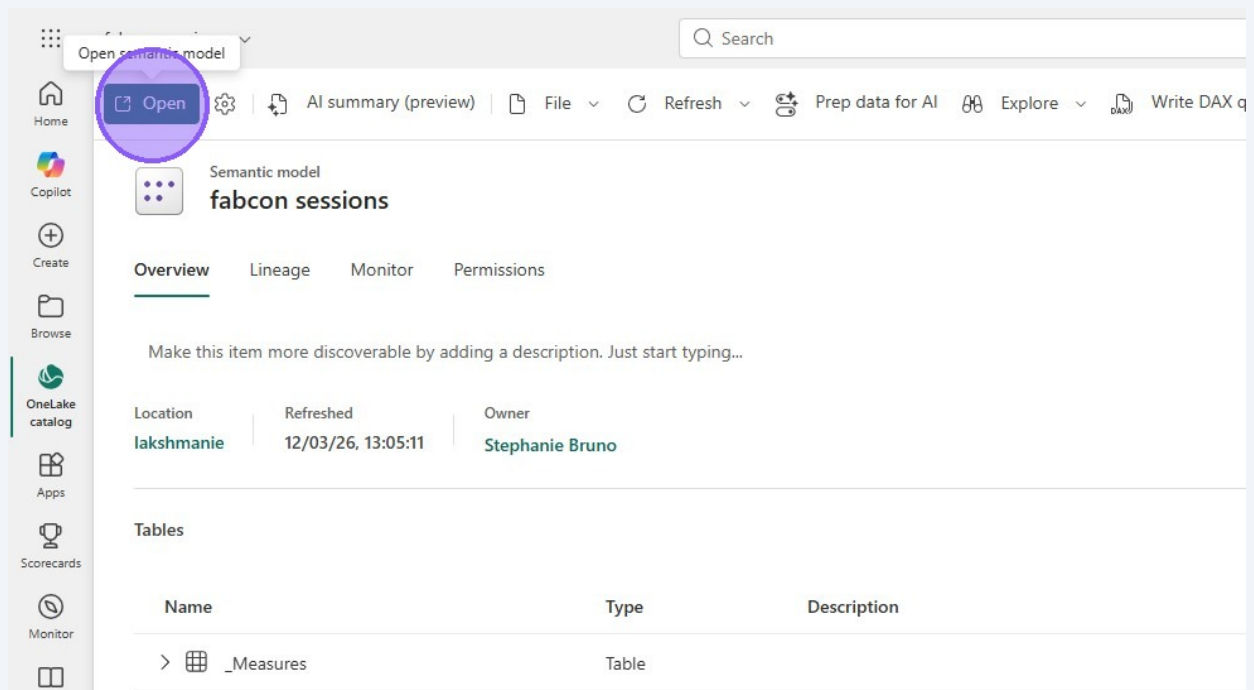

5 Go back to your workspace. Select "**fabcon sessions**" semantic model

The screenshot shows the Microsoft Fabric workspace interface. On the left is a sidebar with navigation icons for Create, Browse, OneLake catalog, Apps, Scorecards, Monitor, Learn, Real-Time, and Workspaces. The main area displays a table of items:

Name	Status	Type	Task	Owner	Refreshed
bronze to gold	✓	Dataflow Ge...	—	Stephanie B...	10/03/2026, 14:..
fabcon sessions		Report	—	lakshmanie	12/03/2026, 13:..
<u>fabcon_sessions</u>	🔄 ⚙️ ...	Semantic m...	—	lakshmanie	12/03/2026, 1...
fabcon_sessions		Lakehouse	—	Stephanie B...	—
fabcon_sessions		SQL analytic...	—	Stephanie B...	—
session attendance		SQL database	—	Stephanie B...	—
session attendance		SQL analytic...	—	Stephanie B...	—
udf_fabcon_scheduler		User data fu...	—	Stephanie B...	—

6 Click "Open"

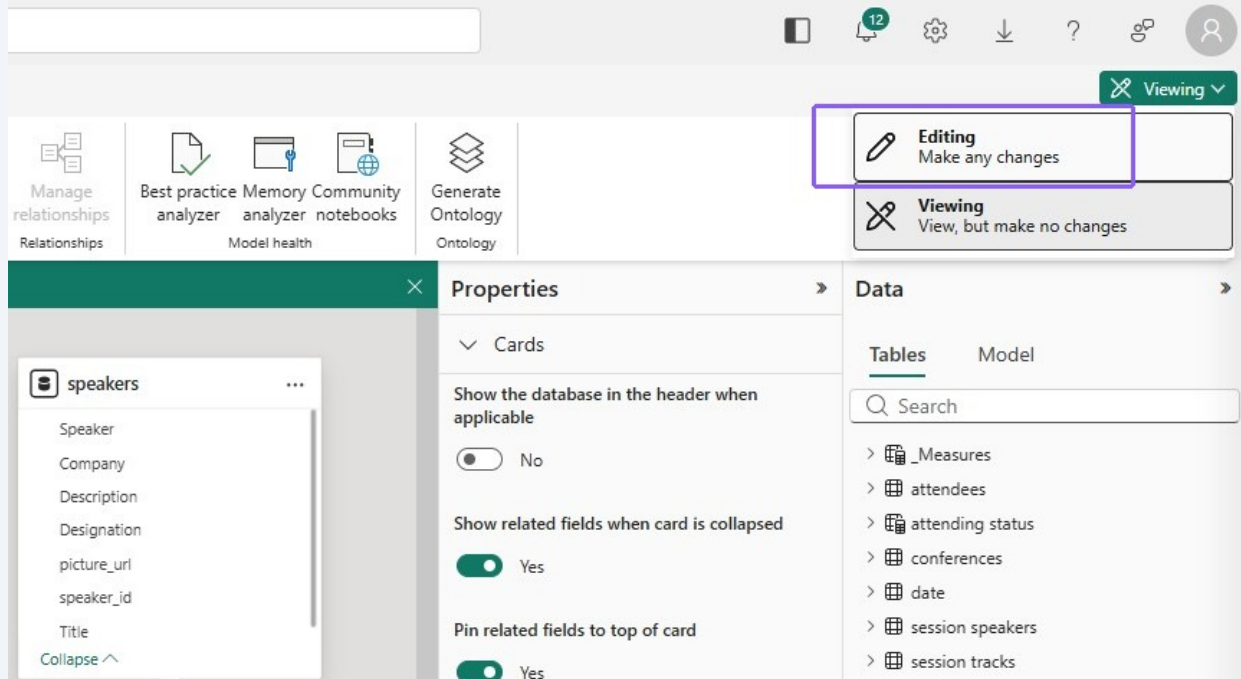

The screenshot shows the details page for the 'fabcon sessions' semantic model. The 'Open' button in the top left is highlighted with a purple circle. The page includes a search bar, a dropdown menu, and a toolbar with icons for AI summary, file, refresh, and data preparation. The main content area shows the model's overview, including its location, refresh date, and owner. Below this is a section for tables, showing a table named '_Measures'.

Name	Type	Description
> 📊 _Measures	Table	

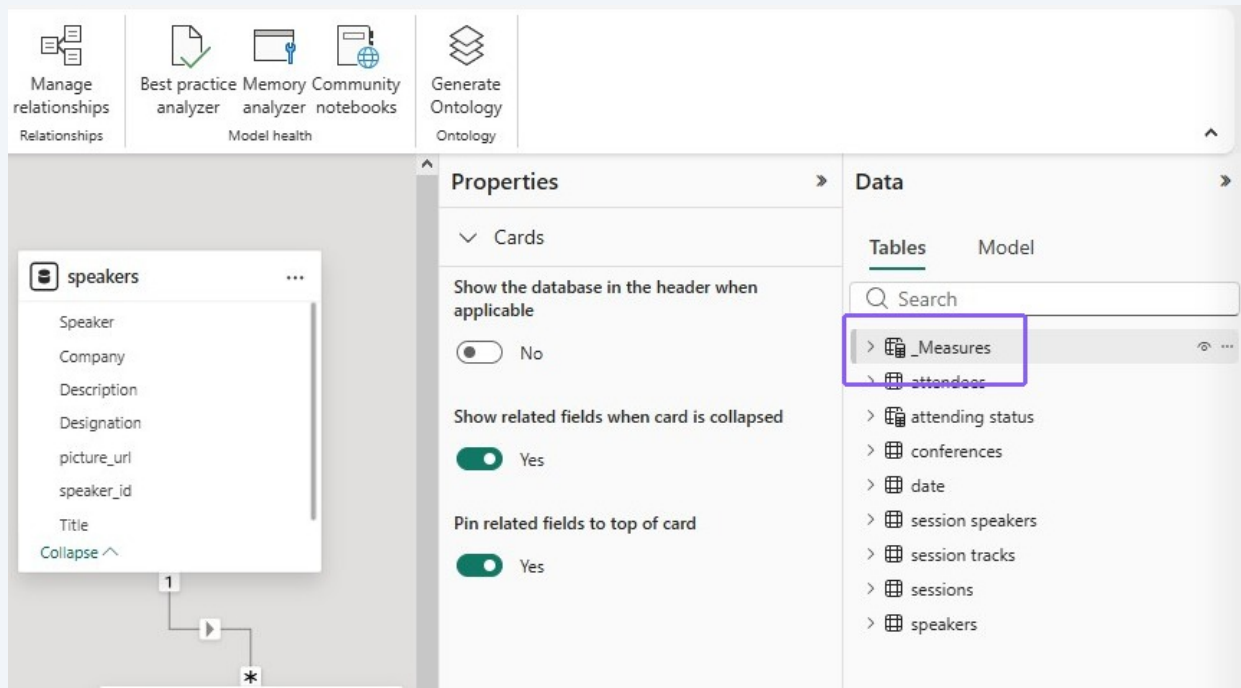

7

On the top right, you will see a button that says Viewing. Click the button and then select **Editing**. (You are entering the edit mode to add the new measure "Track Count")

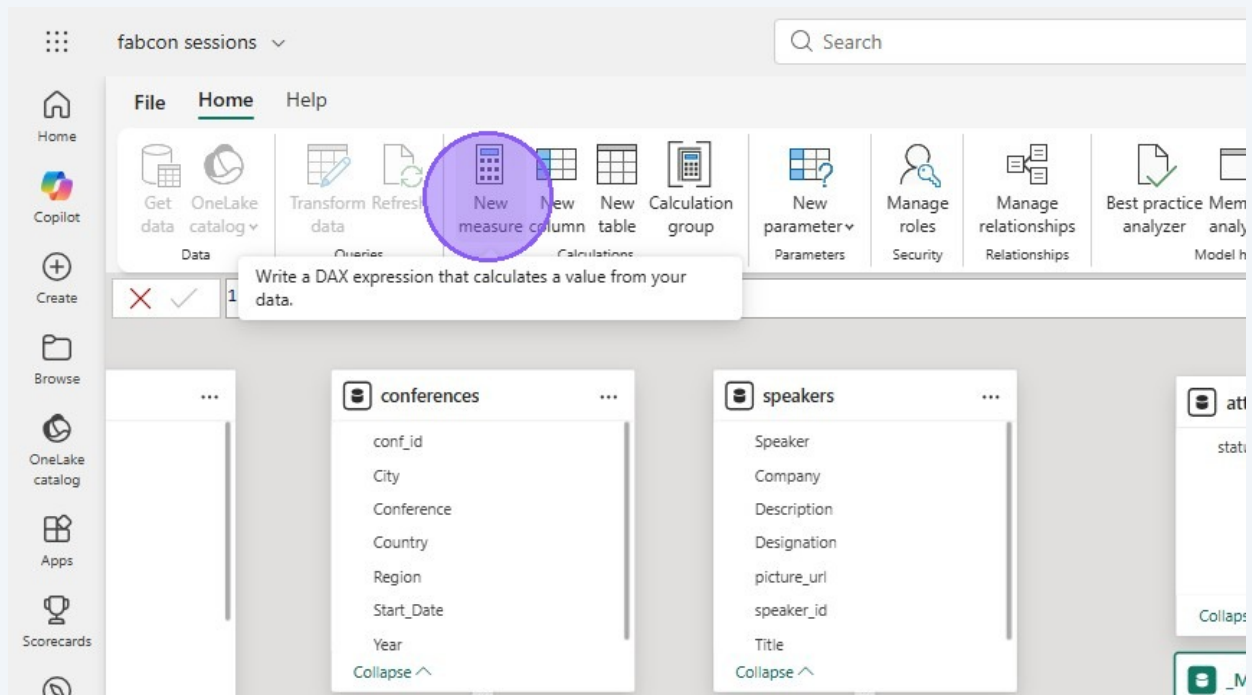

8

Click "_Measures" table

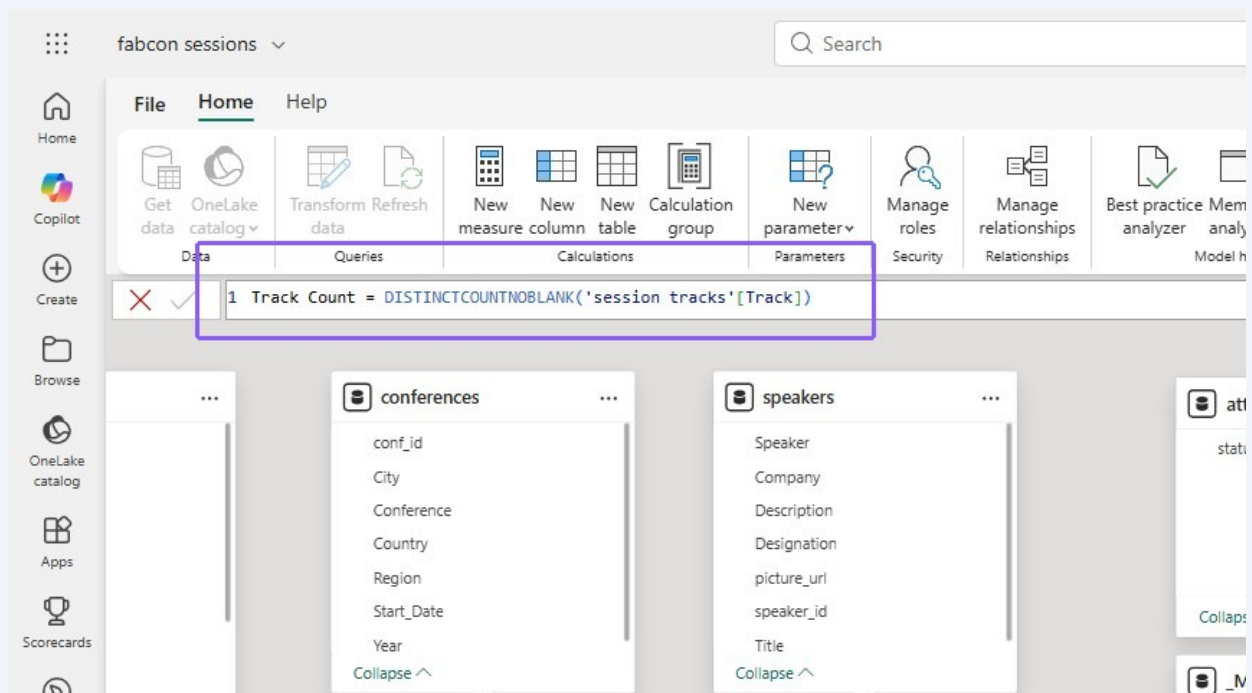

9

Under Home tab, select **New Measure**. (We clicked the Measures table before this step because we want to add the new measure into the _Measures Table)

10

Copy paste this into the formula bar

11 Go back to your workspace

The screenshot shows the Power BI workspace 'lakshmanie' (Lakshmi and Stephanie's shared workspace). The left sidebar contains navigation icons for Home, Copilot, Create, Browse, OneLake catalog, Apps, Scorecards, Monitor, Learn, and Workspaces. The top bar includes a search bar and buttons for 'New item', 'New folder', 'Import', and 'Migrate'. The main area displays a table of workspace items.

