

5f. Page 4: Scheduler (The fun page!)

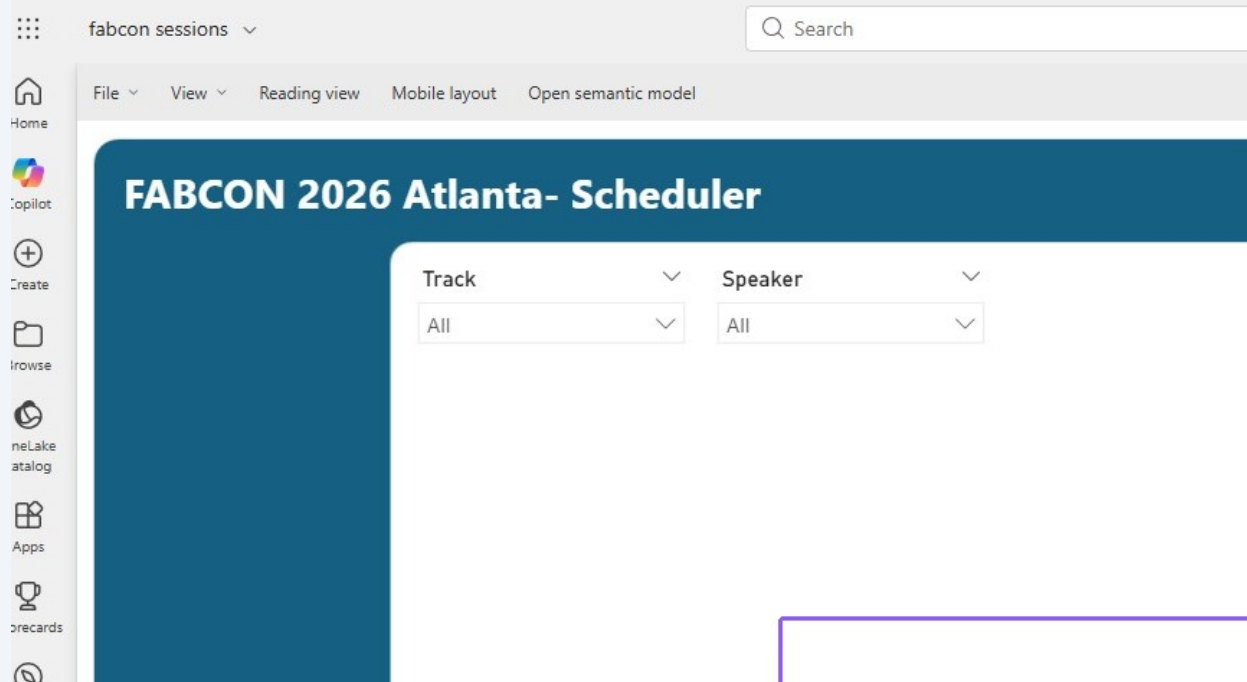

- 1 Create a new page "FABCON 2026 Atlanta- Scheduler". Add background and title.

Add Track and Speaker Slicers

2

Create 2 slicers for Track and Speakers. Use **track** from the session tracks table and **speaker** column from the speakers table. Convert them to Dropdown style and enable search

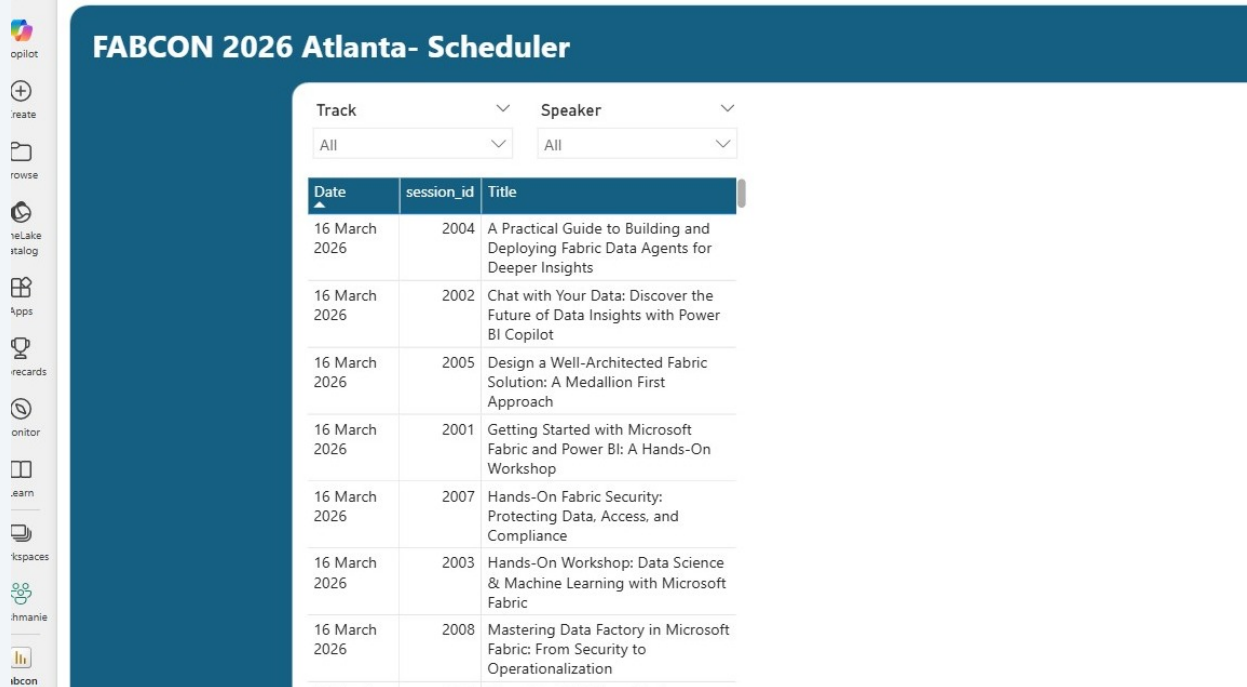

Add Session Selector Table

3

Select the table visual. Add the **date** column from date table. Add **session id** and **title** from the sessions table.