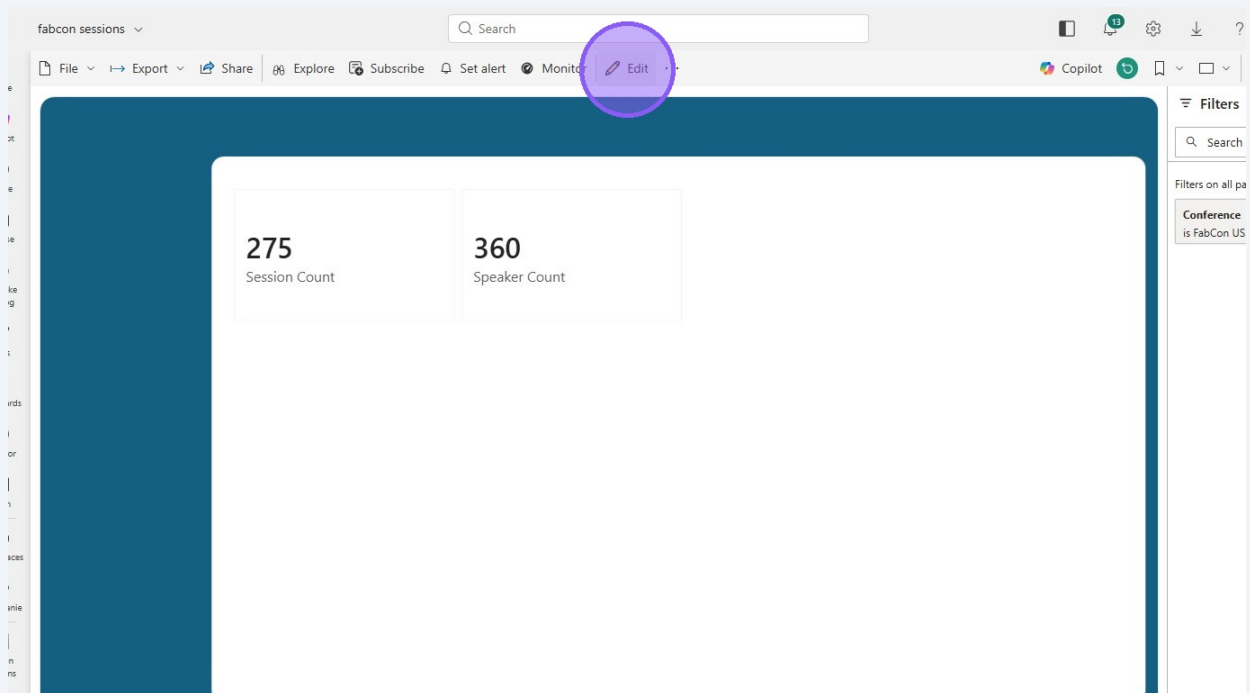

Name	Status	Type	Task	Owner	Refreshed	Next refresh	En
bronze to gold	✓	Dataflow Ge...	—	Stephanie B...	10/03/2026, 14:...	—	—
fabcon sessions		Report	—	lakshmanie	12/03/2026, 13:...	—	—
fabcon sessions		Semantic m...	—	lakshmanie	12/03/2026, 1...	N/A	—
fabcon_sessions		Lakehouse	—	Stephanie B...	—	—	—
fabcon_sessions		SQL analytic...	—	Stephanie B...	—	—	—
session attendance		SQL database	—	Stephanie B...	—	—	—
session attendance		SQL analytic...	—	Stephanie B...	—	—	—
udf_fabcon_scheduler		User data fu...	—	Stephanie B...	—	—	—

12 Click your report "fabcon sessions"

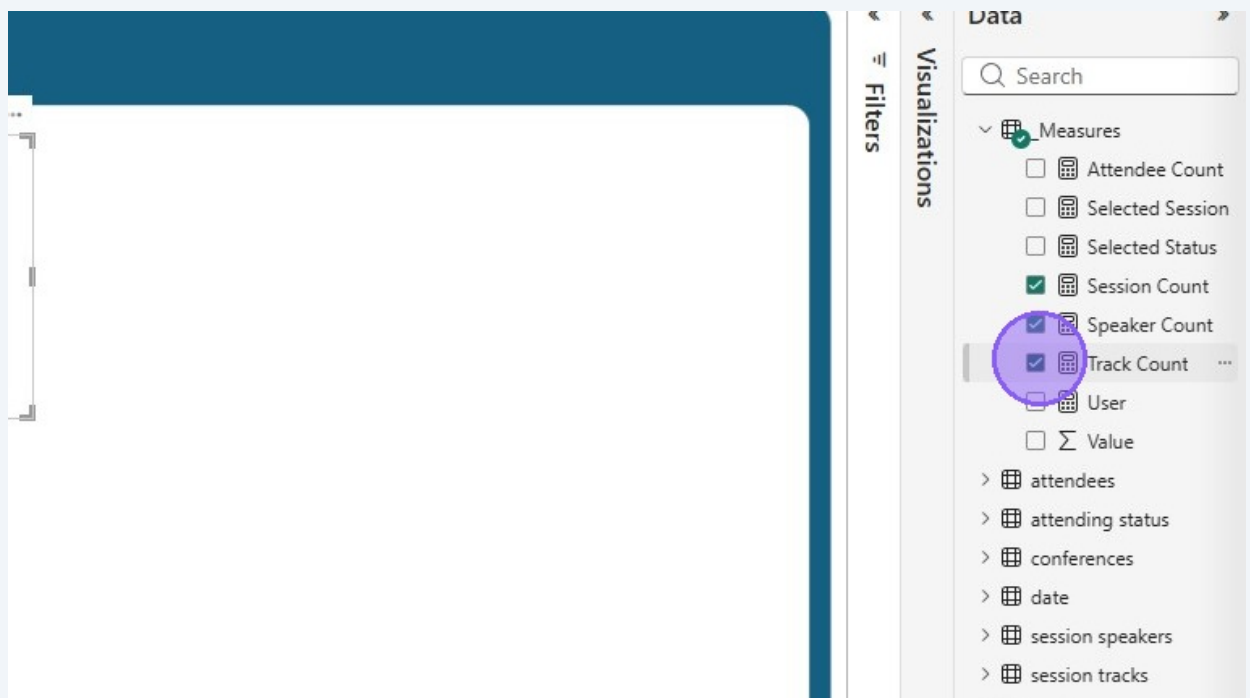

The screenshot shows the same Power BI workspace 'lakshmanie'. The 'fabcon sessions' report is highlighted with a purple box. The table below shows the items in the workspace.

Name	Status	Type	Task	Owner
bronze to gold	✓	Dataflow Ge...	—	Stephanie B..
fabcon sessions		Report	—	lakshmanie
fabcon sessions		Semantic m...	—	lakshmanie
fabcon_sessions		Lakehouse	—	Stephanie B..
fabcon_sessions		SQL analytic...	—	Stephanie B..
session attendance		SQL database	—	Stephanie B..
session attendance		SQL analytic...	—	Stephanie B..

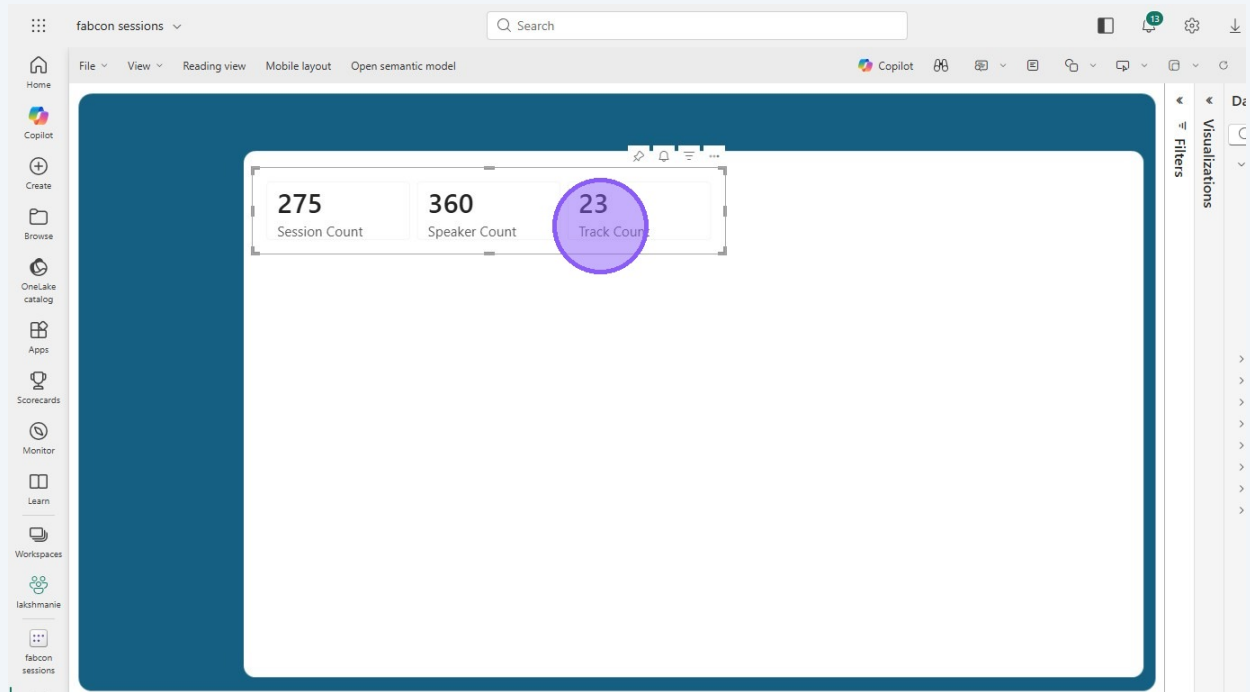

13 Click "Edit"

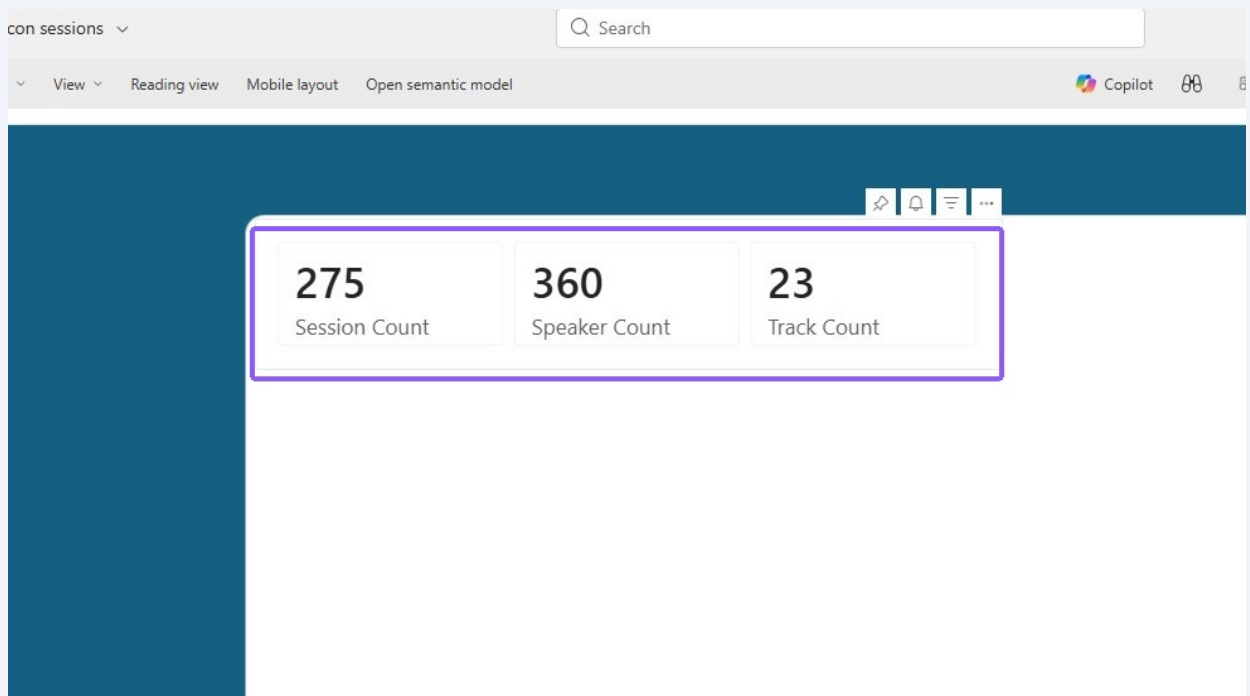

14 Select the newly added measure "Track Count" from the _Measures table

15 Now you will see 3 KPI's in the KPI Block

16 Select the card visual

17 In the Visualization pane, head to Visual Tab. And expand **Callout**

18 Click "Session Count" under Cards

19 Enable Image option. Under Image Type, choose "Enter URL"

20 Under Image URL, Paste this <https://cdn-icons-png.flaticon.com/512/5231/5231551.png>

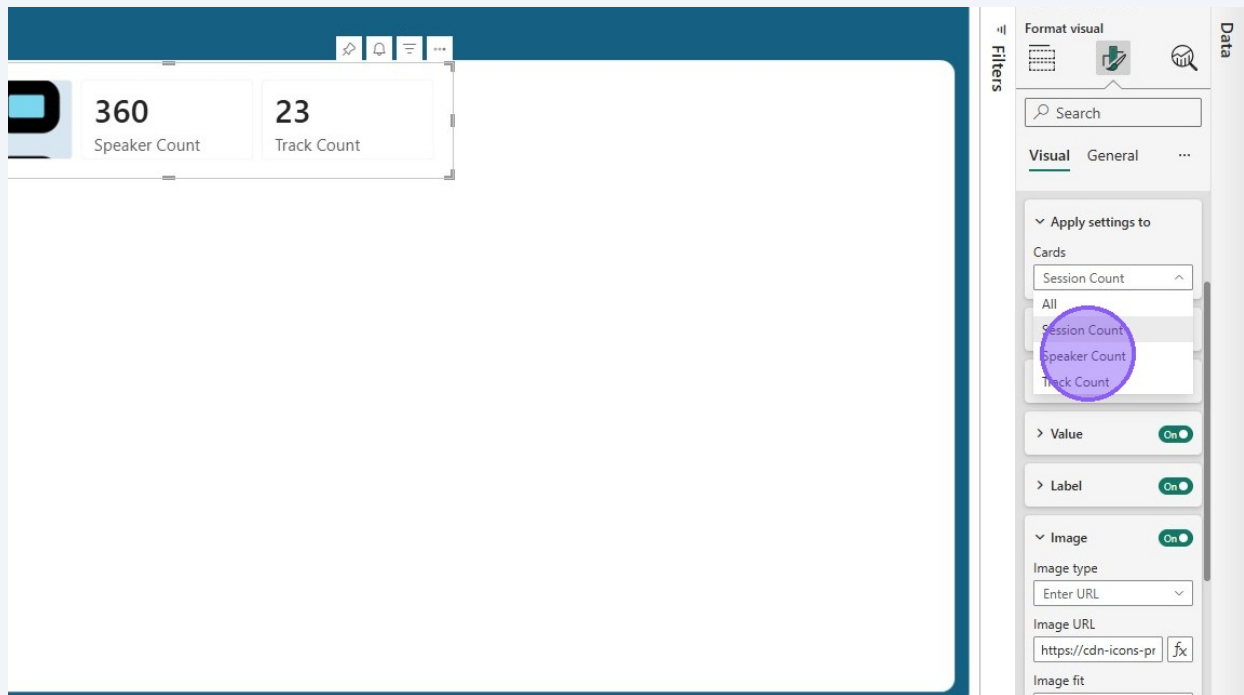

21

Repeat the above steps to add images to speaker count and track count as well. Here are the image URL's