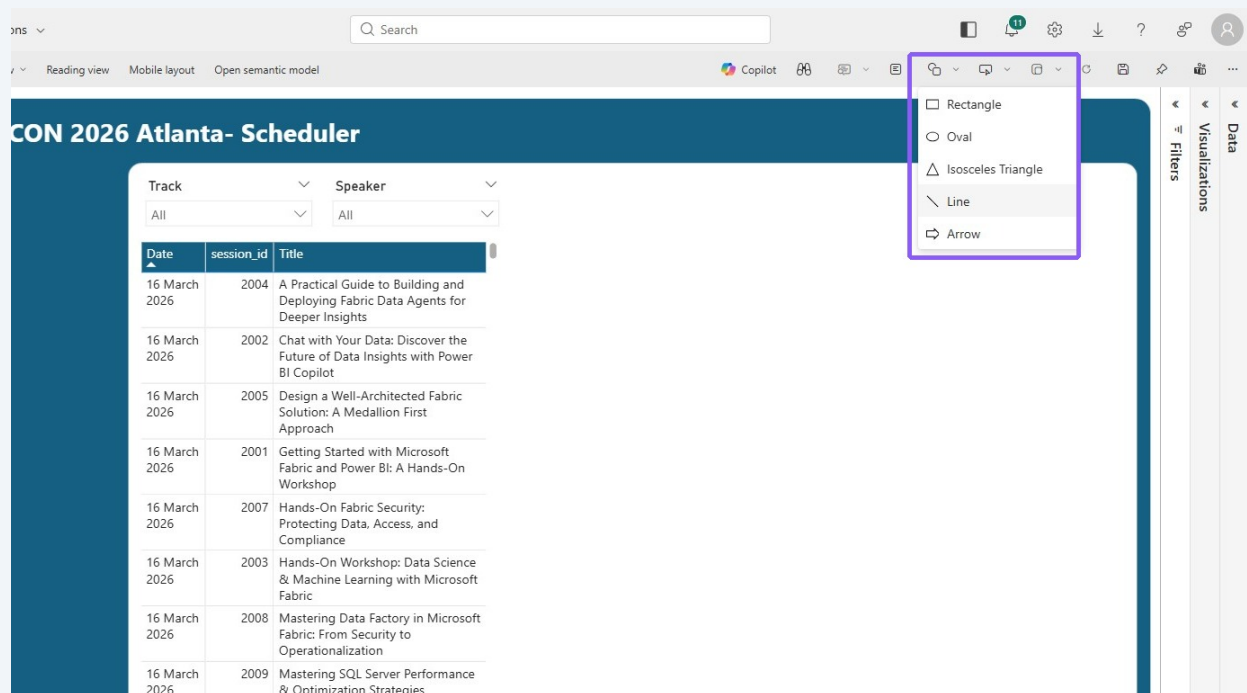

Format it as per your choice. Or simply stick to the previous table formatting. Resize and position the table as below.

Date	session_id	Title
16 March 2026	2004	A Practical Guide to Building and Deploying Fabric Data Agents for Deeper Insights
16 March 2026	2002	Chat with Your Data: Discover the Future of Data Insights with Power BI Copilot
16 March 2026	2005	Design a Well-Architected Fabric Solution: A Medallion First Approach
16 March 2026	2001	Getting Started with Microsoft Fabric and Power BI: A Hands-On Workshop
16 March 2026	2007	Hands-On Fabric Security: Protecting Data, Access, and Compliance
16 March 2026	2003	Hands-On Workshop: Data Science & Machine Learning with Microsoft Fabric
16 March 2026	2008	Mastering Data Factory in Microsoft Fabric: From Security to Operationalization

4

Click "Line" from shapes

Date	session_id	Title
16 March 2026	2004	A Practical Guide to Building and Deploying Fabric Data Agents for Deeper Insights

16 March 2026	2009	Mastering SQL Server Performance & Optimization Strategies

5

Under **Rotation**, change the shape value to 90 (Converting a horizontal line into a vertical line)

The screenshot shows the Microsoft Fabric 'ON 2026 Atlanta- Scheduler' dashboard. On the left, there is a table with session details. On the right, a vertical line shape is displayed in the canvas. The 'Format shape' pane on the right side of the canvas is open, and the 'Rotation' dropdown is set to 90 degrees, which is highlighted with a red circle.