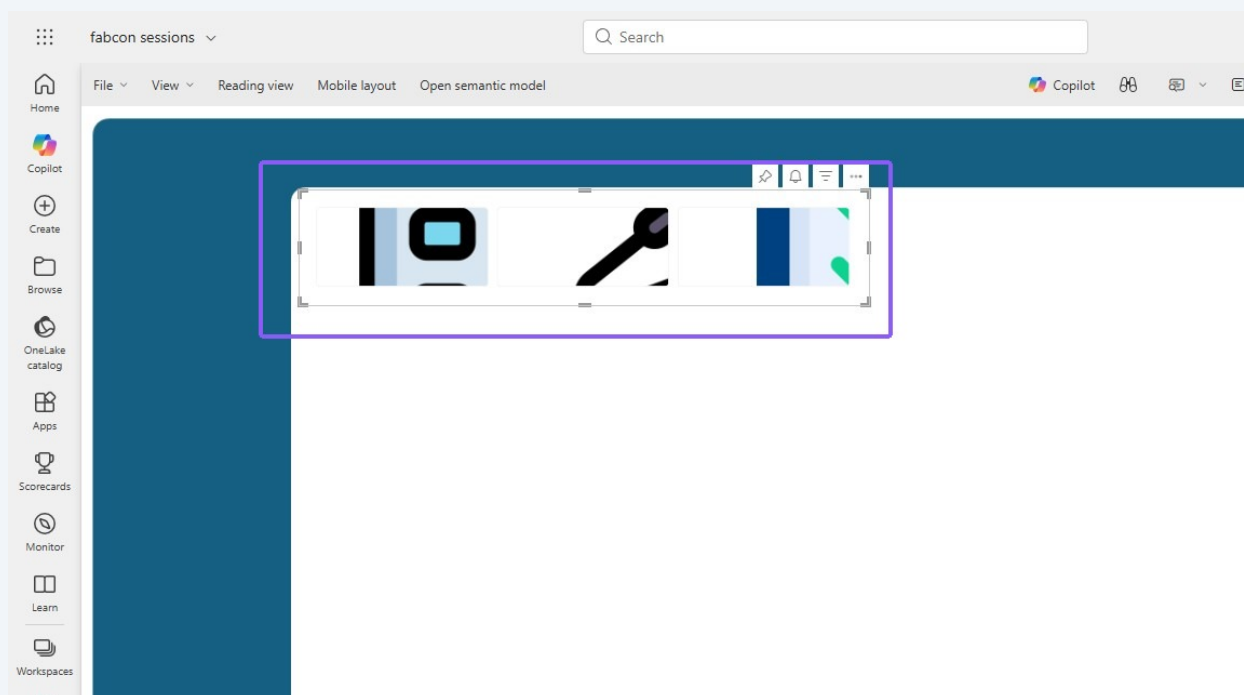

Speaker Count: <https://cdn-icons-png.flaticon.com/512/1534/1534098.png>

Track Count: <https://cdn-icons-png.flaticon.com/512/4901/4901662.png>

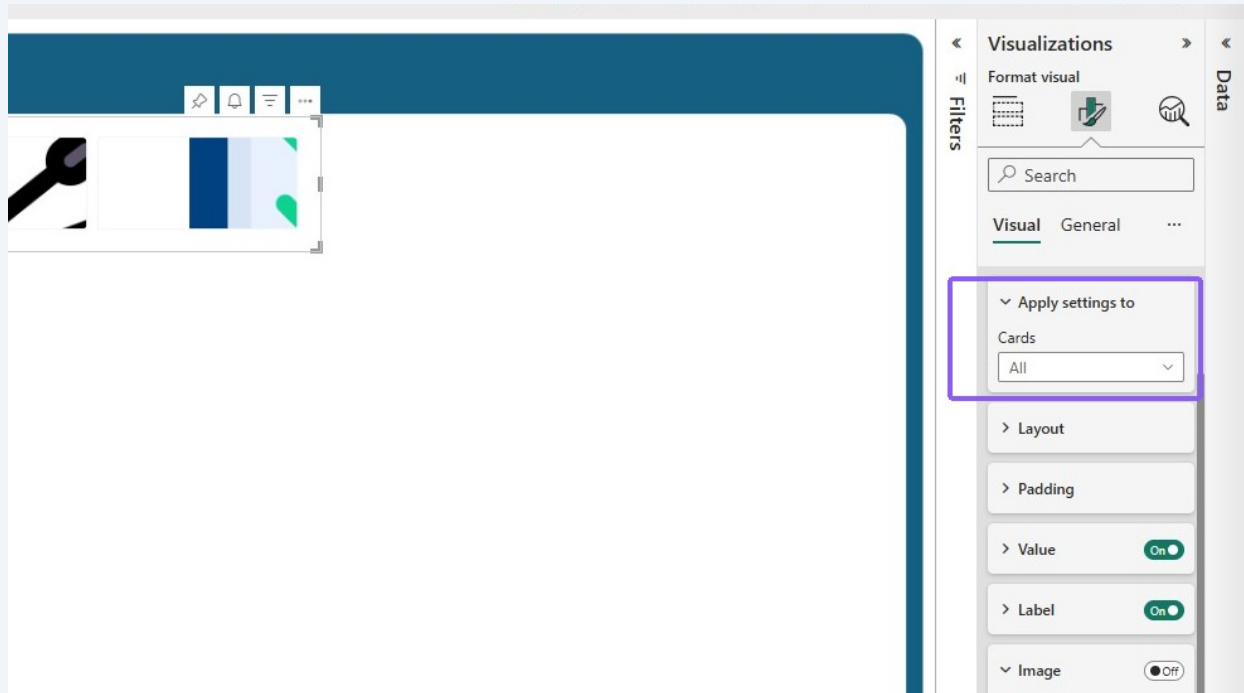

22

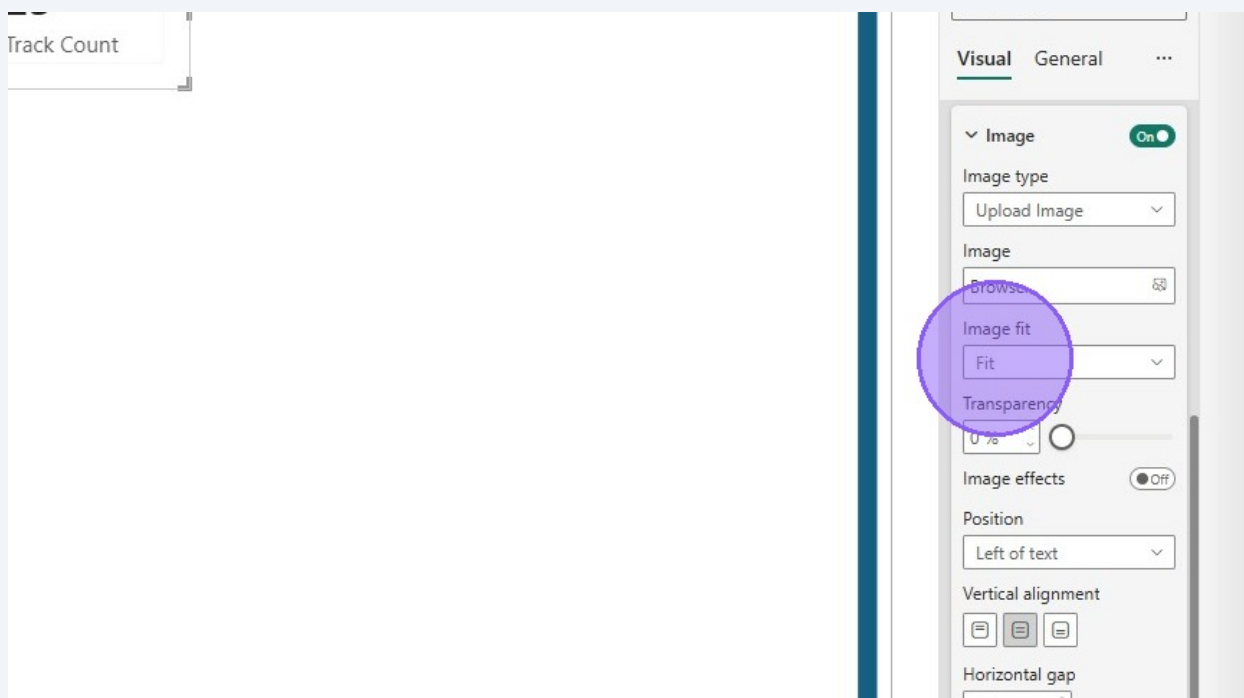

Once you insert image URL's for all the three counts. It should look like this.

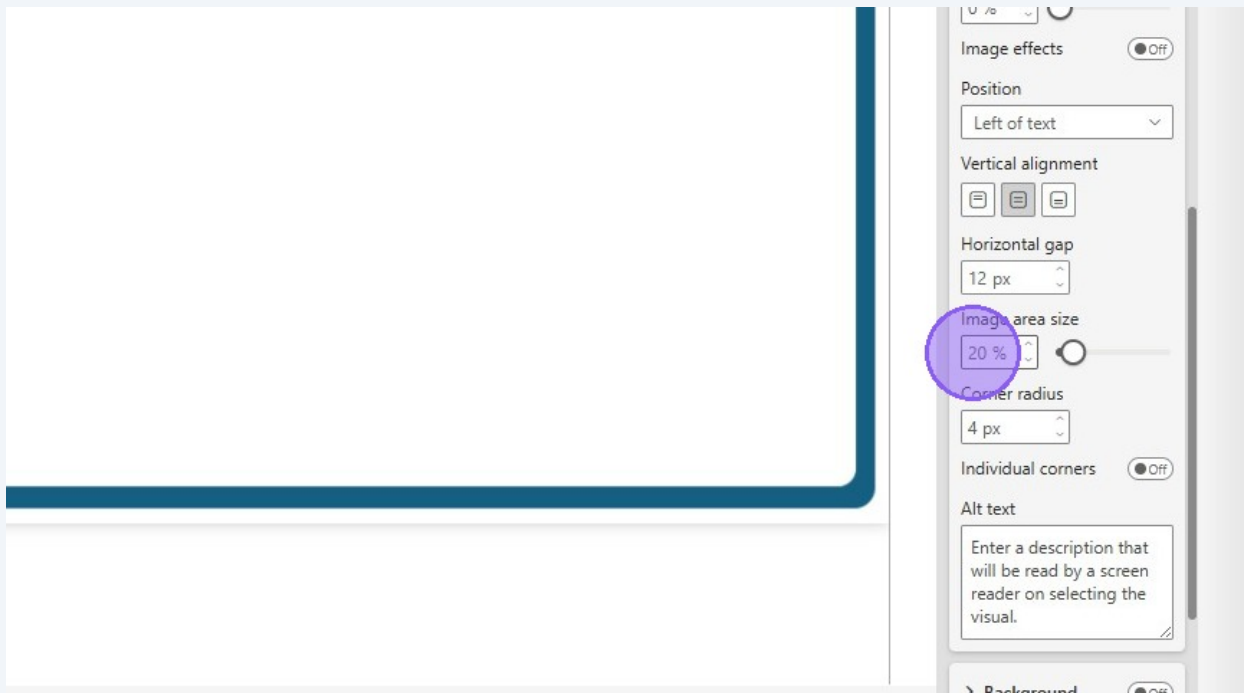

- 23 In order to fix the sizing of the images, Under Cards, select "All"

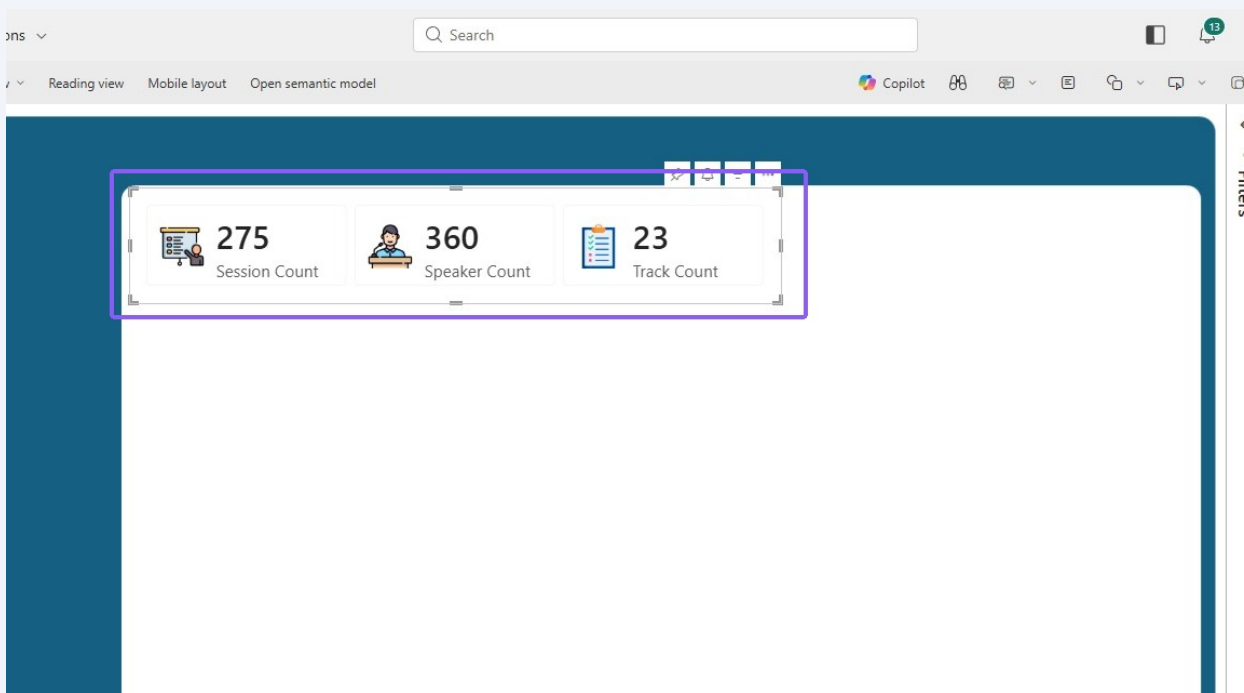

- 24 Enable Image. Choose Image fit as "Fit"

25 Select required size. (Suggestion: 20-30 % is a good size)

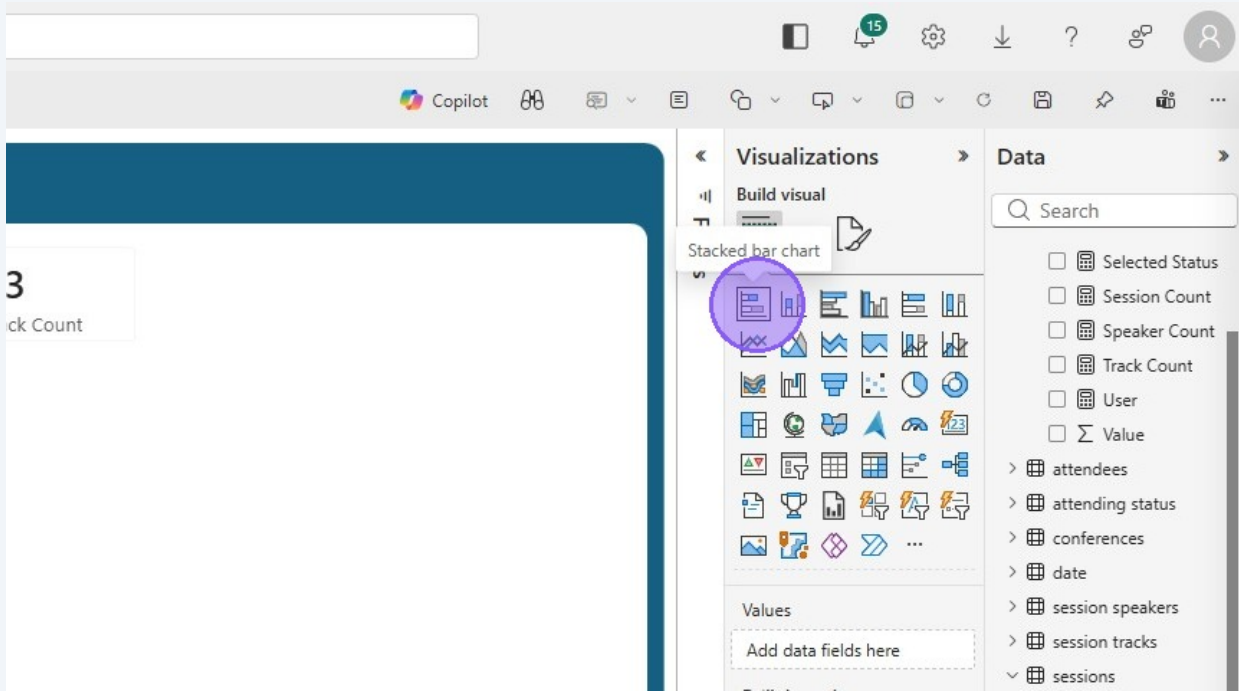

26 KPI Block with three measures is ready

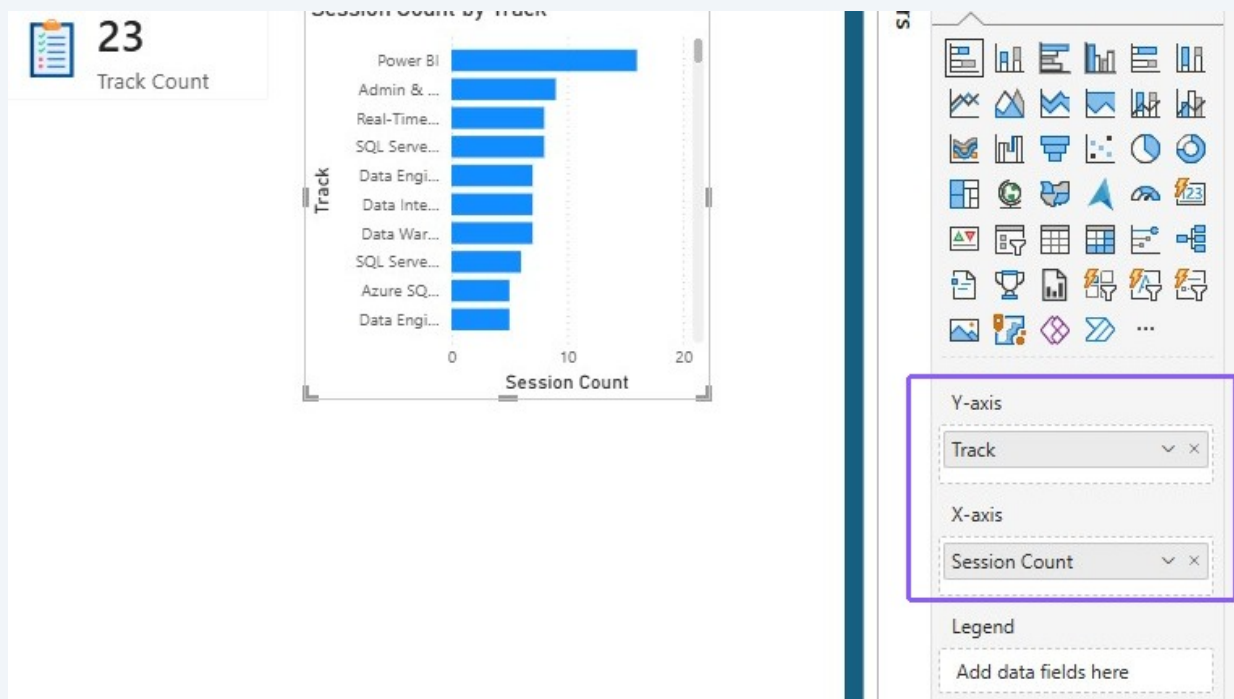

Session Count by Track Bar Chart

27 Select Stacked Bar Chart from the Visualization Pane

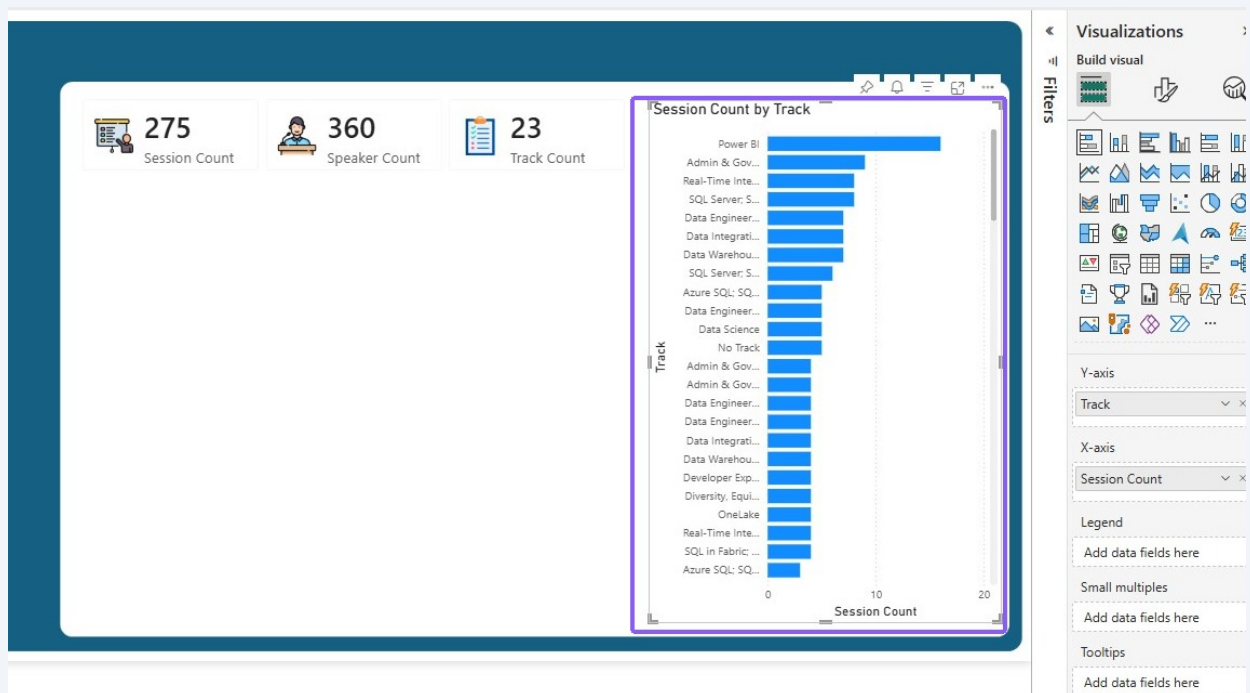

28

Drag and drop "Track" from the session tracks table into Y-axis. Then, drag and drop "Session Count" from the _Measures table into the X-axis bucket.

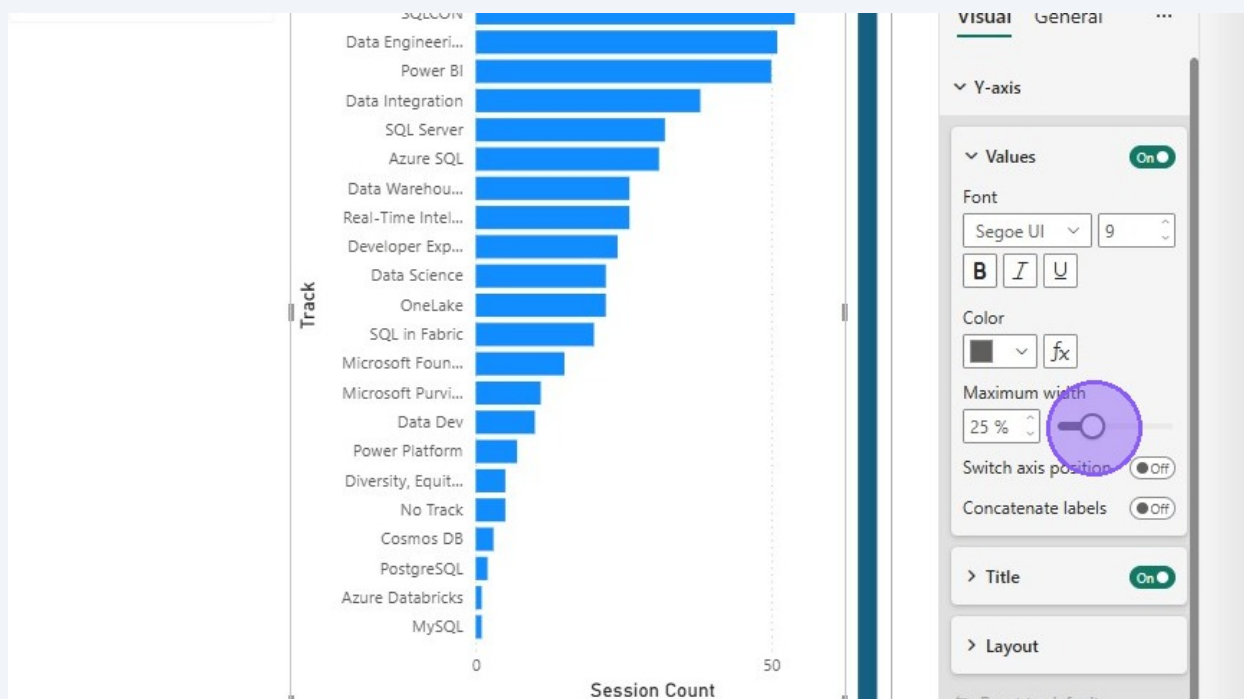

29

Increase the size to fit this way. Now, time to format it.

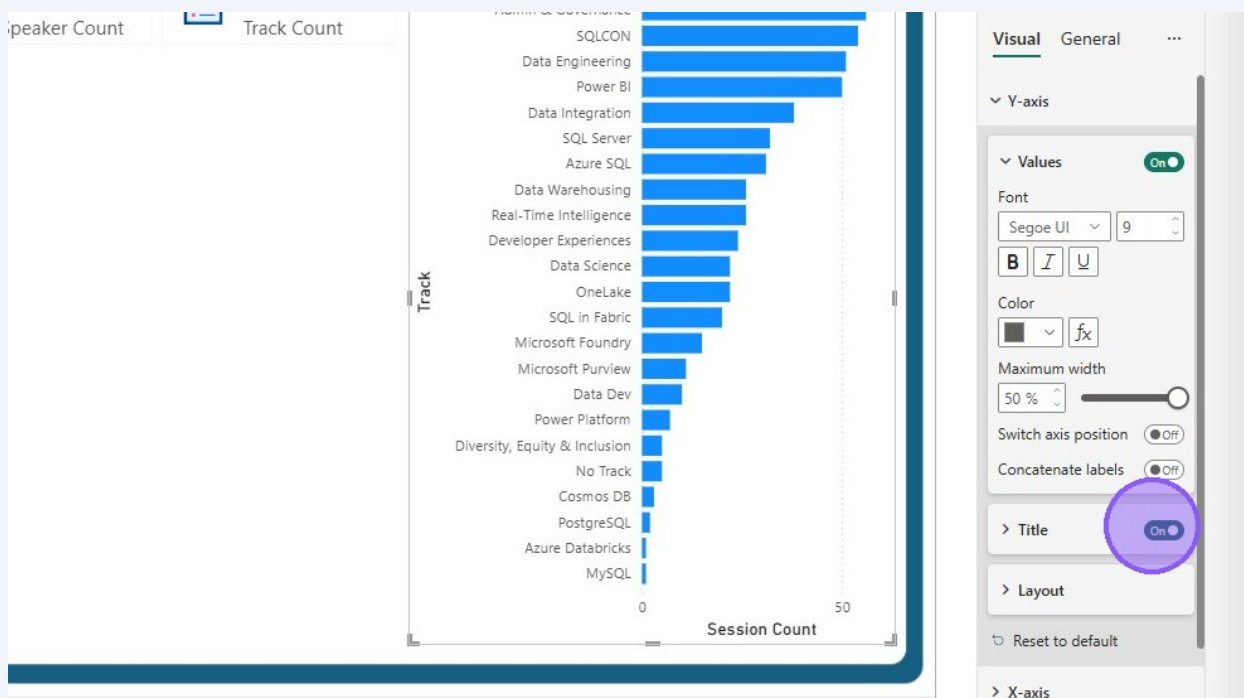

30

Under Y-Axis settings, increase the Maximum Width to 50%. You will note that the tracks now no longer have ...

31

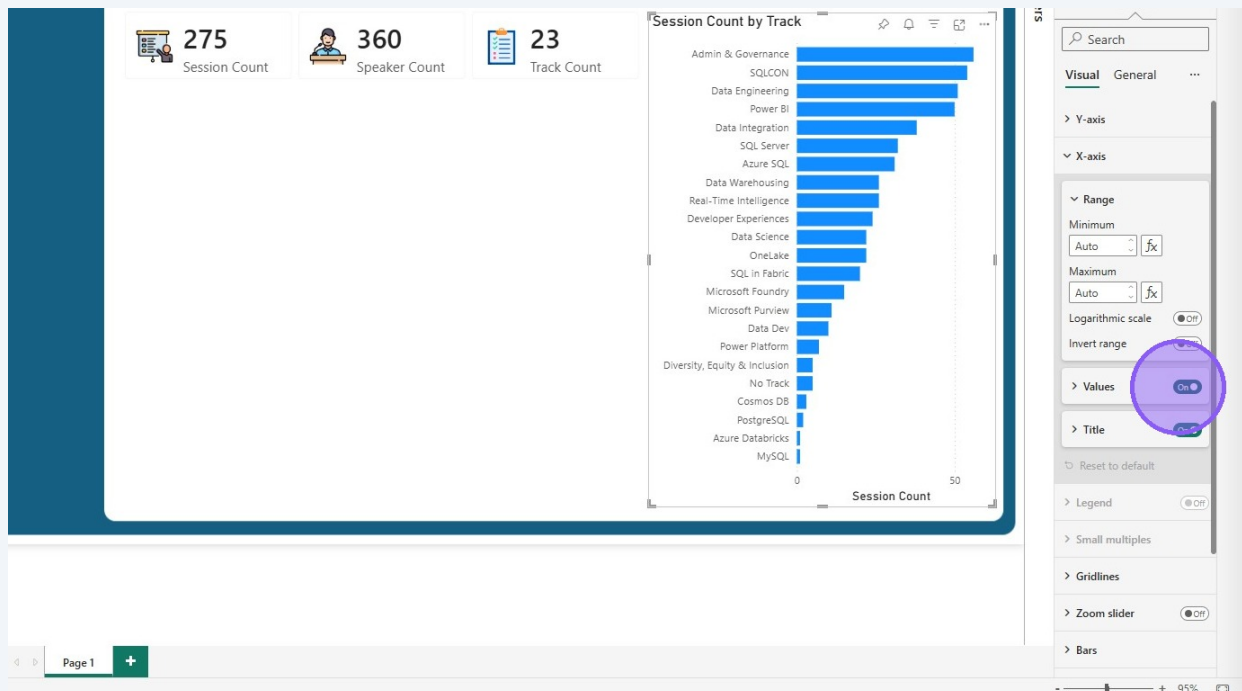

Switch off the Title under Y-axis

32

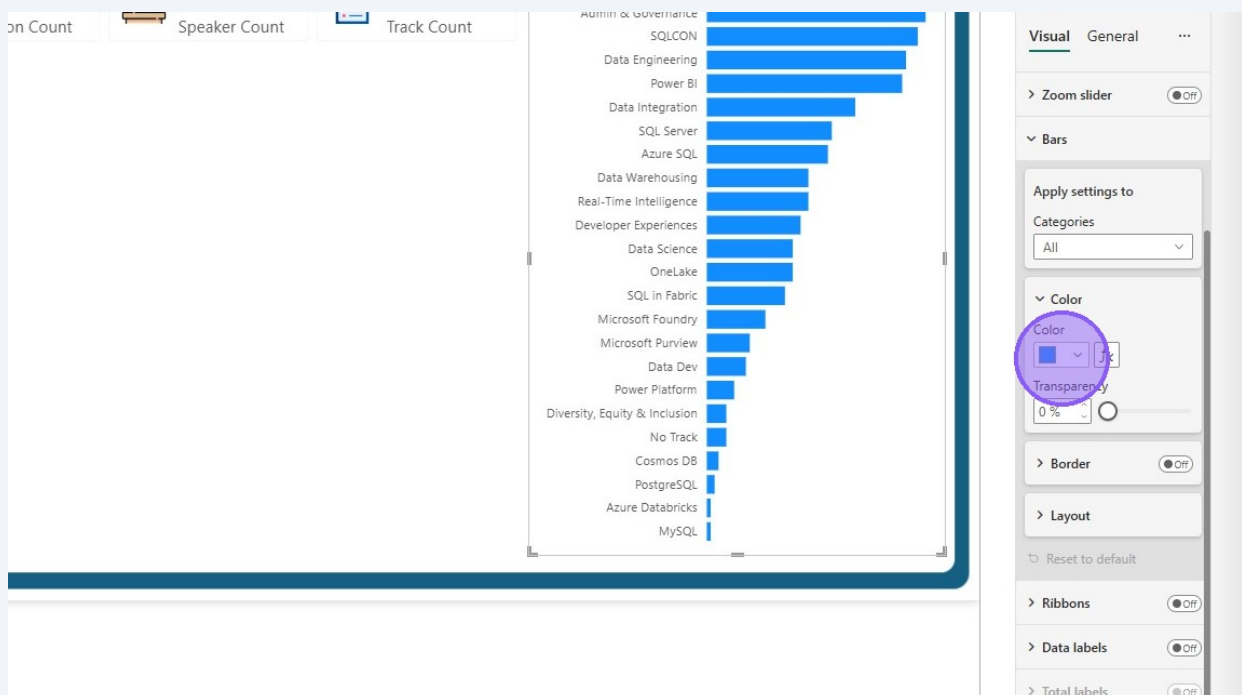

Under X-axis, switch off Values and Title.

(The reason: We are going to add exact values using Data Labels. Hence, the x-axis labels are not required)

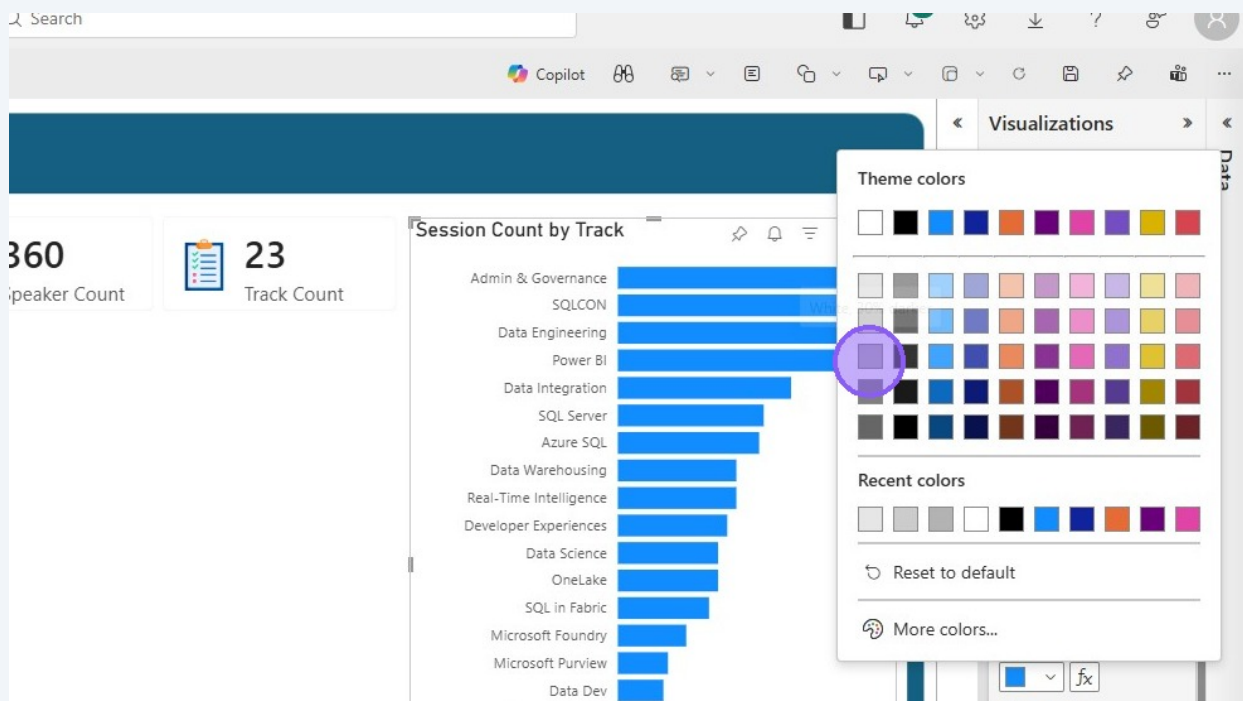

33

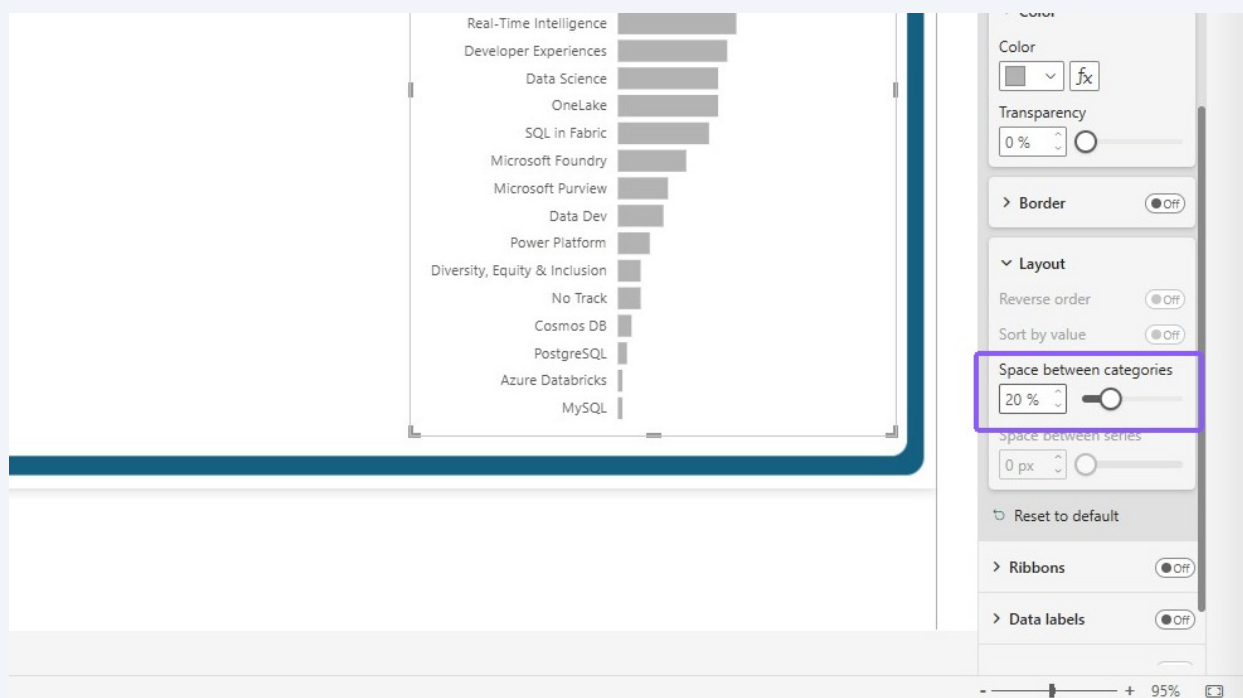

Under Bars, Change the color.