Add/Update Action Button

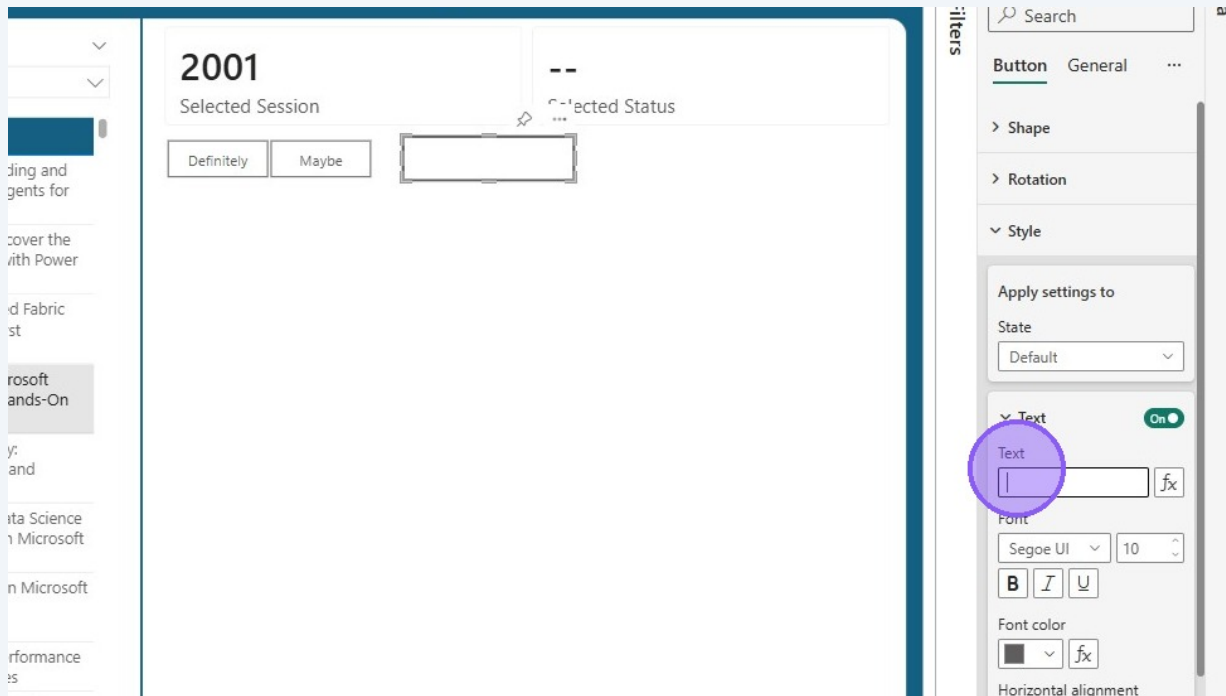

22 Click here to select a button

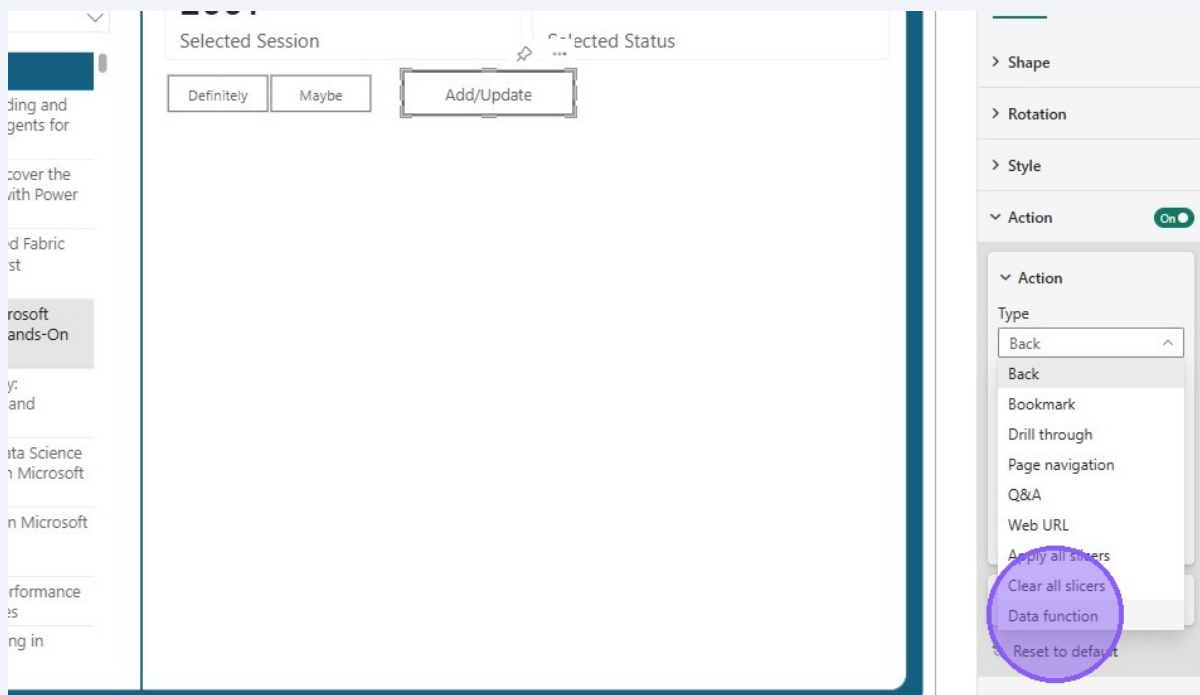

23 Click "Blank" button

24 Under Style, head over to text and type in "Add/Update"

25 Turn **ON** Action and Click "**Data function**" under Type. This is where we tell the button what to do.

26 Click on the fx. This is where we bind the UDF to the button.

The screenshot shows the Microsoft Fabric interface. On the left, a table lists sessions with columns: Date, session_id, and Title. The session with session_id 2001 is selected. On the right, the '2001' session details are shown, including a 'Selected Session' section with buttons 'Definitely', 'Maybe', and 'Add/Update'. The 'Add/Update' button is highlighted with a purple circle. To the right of the main content, a 'Filters' panel is visible, showing the 'Action' dropdown menu. The 'Data function' option is selected, and the 'fx' icon is highlighted with a purple circle.