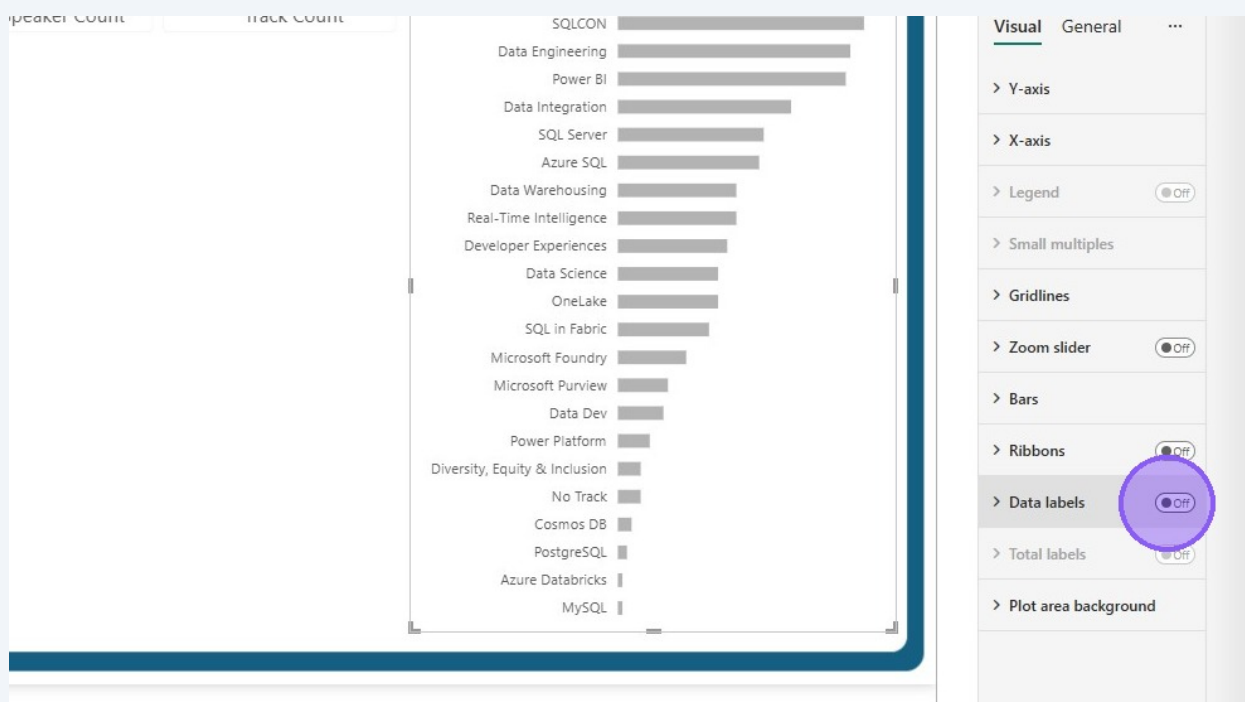

34 Click "White, 30% darker". (1st column. 3rd color)

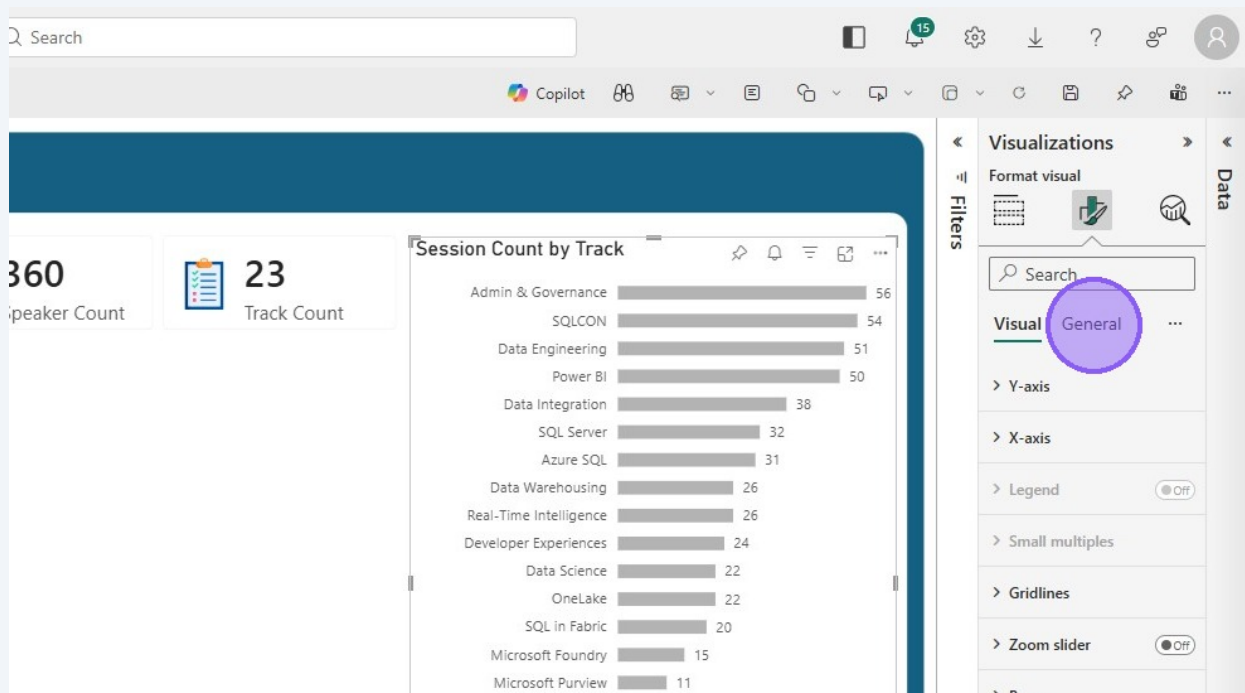

35 Under Layout, change the Space between categories to 50%

36 Switch on Data Labels

37 Click "General"

38

Under Properties, head over to Padding. Change all values to 10 px. (Padding makes the visual look clean)

275 Session Count

360 Speaker Count

40 Click "White, 10% darker". (First column. First row)

The screenshot shows a Power BI dashboard with three KPI cards: Session Count (275), Speaker Count (360), and Track Count (23). The main chart is 'Session Count by Track', a horizontal bar chart. A 'Theme colors' palette is open, displaying a grid of colors. A purple circle highlights the 'White, 10% darker' color in the first column and first row of the grid.

42 The session count by track bar chart is now ready.

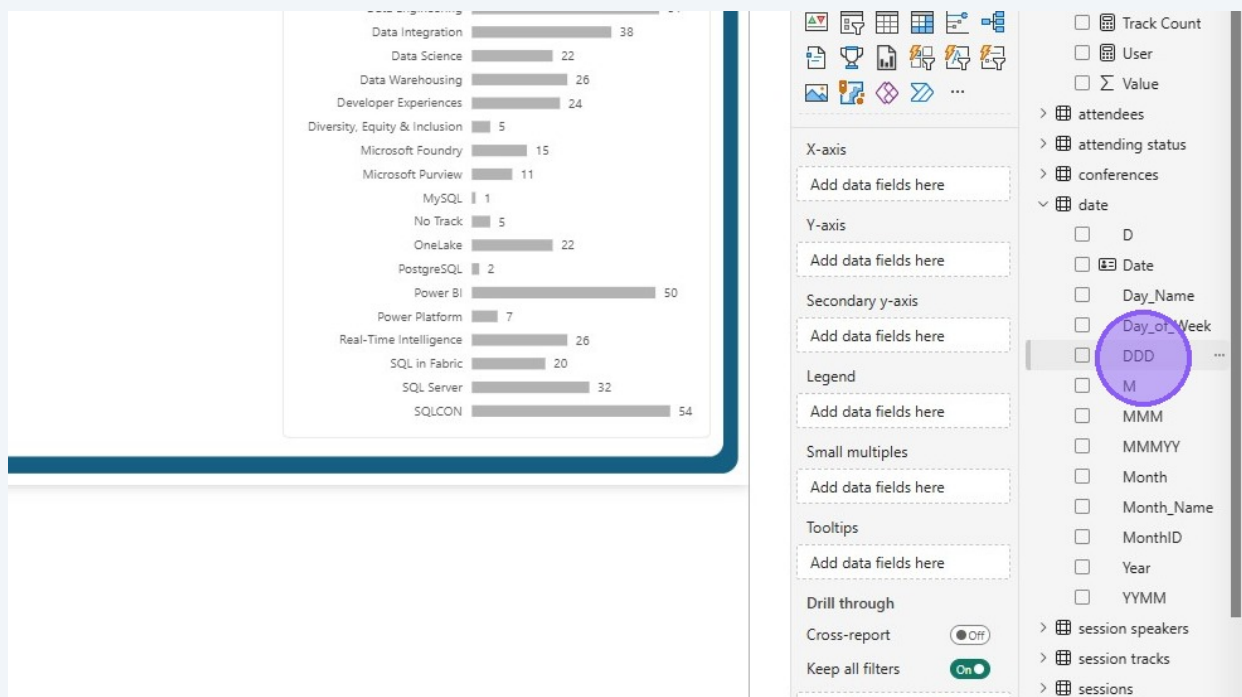

Session Count by Day Line Chart

43 Select Line chart

The screenshot shows the Power BI interface. On the left, there is a card titled '23 Track Count'. In the center, the 'Session Count by Track' bar chart is displayed. On the right, the 'Visualizations' pane is open, showing various chart options. The 'Line chart' option is highlighted with a purple circle. Below the chart options, there is a 'Values' section with a placeholder 'Add data fields here'.

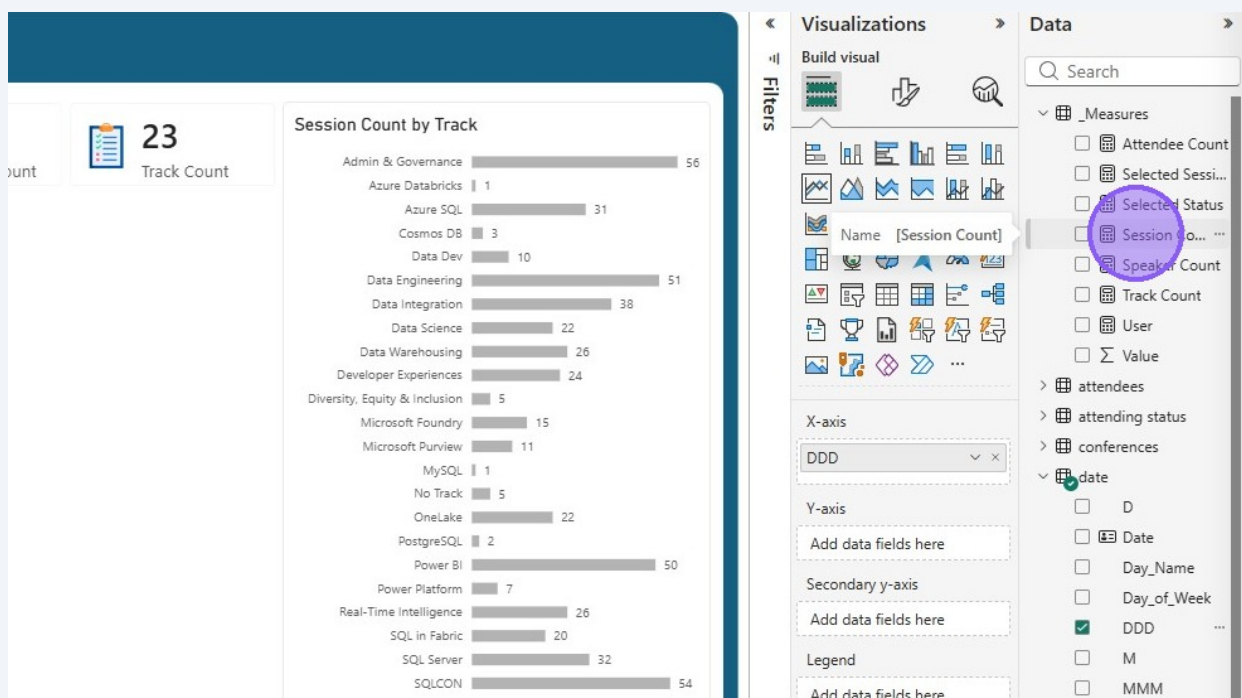

44

Click "DDD" from the date table. (Will be added automatically into the X axis bucket)

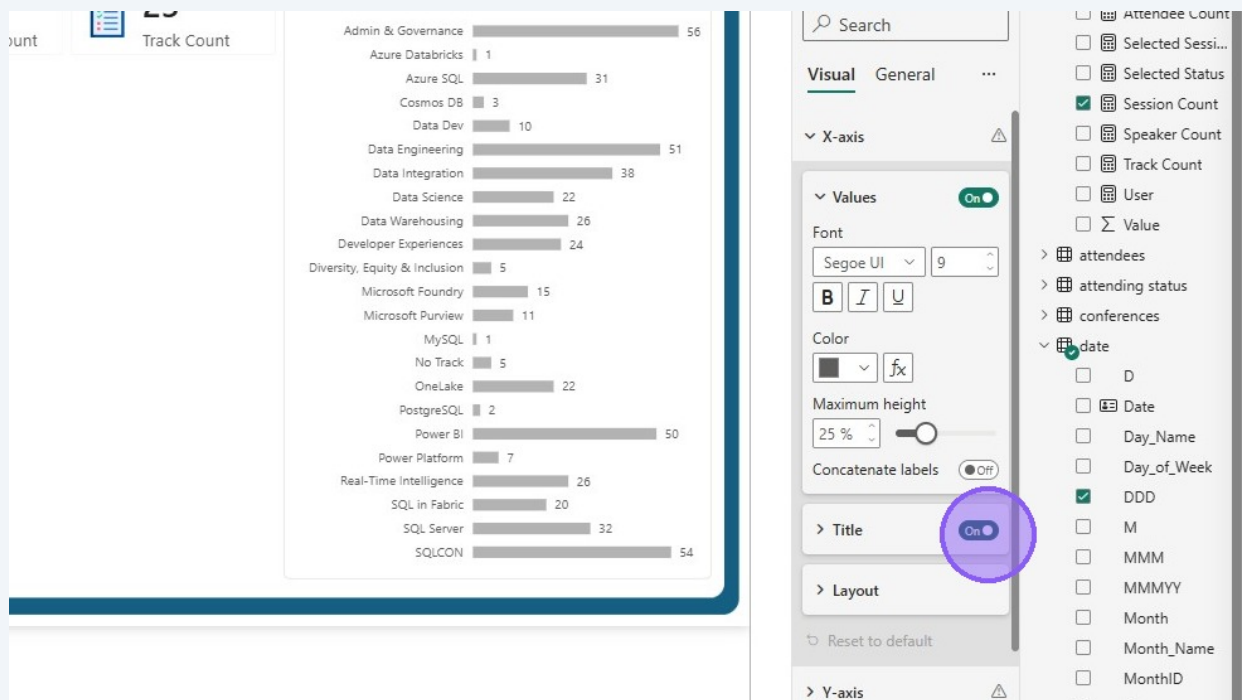

45

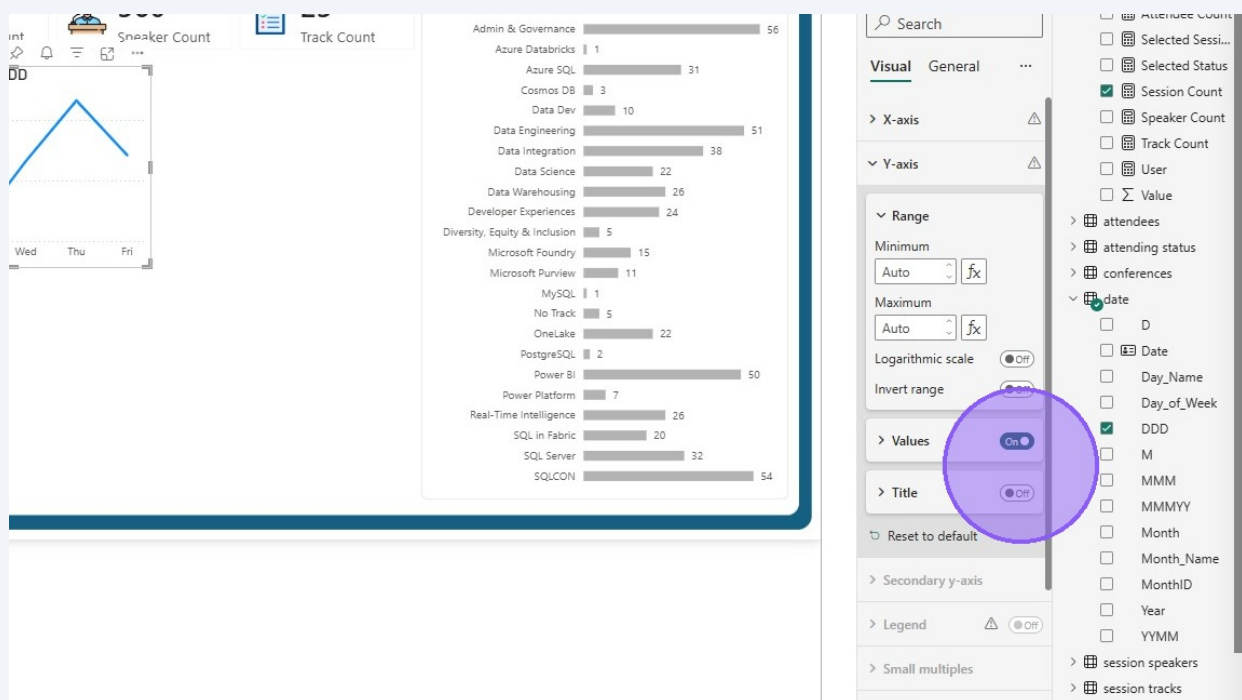

Click "Session Count" from the _Measures table. It will automatically be added to the Y-Axis