16 March 2026	2000	Modern Data Warehousing in Microsoft Fabric

27 Click on expand to view your UDF's

The screenshot shows the Microsoft Fabric interface. The top navigation bar includes 'fabcon sessions'. The main content area displays a table of user-defined functions (UDFs) with columns: Name, Type, Owner, Location, Endorsement, and Sensitivity. The function 'udf_fabcon_scheduler' is highlighted. A purple circle highlights the 'Expand' button (represented by a right-pointing arrow) next to the function name.

Name	Type	Owner	Location	Endorsement	Sensitivity
udf_fabcon_scheduler	User data functions	Stephanie Bruno	lakshmanie	—	—

28 Select "save_to_agenda"

The screenshot shows the OneLake catalog interface. The title is "Choose the data you want to connect". There are tabs for "All", "My functions", and "Endorsed in your org". A search bar is labeled "Filter by keyword". The table below lists data functions:

Name	Type	Owner	Location	Endorsement	Sensitivity
udf_fabcon_scheduler	User data functions	Stephanie Bruno	lakshmanie	—	—
save_to_agenda	Data function	Ⓢ	lakshmanie	N/A	N/A
delete_from_agenda	Data function	Ⓢ	lakshmanie	N/A	N/A

The "save_to_agenda" row is highlighted with a purple circle.

29 Click "Connect"

The screenshot shows the OneLake catalog interface. The title is "Choose the data you want to connect". There are tabs for "All", "My functions", and "Endorsed in your org". A search bar is labeled "Filter by keyword". The table below lists data functions:

Name	Type	Owner	Location	Endorsement	Sensitivity
udf_fabcon_scheduler	User data functions	Stephanie Bruno	lakshmanie	—	—
save_to_agenda	Data function	Ⓢ	lakshmanie	N/A	N/A
delete_from_agenda	Data function	Ⓢ	lakshmanie	N/A	N/A

The "Connect" button is highlighted with a purple circle.

30 You will see a few dropdowns appear. Select the **fx** next to sessionid.

The screenshot shows the Microsoft Fabric Scheduler interface. On the left, a table lists sessions with columns for Date, session_id, and Title. The session with session_id 2001 is highlighted. On the right, the 'Selected Session' panel shows details for session 2001. A conditional formatting rule is being applied to the 'sessionid' column, with the 'Data function' set to 'fx' and the 'Refresh the report' button circled in purple. A tooltip explains: 'Conditional formatting: Make this property change under different conditions that you define.'

16 March 2026	2000	Modern Data Warehousing in Microsoft Fabric

31 Click "Selected Session" and hit OK

The screenshot shows the Microsoft Fabric Scheduler interface with the 'Data function - Action - Action' dialog box open. The 'Format style' is set to 'Field value'. The 'What field should we base this on?' dropdown is set to 'Select an option'. The 'All data' list is expanded, and 'Selected Session' is selected, highlighted with a purple circle. The 'OK' button is visible at the bottom right of the dialog box.

Data function - Action - Action

Format style: Field value

What field should we base this on? Select an option

- Data in this visual
- All data
 - _Measures
 - Attendee Count
 - Selected Session**
 - Selected Status
 - Session Count
 - Speaker Count
 - Track Count
 - User
 - Value
 - attendees
 - attending status
 - conferences
 - date
 - session speakers
 - session tracks
 - sessions
 - speakers

32 Similarly click on the **fx** next to Attendee

The screenshot shows the Power BI Scheduler interface. On the left, a table lists sessions with columns for Date, session_id, and Title. The session with session_id 2001 is highlighted. In the center, the '2001 Selected Session' panel shows buttons for 'Definitely', 'Maybe', and 'Add/Update'. On the right, the 'Button' configuration panel is open, showing various settings. A red circle highlights the 'fx' icon next to the 'Attendee' dropdown menu, which is currently set to 'None'.