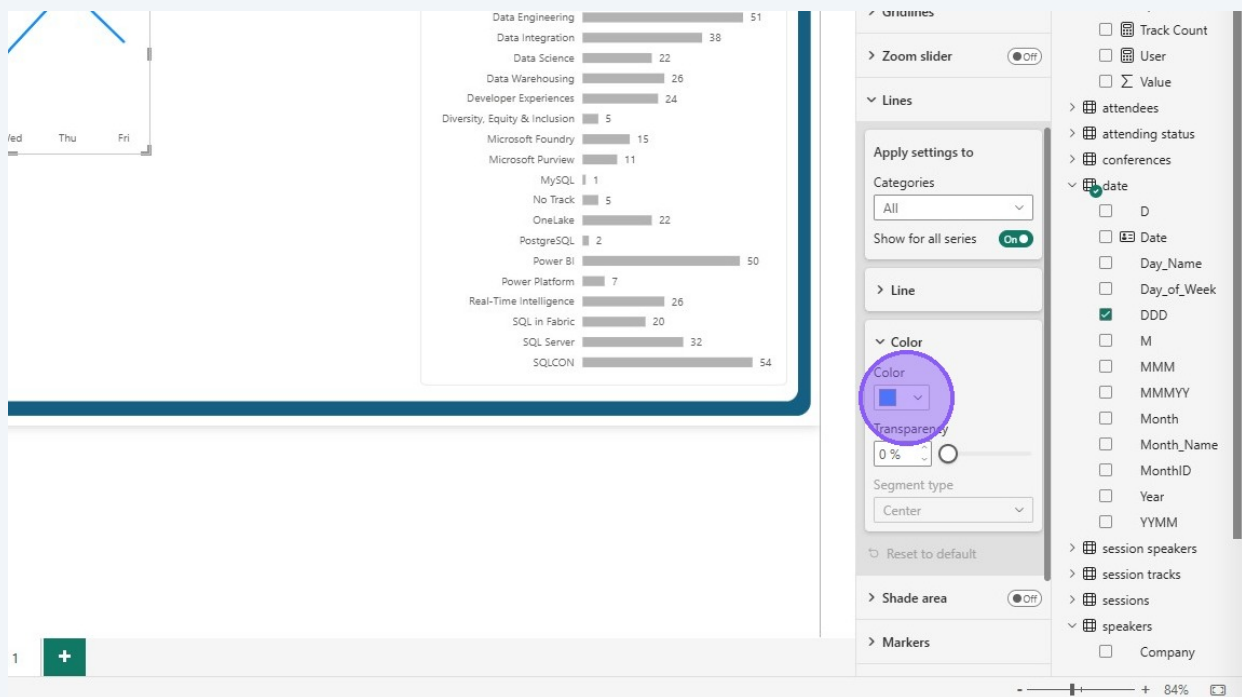

46 Time to format! Under X-Axis settings, turn off the Title.

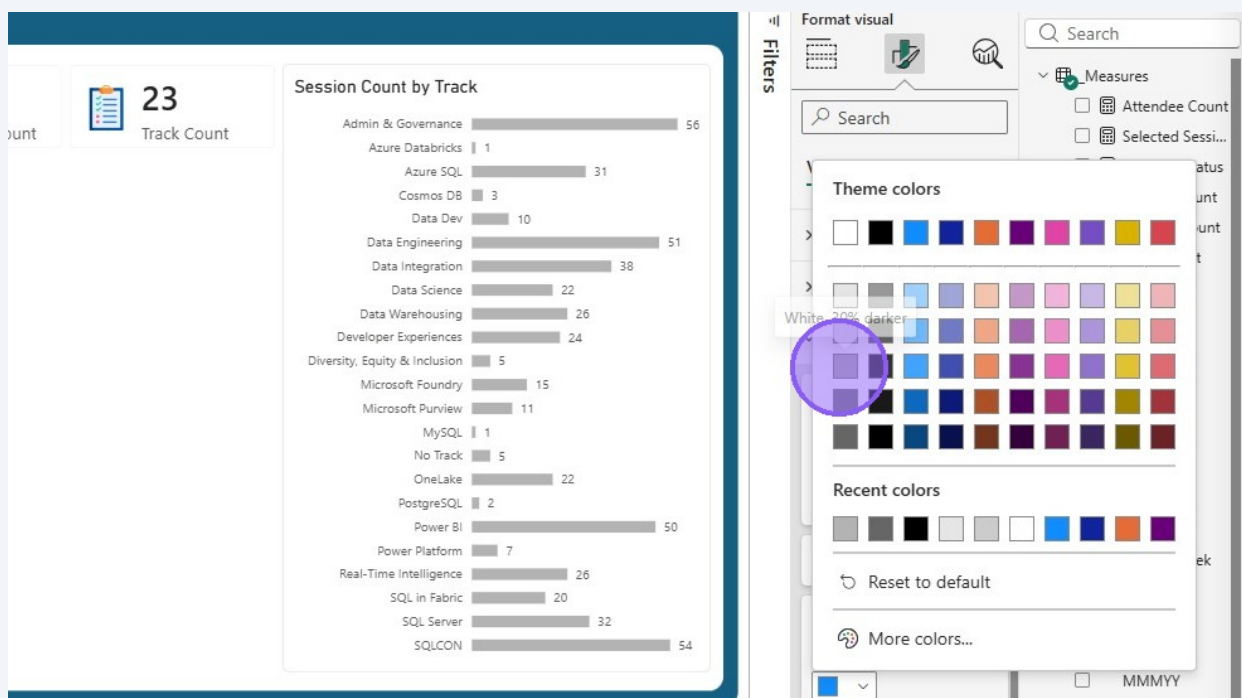

47 Similarly, turn OFF values and title under Y-Axis

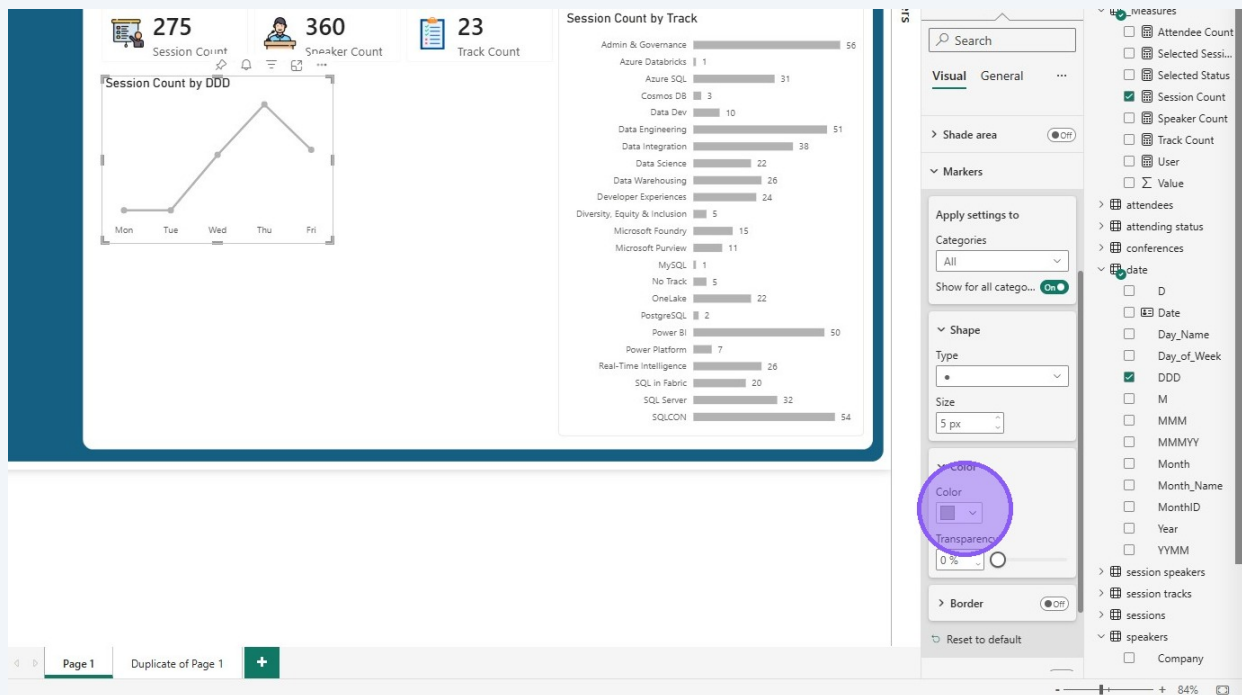

48 Under lines, click on color.

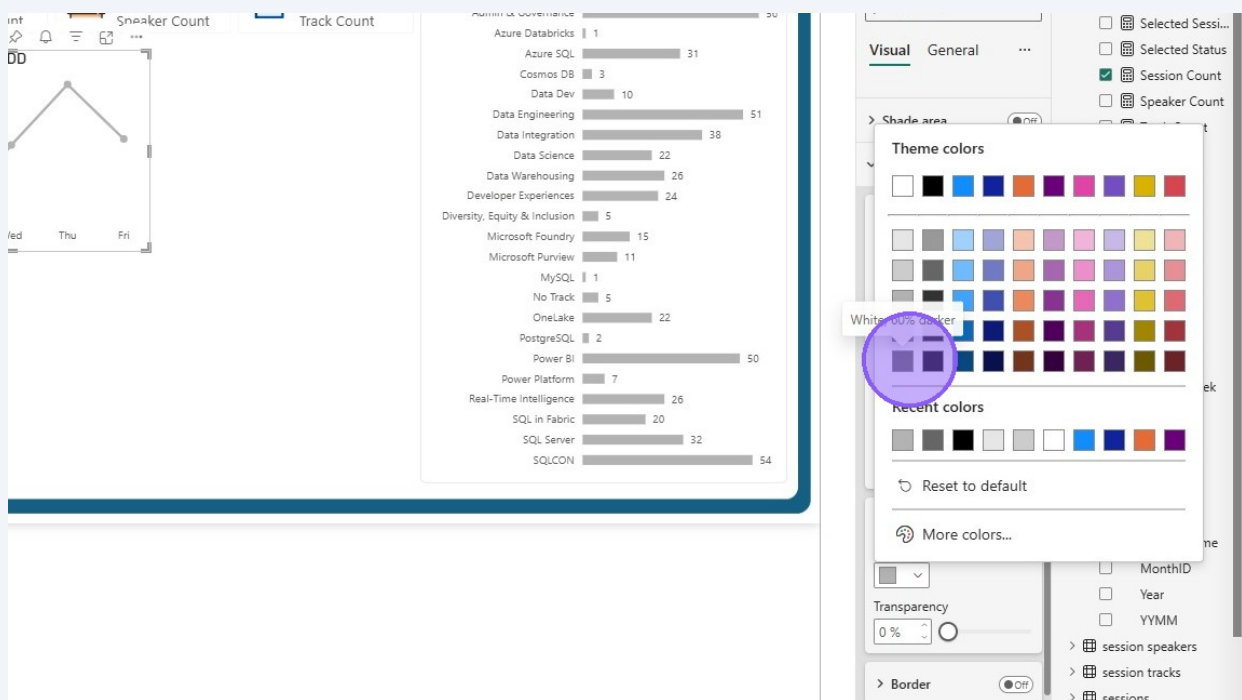

49 Click "White, 30% darker"

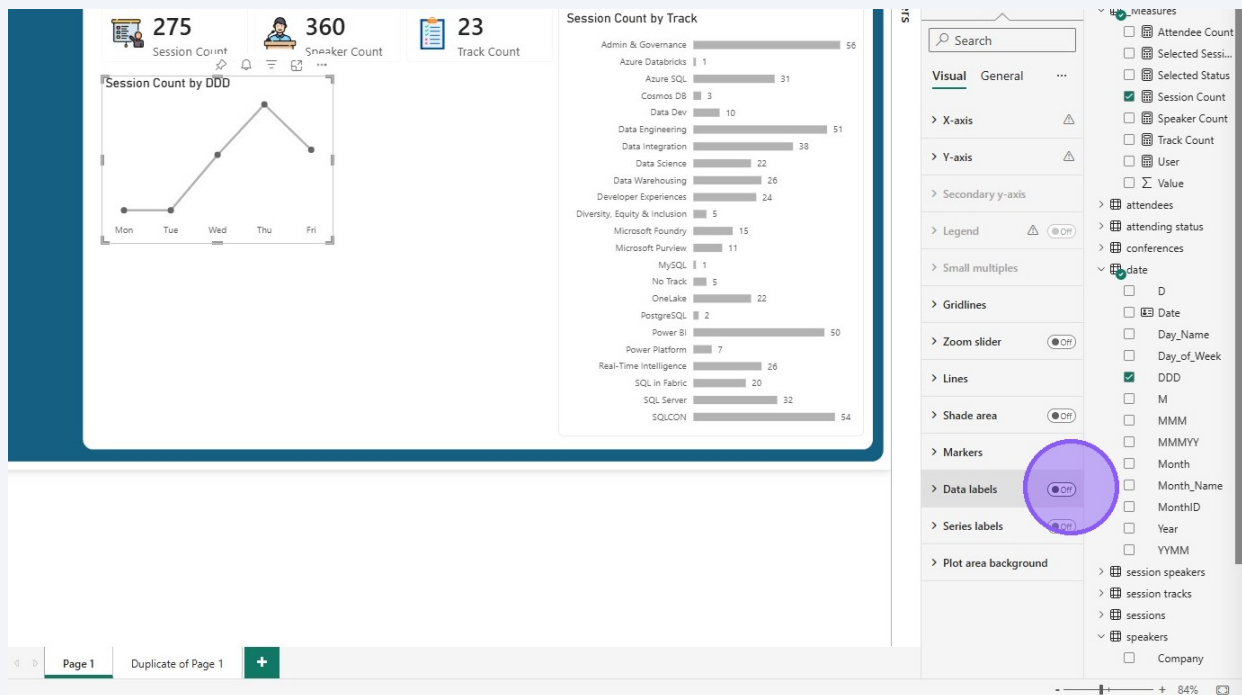

50 Under Markers, click on color

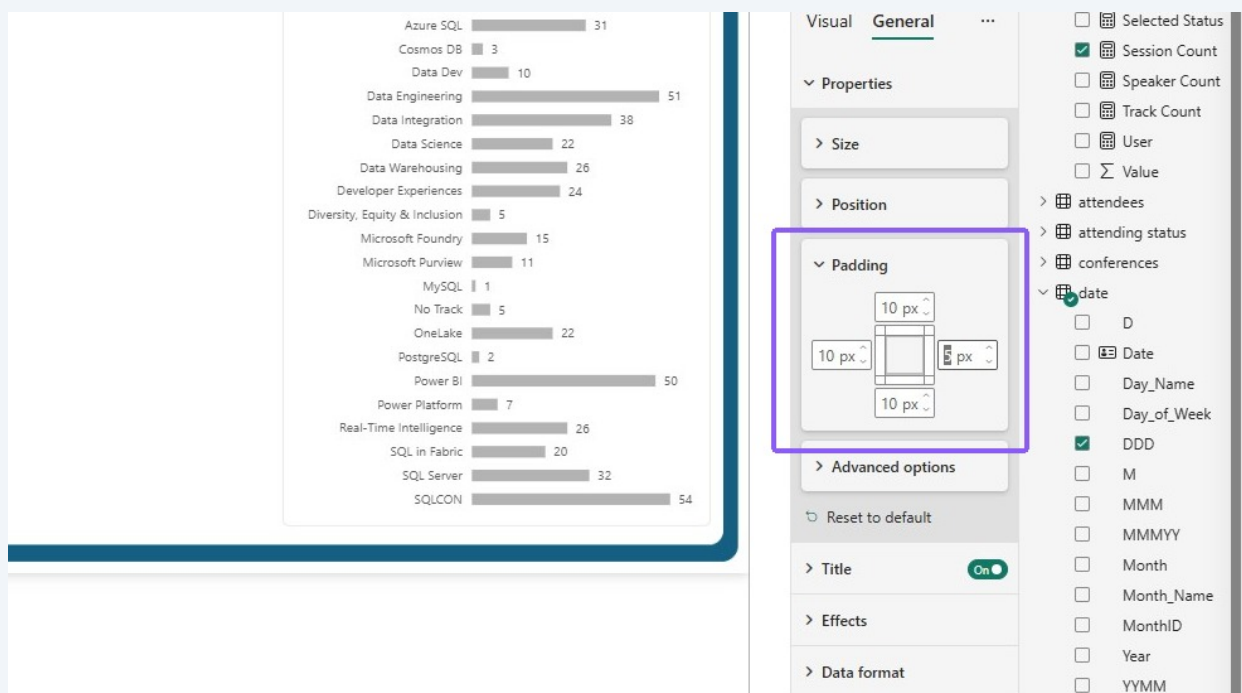

51 Click "White, 60% darker"

52 Switch on Data Labels

53 Under General, select padding and change all the values to 10 px (Note: We'll do this almost every time we create a visual to maintain consistency throughout the report)

54 Change the color of the visual border

The screenshot shows a Power BI report with a 'Track Count' bar chart. The chart displays counts for various categories like 'Admin & Governance' (56), 'Azure Databricks' (1), 'Azure SQL' (31), etc. To the right, the 'Visual' pane is open, showing the 'General' tab. Under the 'Effects' section, the 'Visual border' is turned on. The 'Color' property is highlighted with a purple circle, indicating the next step in the tutorial.