36

User Data Functions can take a few seconds to run and return data to the report, so we want a way to let our end users know that it's processing. To do this we can update the text on the button while the function is running.

Click the "Apply setting to" dropdown in the Style section and select "Loading."

37 Modify the Text for the Loading state to "Saving."

The screenshot shows a web application interface. On the left, there is a table with columns 'Date', 'session_id', and 'Title'. The table lists various sessions, with the session '2001' highlighted. On the right, there is a panel titled '2001' showing 'Selected Session' and 'Selected Status'. Below this, there are buttons for 'Definitely', 'Maybe', and 'Add/Update'. A purple circle highlights the 'Add/Update' button. On the far right, there is a 'Filters' panel with a search bar and a 'Text' section. The 'Text' section has a dropdown menu set to 'Loading', which is highlighted with a purple circle. Below the dropdown, there are options for 'Font', 'Font color', 'Horizontal alignment', 'Vertical alignment', and 'Padding'.

Scheduler Table

38

This is where your schedule will get updated according to your selection. Add a table visual and select these fields.

From _Measures table -> selected session

From Attendee table -> attendee, status

From sessions table -> title

Do the necessary formatting. You can always copy paste the other tables that we have and swap out the fields. That way the formatting still stays and the columns change.

The screenshot shows a Power BI report interface. At the top, the user's email is displayed: PBIF_lakshmicr07@fabconatl26.onmicrosoft.com. Below this, there are two selection boxes: "Selected Session" and "Selected Status". Under "Selected Session", there are buttons for "Definitely", "Maybe", and "Add/Update". The main area of the report is a table visual with the following columns: "Selected Session", "Title", "Attendee", and "Status". The table is currently empty. To the right of the report is the "Visualizations" pane. It shows the "Columns" section with the following fields: "Selected Session", "Title", "Attendee", and "Status". The "Columns" section is highlighted with a red box. Below the "Columns" section, there are options for "Drill through", "Cross-report" (set to Off), and "Keep all filters" (set to On). At the bottom of the pane, there is a section for "Add drill-through fields here".

Test the Add/Update Button

39 Click "2001"

42

Notice the button says "Saving" while it's running.

43

Also, notice the pop-up that lets you know your function was completed.

44

Ta-da!! And finally, you have an attendee row added to your scheduler table. (Adjust the column width of the table to avoid scrolls)

Go ahead and add 2-3 more sessions.

Add/Update

Selected Session	Title	Attendee	Status
2001	Getting Started with Microsoft Fabric and Power BI: A Hands-On Workshop	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely
2260	Power BI in Higher Education: Real Use Cases from Enrollment to Graduation	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely
2040	Power Query Escape Room	PBIF_lakshmicr07@fabconatl26	Definitely

47 Let's modify the text. Under State, select Default

The screenshot shows a design tool interface. On the left is a sidebar with a list of sessions. The main area contains a table with session details and a button labeled 'Definitely'. The button's properties panel is open on the right, showing the 'State' dropdown menu with 'Default' selected. The table has the following data:

Selected Session	Title	Attendee	Status
2001	Getting Started with Microsoft Fabric and Power BI: A Hands-On Workshop	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely
2260	Power BI in Higher Education: Real Use Cases from Enrollment to Graduation	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely
2040	Power Query Escape Room	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely

48 Type in "Delete" instead of Add/Update

The screenshot shows the same design tool interface as in step 47. The button's properties panel is open, and the 'Text' property is now set to 'Delete'. The table data remains the same:

Selected Session	Title	Attendee	Status
2001	Getting Started with Microsoft Fabric and Power BI: A Hands-On Workshop	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely
2260	Power BI in Higher Education: Real Use Cases from Enrollment to Graduation	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely
2040	Power Query Escape Room	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely

49 Switch to the "Loading" state

The screenshot shows a web application interface with a session list on the left and a 'Definitely' status modal on the right. The session list has columns for Date, session_id, and Title. The 'Definitely' modal has a 'Selected Session' table and a 'Selected Status' section. A purple circle highlights the 'Loading' state in the 'Apply settings to' dropdown on the right.