56 Add 6 px to the rounded corners section

57 Edit the title. Type in "Session Count by Day"

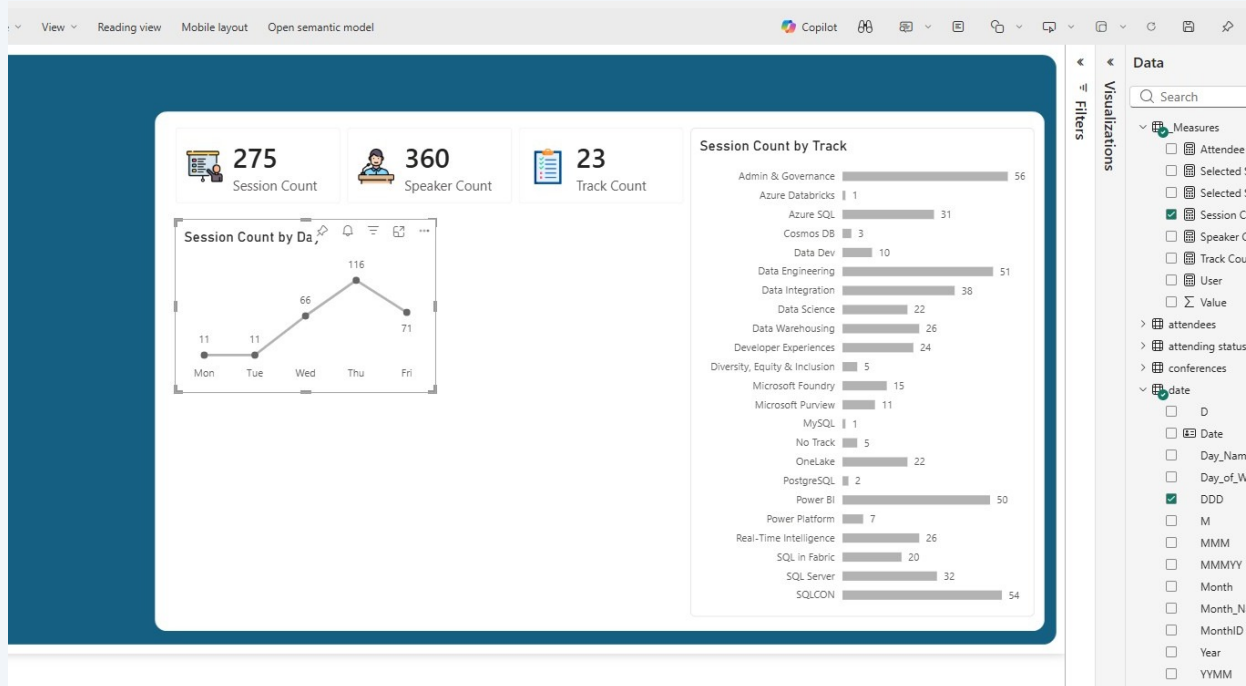

58 Your Visual is ready.

Speaker Count by Day Line Chart

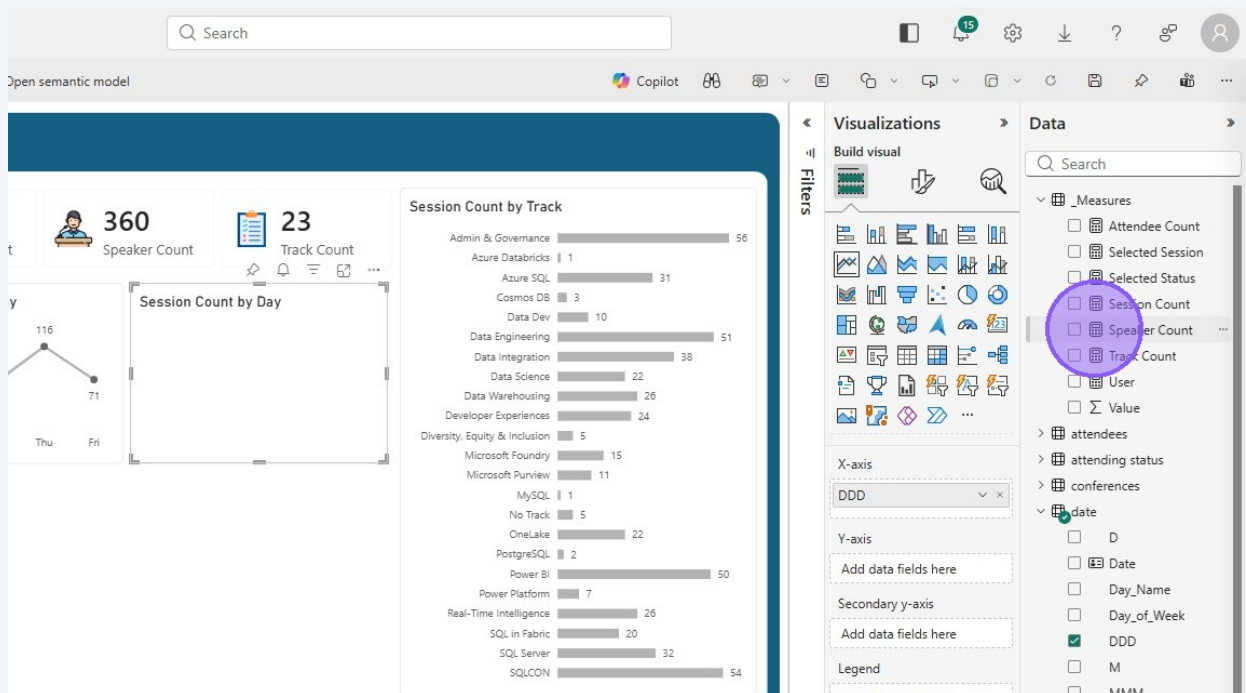

59

Copy-paste the Session Count by Day Visual.
To copy **ctrl + c**
To paste **ctrl + v**

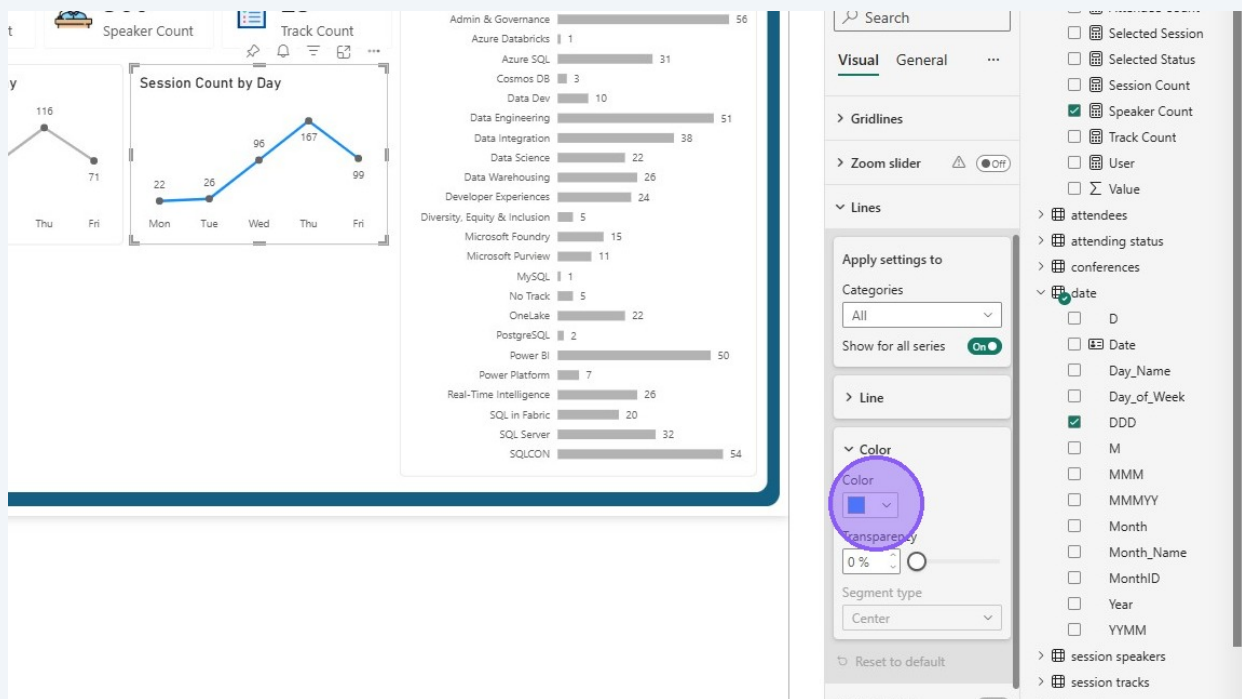

60

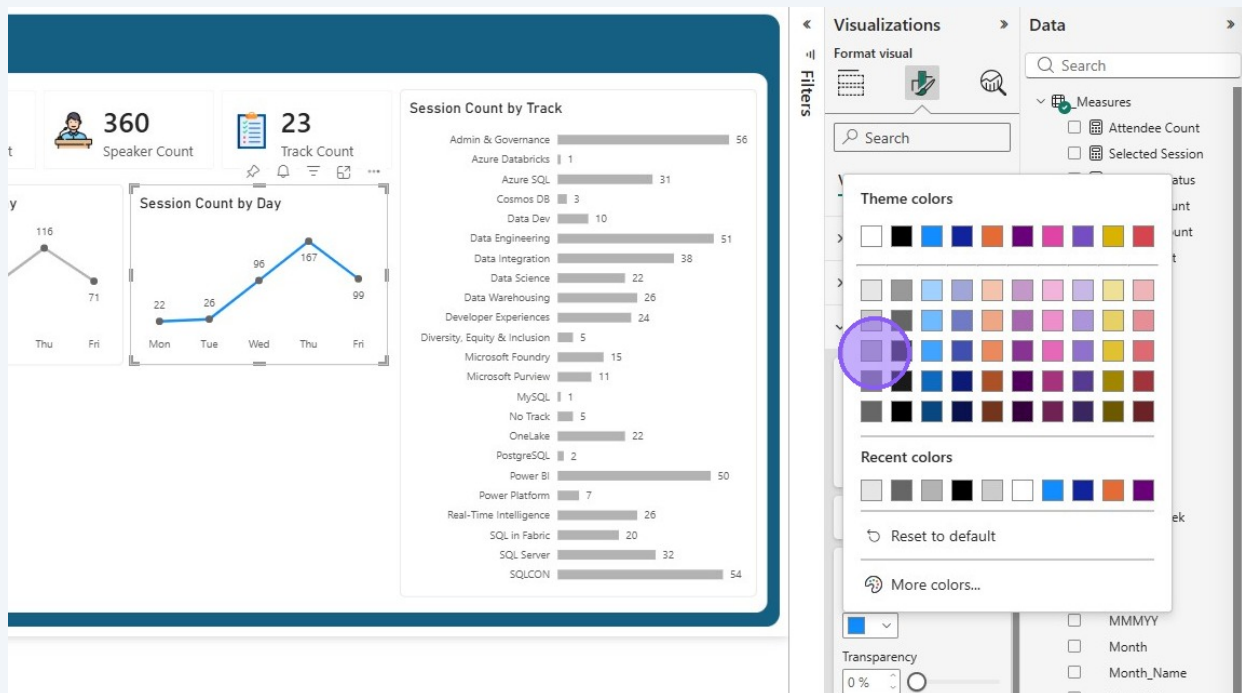

Under Y-axis, replace the Session Count with Speaker Count from the _Measures table.

61 Change the line color.

62 Click "White, 30% darker"

63 Edit the title to "Speaker Count by Day"

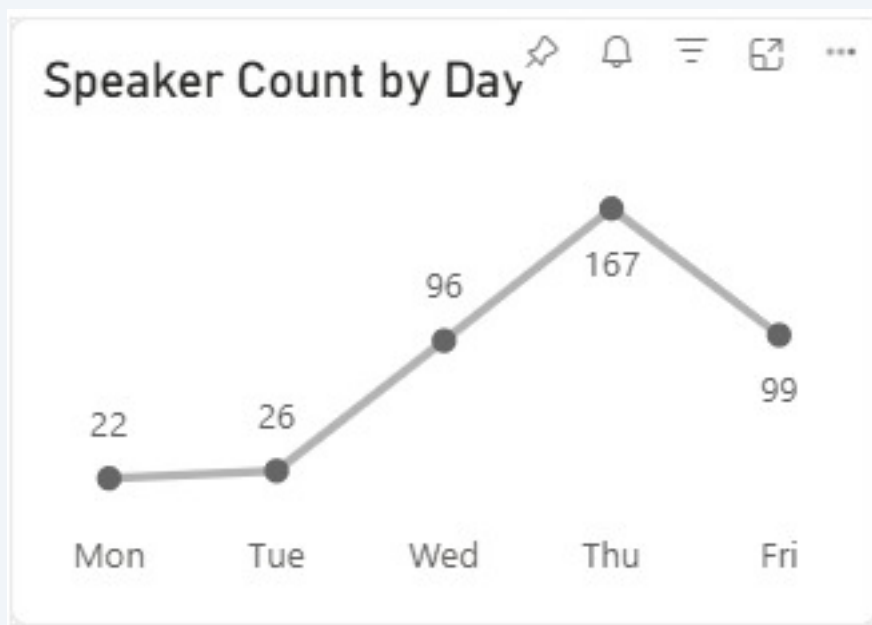

The screenshot shows a Microsoft Fabric dashboard with three main visualizations: 'Session Count' (275), 'Speaker Count' (360), and 'Track Count' (23). The 'Speaker Count by Day' chart is a line graph showing the number of speakers per day. The 'Session Count by Track' chart is a horizontal bar chart showing the number of sessions per track. The 'Speaker Count by Day' chart is selected, and its title is being edited in the 'Properties' pane to 'Speaker Count by Day'.

64 Your Speaker Count by Day visual is ready.

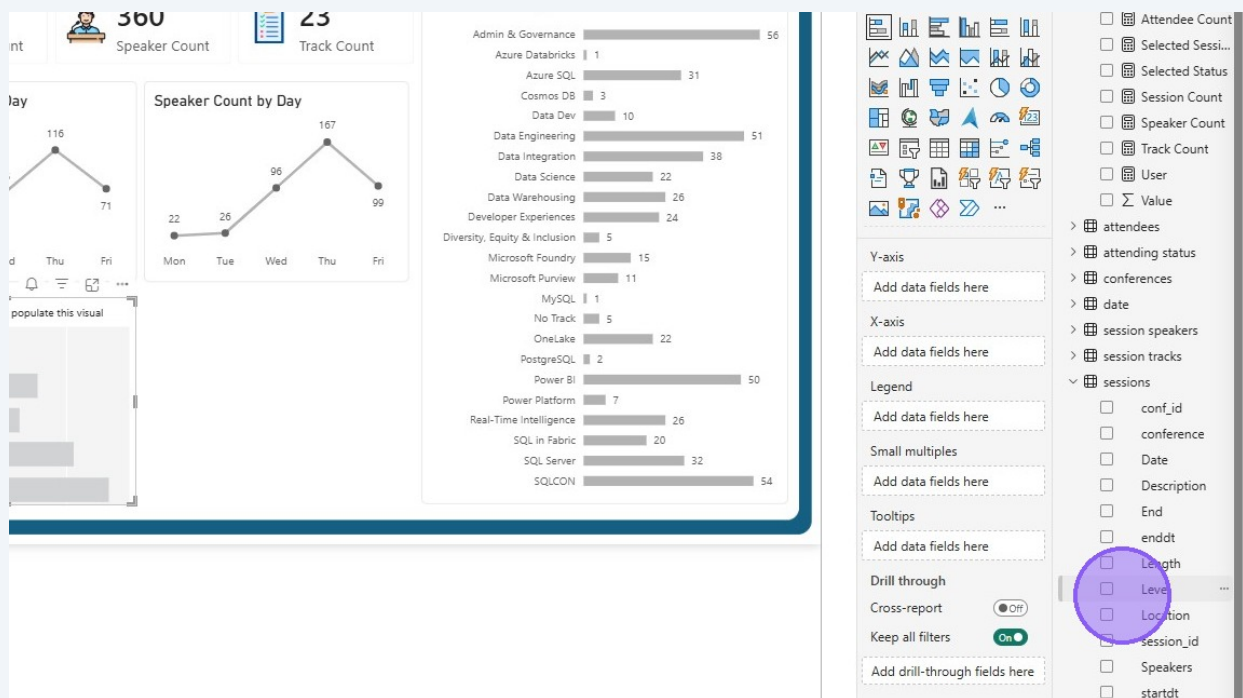

Session Count by Level

65 Select the bar chart

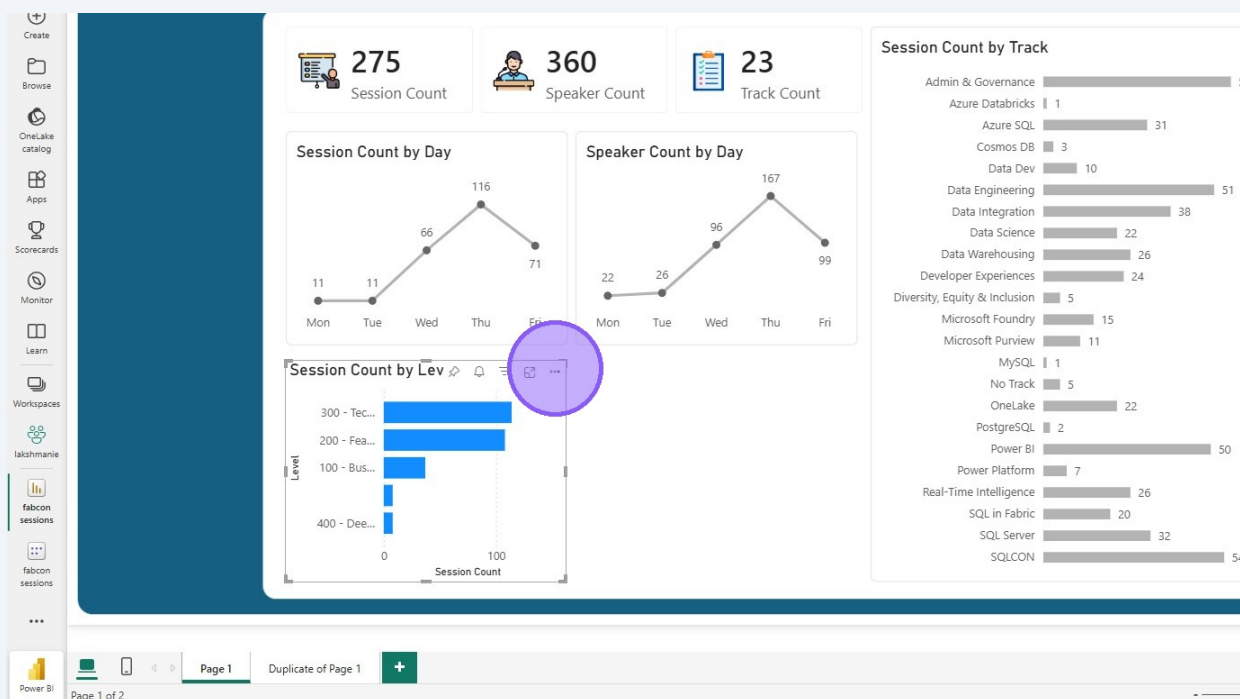

66 Click "Level" from the sessions table and "Session Count" from the _Measures table

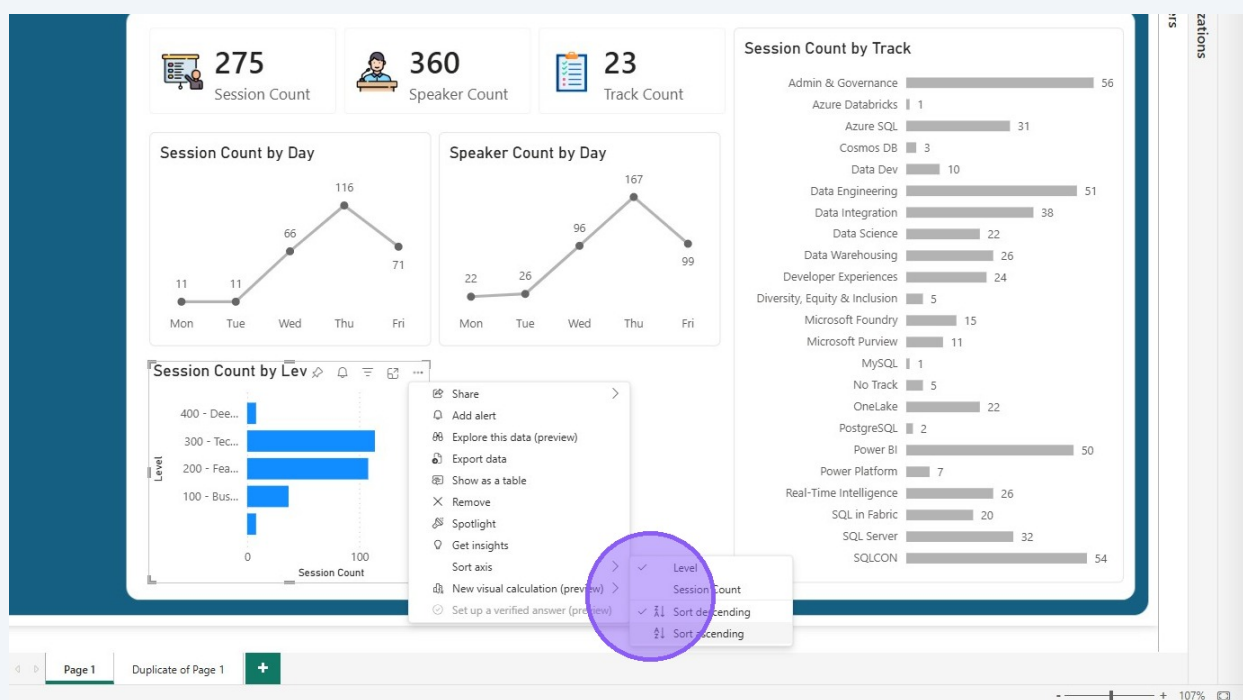

67

The levels are not sorted. Click on the three dots on the top right corner of the visual.

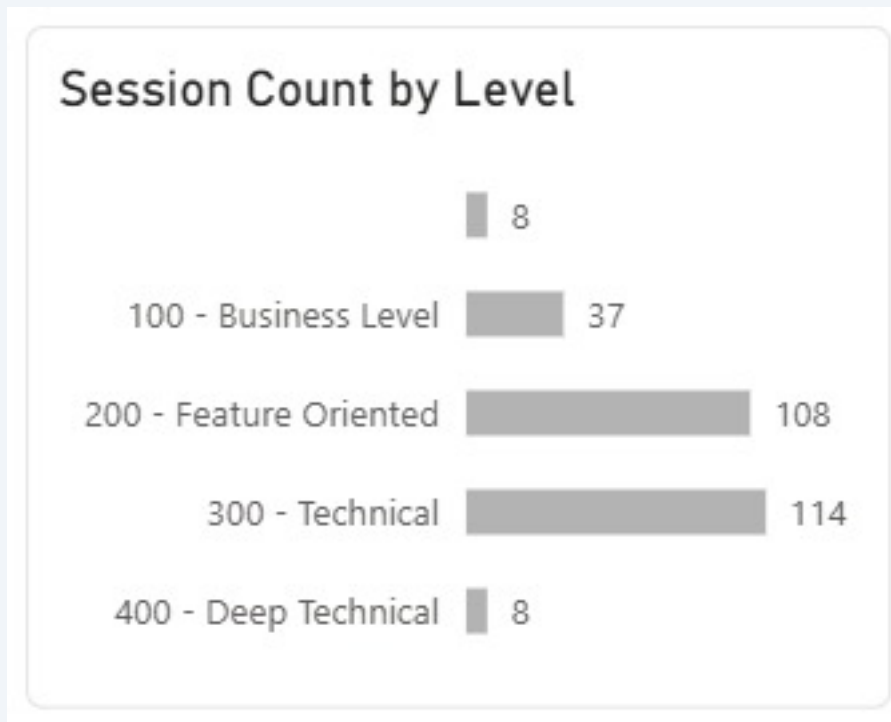

68

Click "Level" and "Sort ascending"

69

Time to format! We are going to follow the same steps from Step 30 to Step 41. You should get something like the below image.

Want to highlight the value with the highest count? Great way to draw attention.

When you reach step 33 , instead of choosing a color... Choose the fx next to it and then follow the below

Color - Categories

Format style

Rules

What field should we base this on?

Session Count

Rules

Reverse color order

+ New rule

If value	>=	0	Percent	and	<	100	Percent	then		
If value	=	100	Percent					then		

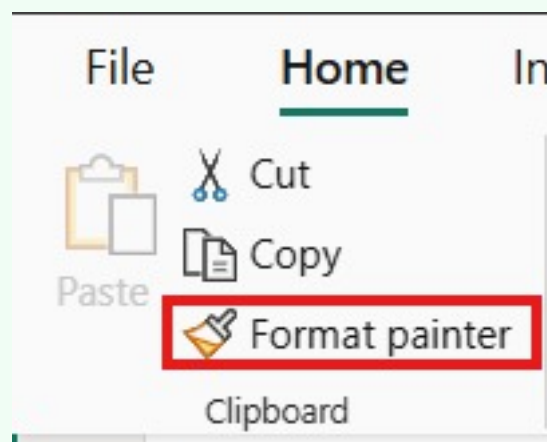

[Learn more about conditional formatting](#)

Cancel

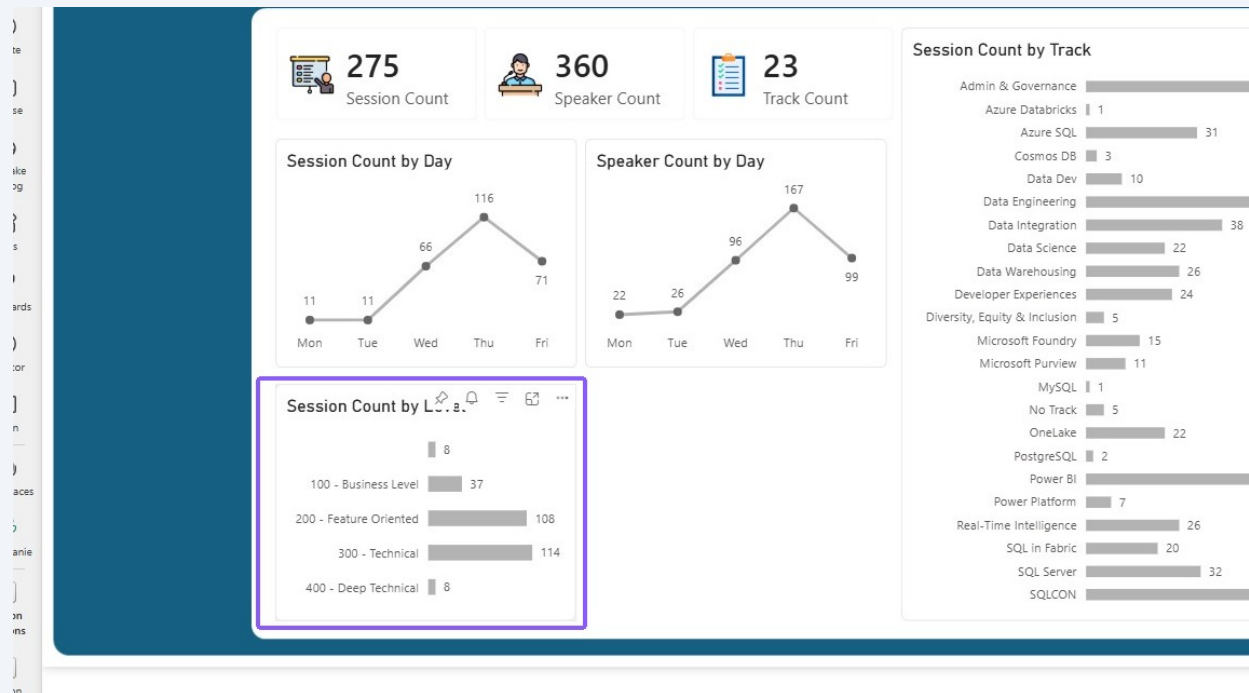

If you use Power BI Desktop, simply use the Format Painter option to copy the general formatting like padding, visual borders etc.

Speaker Count by Designation Bar Chart

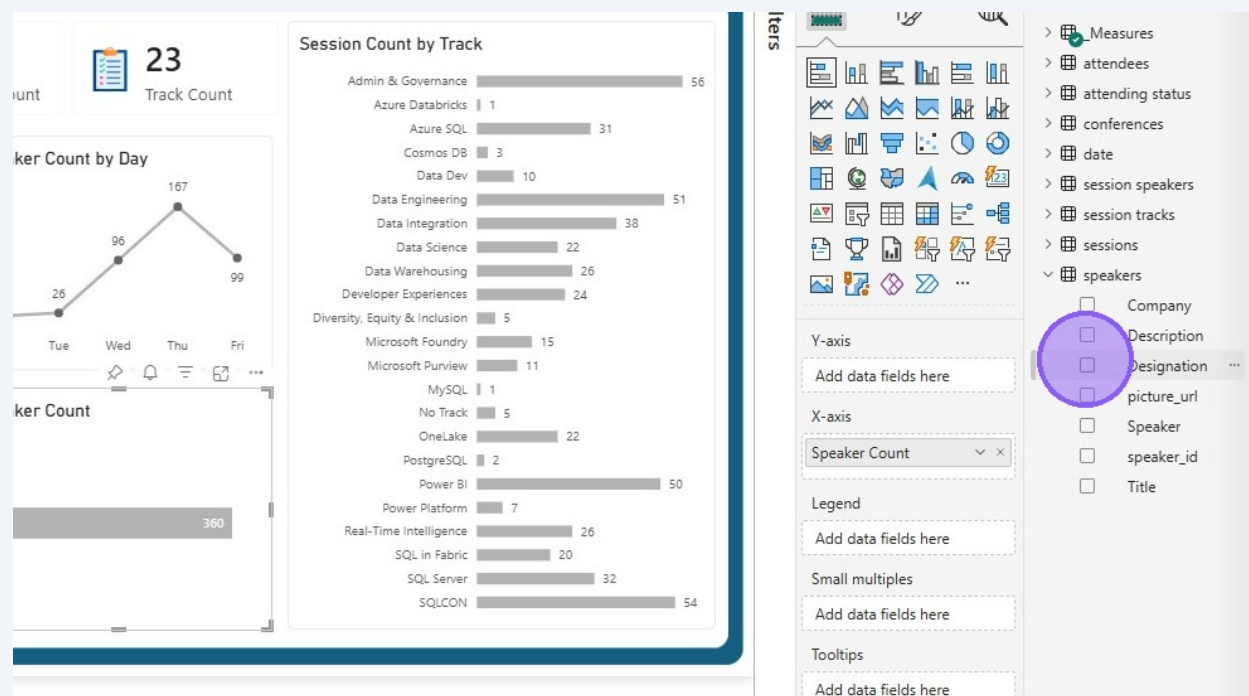

70

Copy and Paste the Session Count by Level Visual by **ctrl + c** and **ctrl + v**

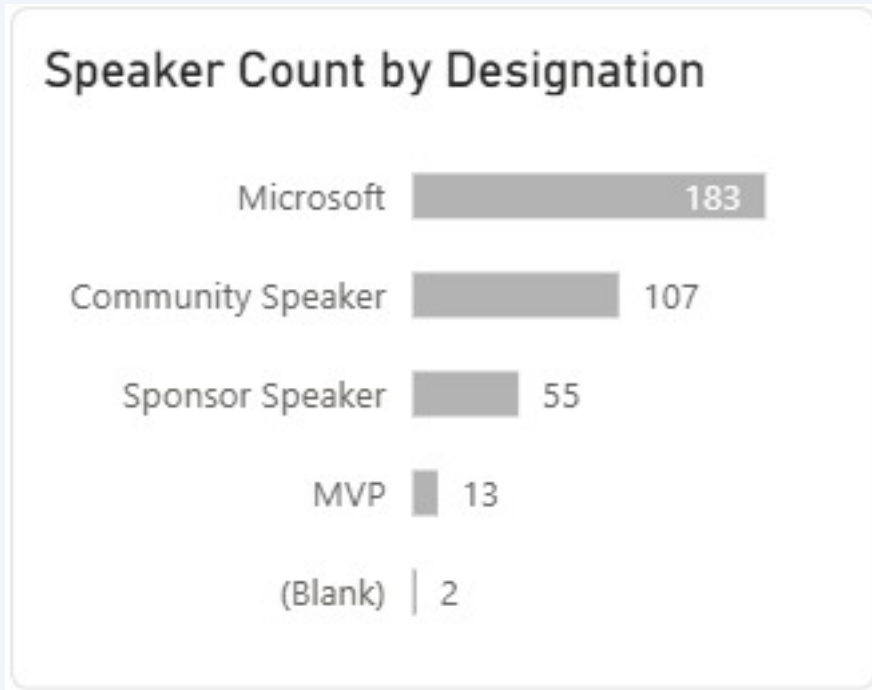

71

Replace the existing fields to
Y-Axis: Designation from speakers table
X-Axis: Speaker Count from _Measures table

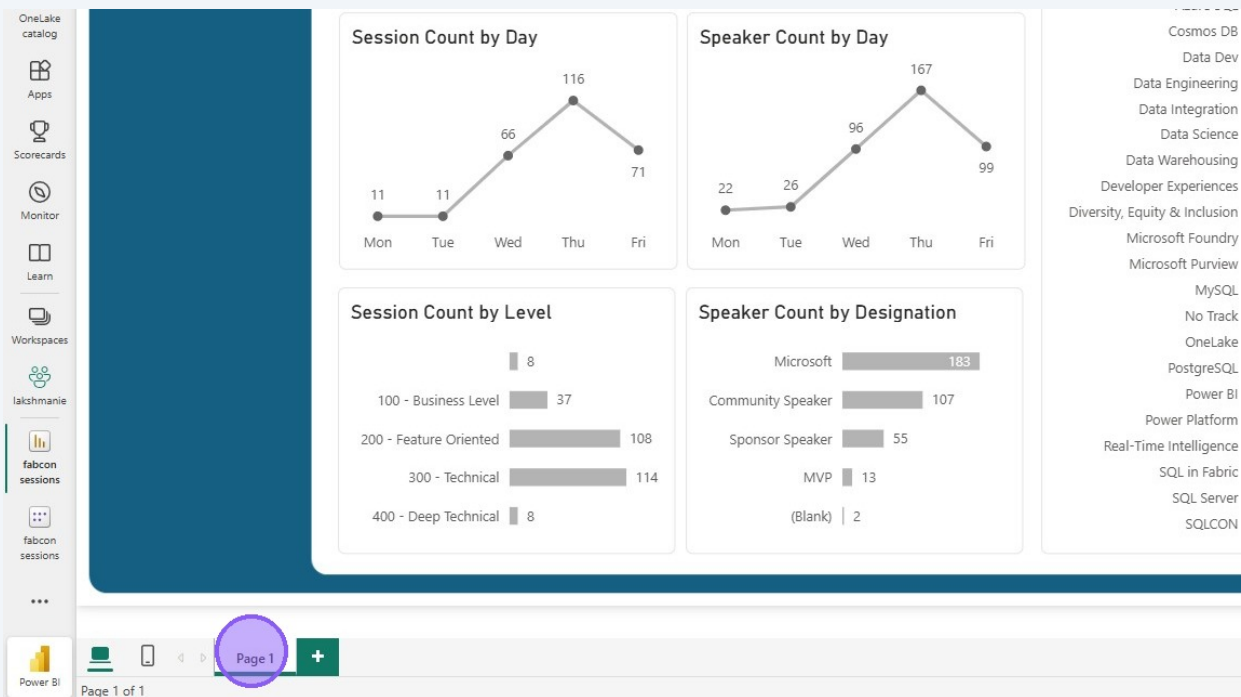

72 This is how the visual looks like now.

Rename Page

73 Click "Page 1" at the bottom and rename it to "Overview"

74 Here is your final look of the Overview Page. Feel free to play around with sizing and placements.