Date	session_id	Title
18 March 2026	2067	Performance Management with Fabric: The Next Frontier of Organizational Intelligence

Selected Status: Definitely, Maybe, Add/Update, Delete

Apply settings to: State (Loading)

Text: Saving

51

Time to switch the UDF. Expand Action. Click **fx** below Data Function. (Make sure the delete button is selected)

The screenshot shows the Power BI interface. On the left is a list of sessions. The main area displays a table of session details. On the right, the configuration pane is open, showing various settings. A purple circle highlights the 'fx' icon in the 'Data function' section of the configuration pane.

id	Title
367	Performance Management with Fabric: The Next Frontier of Organizational Intelligence
348	Planning & Writeback on Top of Semantic Models
340	Power Query Escape Room
364	Securing Your Data Estate with Purview
379	SQL Server 2025: The Developer's Revolution
354	SSMS 22 Unlocked: Features You've Been Waiting For
380	Talk to Your Data: The Future of Data Interaction with AI
345	Touch your data with Real Time Intelligence
371	Transform Your Business with Fabric Real-Time Intelligence
336	Transition from Data Analyst to Data Engineer: Upgrading Skills from DataFlows Gen2 to Notebooks
360	Unlocking Copilot in Fabric:

Selected Session	Title	Attendee	Status
2001	Getting Started with Microsoft Fabric and Power BI: A Hands-On Workshop	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely
2260	Power BI in Higher Education: Real Use Cases from Enrollment to Graduation	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely
2040	Power Query Escape Room	PBIF_lakshmicr07@fabconatl26.onmicrosoft.com	Definitely

52

Click "**delete_from_agenda**" and hit **Connect**

The screenshot shows the OneLake catalog interface. It displays a list of data functions. A purple circle highlights the 'delete_from_agenda' function.

Name	Type	Owner	Location	Endorsement	Sensitivity
udf_fabcon_scheduler	User data functions	Stephanie Bruno	lakshmanie	—	—
save_to_agenda	Data function	Ⓢ	lakshmanie	N/A	N/A
delete_from_agenda	Data function	Ⓢ	lakshmanie	N/A	N/A

53

Once you change the function, notice that only two parameters are listed. The Status dropdown has disappeared because the delete function does not use that parameter.

Now, select the fx next to sessionid

The screenshot shows the Microsoft Fabric Scheduler interface. On the left, there's a table of sessions with columns: Date, session_id, and Title. The middle pane shows a 'Selected Session' table with columns: Selected Session, Title, Attendee, and Status. The right pane shows the configuration for a 'Delete' action. A purple circle highlights the 'fx' icon next to the 'sessionid' dropdown menu in the 'Action' section.

54

Click "Selected Session"

The screenshot shows the Microsoft Fabric Scheduler interface with a 'Data function - Action - Action' dialog box open. The dialog box has a 'Format style' dropdown set to 'Field value' and a 'What field should we base this on?' dropdown set to 'Selected Session'. A purple circle highlights the 'Selected Session' option in the dropdown menu. The background shows the 'FABCON 2026 Atlanta- Scheduler' interface with a list of sessions and a sidebar with navigation icons.

55 Click fx next to Attendee

The screenshot shows the Power BI Scheduler interface. On the left, there's a list of sessions with columns for Date, session_id, and Title. The main area displays a detailed view of a selected session, including a table with columns for Selected Session, Title, Attendee, and Status. A purple circle highlights the 'fx' icon next to the 'Attendee' field in the 'Selected Session' table. A tooltip for the 'fx' icon is visible, stating: "Conditional formatting: Make this property change under different conditions that you define." The right sidebar shows the 'Format' pane with various options like Shape, Rotation, Style, and Action.
